Reader Information

Theme	Social Care – Carers’ Statistics
Document Purpose	For information
Authors / Statisticians	Philip Carson, Heidi Rodgers
Publication Date	11 th June 2015
Issued by	Community Information Branch Information & Analysis Directorate Department of Health Social Services & Public Safety Stormont Estate Belfast, BT4 3SQ Email cib@dhsspsni.gov.uk
Internet address	http://www.dhsspsni.gov.uk/index/statistics/socialcare.htm
Target Audience	Social Services Directors, Chief Executives of HSC Board and Trusts in Northern Ireland, health care professionals, academics and social care stakeholders.
Main uses of document	The main uses of these data are to monitor a Commissioning Plan Direction target, to assess HSC Trust performance, to inform and monitor related policy and to respond to ad-hoc queries and parliamentary/ assembly questions. The bulletin is also used by academics/ researchers, the voluntary sector and those with an interest in carers.
Copyright	This publication is Crown copyright and may be reproduced free of charge in any format or medium. Any material used must be acknowledged, and the title of the publication specified.
Price	Free

We would greatly welcome any comments that you have regarding the content of this publication. Feedback forms are available on our [website](#).

About Us

Statistics and research for the **Department of Health, Social Services and Public Safety** is provided by the Information and Analysis Directorate (IAD). IAD is responsible for compiling, processing, analysing, interpreting and disseminating a wide range of statistics covering health and social care.

The statisticians within IAD are outposted from the Northern Ireland Statistics & Research Agency (NISRA) and the statistics are produced in accordance with the principles and protocols set out in the [Code of Practice for Official Statistics](#).

www.dhsspsni.gov.uk/statistics

IAD comprises four statistical sections: Hospital Information, Community Information, Public Health Information & Research and Project Support Analysis.

This publication is produced by Community Information Branch.

Our Vision and Values

- *Provide up-to-date, quality information on children and adult social services and community health;*
- *to disseminate findings widely with a view to stimulating debate, promoting effective decision-making and improvement in service provision; and*
- *be an expert voice on social care information.*

www.dhsspsni.gov.uk/socialcare.htm

About Community Information Branch

The purpose of Community Information Branch (CIB) is to promote effective decision making in children and adult social services by providing quality information and analysis.

We collect, analyse, and publish a wide range of community information that is used to help monitor the delivery of personal social services policy. Information collected by CIB is used to assess HSC Trust performance, for corporate monitoring, policy evaluation, and to respond to parliamentary/assembly questions.

Information is widely disseminated through a number of regular key statistical publications and ad hoc reports, details of which are available online.

Notification of changes to data sources:

As part of an ongoing process of streamlining and improving the quality of community service information, a new return for the capture of Adult Carers Assessment information has been established. This new return, which is a joint Department of Health, Social Services and Public Safety (DHSSPS) and Health and Social Care (HSC) Board return, has from January-March 2015 replaced the CA1 and CA1b returns, which historically have been used as the source for this publication. The new return improves the relevance of the data captured and lessens the burden placed on HSC Trust resources to collect the information.

1. Key Findings

“Quarterly Carers’ Statistics for Northern Ireland” presents figures regionally and by Health and Social Care Trust in respect of carers’ assessments and reassessments that are offered, accepted / completed and declined; and are available by the client group of the person being cared for.

Quarter ending 31 March 2015:

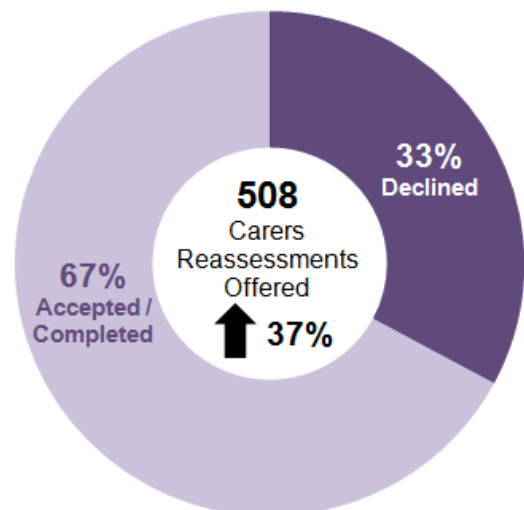

Carers Assessments

- A carer’s assessment was offered to 3,076 carers in Northern Ireland during the quarter ending 31 March 2015. This represented an increase of 22% (563) from the quarter ending 31 December 2014 (2,513) and an increase of 5% (143) from the same quarter last year (2,933).
- Of the 3,076 carers’ assessments offered, 41% (1,253) were accepted / completed and 59% (1,823) were declined.

Carers Reassessments

- A carer’s reassessment was offered to 508 carers in Northern Ireland during the quarter ending 31 March 2015. This represented an increase of 37% (137) from the quarter ending 31 December 2014 (371) and an increase of 32% (124) from the same quarter last year (384).
- Of the 508 carers’ reassessments offered, 67% (341) were completed and 33% (167) were declined.

2. Introduction

Carers are people who, without payment, provide help and support to a family member or a friend who may not be able to manage without this help because of frailty, illness or disability. Carers can be adults caring for other adults, parents caring for ill or disabled children or young people who care for another family member and are a vital part of the DHSSPS's vision of providing support for people to live more independent lives and helping people remain in their own homes and live independently for longer.

In recognition of the need to support carers in their caring role and their need to have access to a social life, educational, training and employment opportunities, a carers' strategy, "[Caring for Carers](#)", was developed. The strategy, published in January 2006, was inter-departmental and inter-agency, dealing with health and personal social services, employment, training, education, availability of information and support services.

Carers may need support to allow them to continue in their caring role and to ensure their own health and well-being does not suffer as a result. They have a right to a life outside caring. All carers are individuals and, as such, present varying needs. Proper **assessment** is the first step to accessing services and it is vitally important that carers are offered the opportunity to discuss their own needs and be considered for services in their own right.

The [Carers and Direct Payments Act \(Northern Ireland\) 2002](#) imposed a statutory duty on Health and Social Care Trusts to inform carers of their right to an assessment and to be considered for services to meet their own needs. The Carers' Assessment looks at each carer as an individual with their own personal circumstances, and will identify any particular needs they may have as a result. It is important that the needs of individual carers are properly understood and that service providers are prepared to respond with flexibility, offering carers real choice as to how their needs will be met. The "Carers Support and Needs Assessment" component of the [Northern Ireland Single Assessment Tool \(NISAT\)](#) is used for assessing the needs of carers in all programmes of care, thus ensuring a standardised approach to assessment regardless of the location of the carer in Northern Ireland.

This bulletin presents, for the **quarter ending 31 March 2015**, statistics relating to the numbers of carers' assessments offered, completed and declined, the main reasons why carers declined offers to be assessed as well as carers' reassessments offered, completed and declined. Analyses are presented both regionally and across Health and Social Care Trusts in Northern Ireland.

Detailed definitions are available in [Appendix B](#) of this report.

3. Carers Assessments

*A **Carers Assessment** is carried out to determine the support needs of the person in commencing or sustaining their caring role; or in addressing the risks to the sustainability of that caring role; or the risks to the carer's own health and wellbeing.*

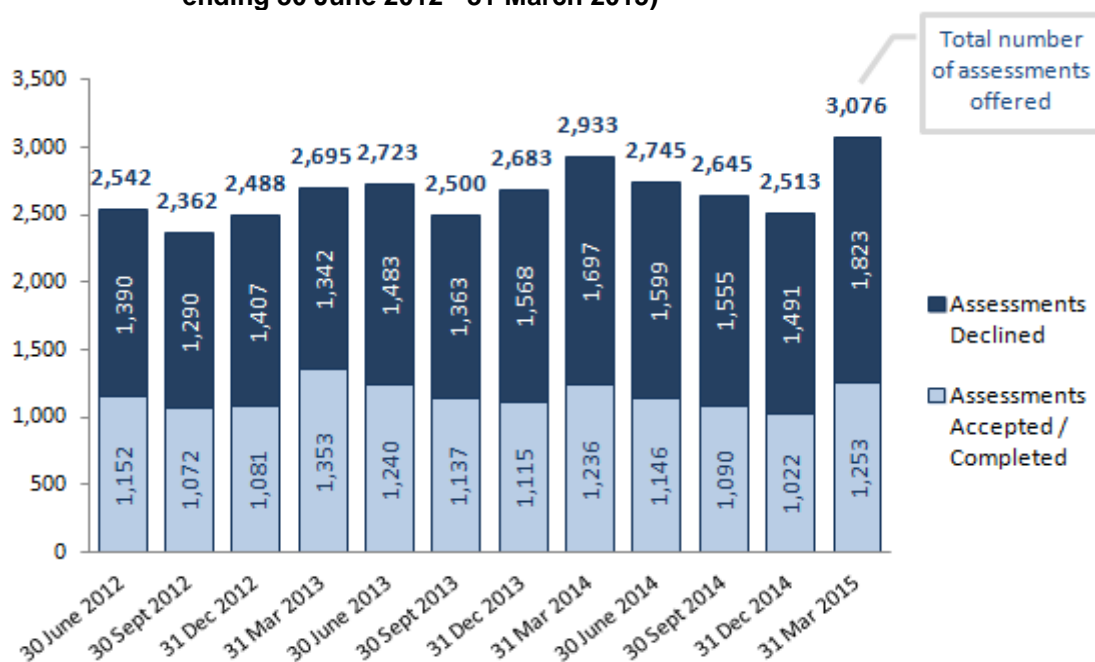

During quarter ending 31 March 2015, a carer's assessment was offered to 3,076 carers in Northern Ireland. This represented an increase of 22% (563) from the previous quarter (2,513) and an increase of 5% (143) from the same quarter last year (2,933)¹.

Of the 3,076 carers' assessments offered, 41% (1,253) were accepted / completed and 59% (1,823) were declined (Figure 1).

The 1,253 carers' assessments which were accepted / completed represented an increase of 23% (231) from the previous quarter and an increase of 1% (17) from the same quarter last year.

The 1,823 carers' assessments which were declined represented an increase of 22% (332) from the previous quarter and an increase of 7% (126) from the same quarter last year (Figure 1).

Figure 1 Carers Assessments Offered, Accepted / Completed and Declined (quarter ending 30 June 2012 - 31 March 2015)

Note: Information prior to 31 March 2015 was sourced from the CA1 and CA1b community information returns.

The number of declined carers' assessments has continually been higher than the number of completed carers' assessments with the exception of quarter ending 31 March 2013 ([Table 1](#)).

¹ All figures presented can be found in table format in [Appendix C](#) of this report and in excel format on the Department of Health and Social Care Northern Ireland website <http://www.dhsspsni.gov.uk/index/statistics/downloadable-data.htm>

Carers Assessments by HSC Trust

Of all carers' assessments offered in Northern Ireland, the Southern Health and Social Care (HSC) Trust offered the most at 762 (24%) while the Western HSC Trust offered the least at 357 (12%) ([Table 2](#)).

During quarter ending 31 March 2015, all HSC Trusts increased the number of carers' assessments offered when compared to the previous quarter. This ranged from a 70% increase in the South Eastern HSC Trust to 1% in the Belfast HSC Trust.

Figure 2 Number of Carers Assessments Offered by HSC Trust (quarter ending 31 March 2015)

Number of Carers Assessments Offered by HSC Trust				
Belfast	Northern	South Eastern	Southern	Western
649	723	585	762	357

During quarter ending 31 March 2015, each HSC Trust had more carers' assessments declined than completed. The percentage of carers' assessments declined ranged from 74% in the South Eastern HSC Trust to 53% in the Northern HSC Trust (Figure 3) ([Table 3](#)).

Figure 3 Proportion of Carers Assessments Accepted / Completed and Declined by HSC Trust (quarter ending 31 March 2015)

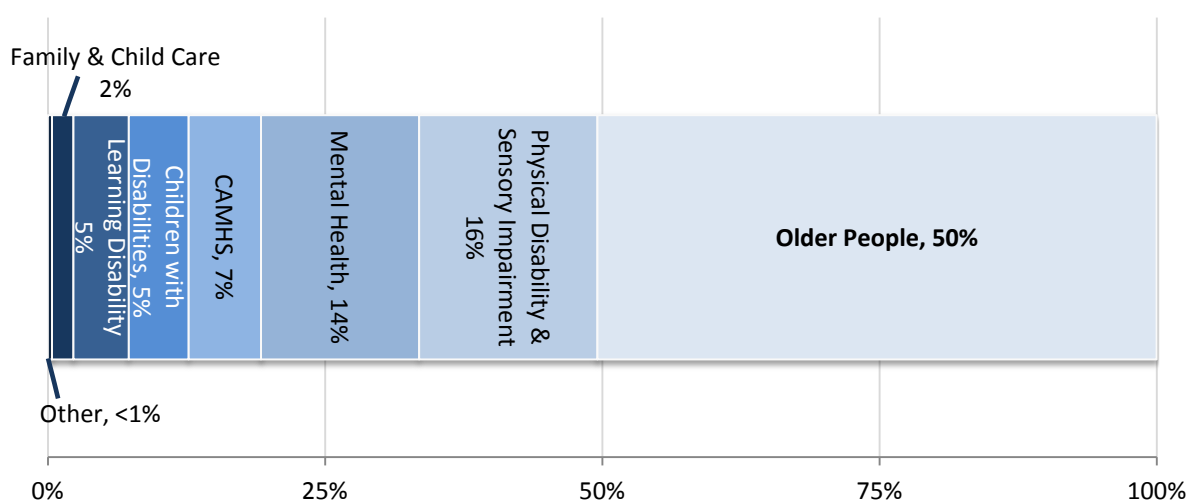

In Northern Ireland, regionally, 41% of carers' assessments offered were accepted / completed and 59% were declined.

Client Group

Regionally across Northern Ireland, the majority (50%) of carers who had been offered an assessment during quarter ending 31 March 2015 were caring for someone in the Older People client group. Carers caring for someone in the Physical Disability and Sensory Impairment client group accounted for 16% of assessment offers with 14% of those offered an assessment caring for someone in the Mental Health client group and 7% for the Child and Adolescent Mental Health Service (CAMHS) client group. The client group with the least offers of a carers' assessment was Family and Child Care (2%) (Figure 4) ([Table 4](#)).

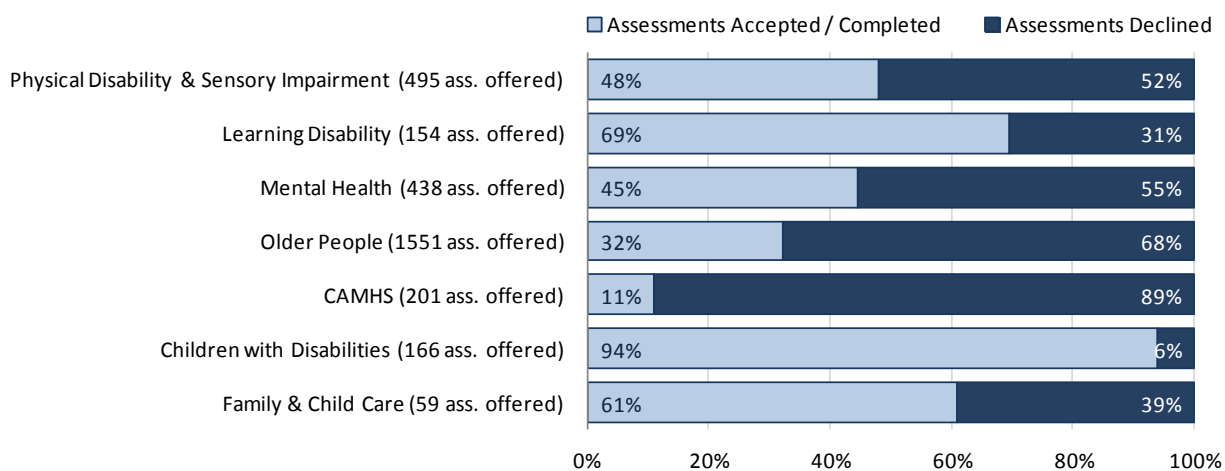

Figure 4 Proportion of Carers Assessments Offered by Client Group (of Cared for Person) (quarter ending 31 March 2015)

Across Northern Ireland, 94% of those carers caring for someone in the Children with Disabilities client group who were offered a carers' assessment accepted or completed an assessment. The other client groups who had a higher proportion of carers accepting or completing an offer of assessment than declining were those in the Learning Disability (69% accepted / completed) and Family and Child Care (61% accepted / completed) client groups.

Those carers caring for someone in the Physical Disability and Sensory Impairment (52% declined), Mental Health (55% declined), Older People (68% declined) and CAMHS (89% declined) client groups were more likely to decline an offer of assessment (Figure 5).

Figure 5 Proportion of Carers Assessments Accepted / Completed and Declined by Client group (quarter ending 31 March 2015)²

² During quarter ending 31 March 2015, carers' assessments were offered to 12 carers caring for someone in unspecified client groups. All of these offers were declined.

Reasons for Declining a Carers Assessment

Many carers will be caring for someone who is already in receipt of community care services and are supported by existing care packages that are in place. An offer of a carers' assessment is to help identify those carers who require more support and to recognise carers as an individual with needs in their own right.

During the quarter ending 31 March 2015, the most frequent reason for declining an offer of a carers' assessment was that the carer felt that the time / place / environment offered was unsuitable but would like the opportunity to consider an assessment at a later date. This was the reason stated by 26% (476) of carers; with a similar proportion, 25% (456), declining an assessment as they felt that they did not need any support / additional support.

Carers declining an offer of assessment for the reason that they felt it would be too complicated or time consuming accounted for 3% (61) of all those that were declined. This was the same proportion for those who viewed their caring duties as a private matter (59). Less than 1% (14) of those who declined an offer of assessment did so as they were concerned about the impact on their benefits / income (Figure 6) ([Table 5](#)).

26%
of carers who declined an offer of an assessment felt that the **time / place / environment offered was unsuitable but would like the opportunity to consider an assessment at a later date.**

Figure 6 Reasons given for declining a Carers Assessment (quarter ending 31 March 2015)

<i>The carer felt that time / place / environment offered was unsuitable but would like the opportunity to consider an assessment at a later date</i>	26%
<i>The carer feels that they do not need any support / additional support</i>	25%
<i>The carer would not give a reason / No reason recorded</i>	17%
<i>The carer does not see themselves as a carer and therefore does not see assessment as relevant</i>	17%
<i>The carer feels that an assessment would not result in additional support / service</i>	8%
<i>The carer feels that assessment would be too complicated or time consuming</i>	3%
<i>The carer sees their caring duties as a private matter which they prefer not to discuss</i>	3%
<i>The carer was concerned about the impact on their benefits / income</i>	1%

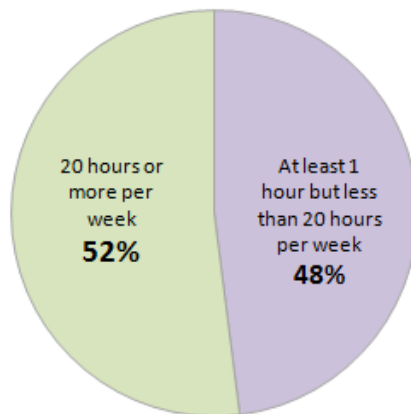

Northern Ireland Health Survey 2013/14

The 2013/14 Health Survey Northern Ireland includes information on general health, mental health and wellbeing, diet and nutrition, physical activity and lifestyle choices. The fieldwork for this survey was conducted from April 2013 to March 2014. Results are based on responses of 4,509 individuals, with a response rate of 66% achieved. In this survey, a carer was defined as someone, over the age of 16, who provided help to a sick, disabled or elderly person for at least one hour every week.

7%

of Carers had experienced musculoskeletal injuries as a result of caring for someone.

Number of hours a week a carer spends caring for someone

Of the carers, the proportion who spent at least 1 hour but less than 20 hours per week caring for someone was roughly the same as the proportion who spent 20 hours or more per week caring for someone.

Physical activity levels per week

For carers over the age of 18, more than half responded that they spent more than 150 minutes per week undertaking physical activity. Nearly one quarter responded that they spent less than 30 minutes per week undertaking physical activity.

<http://www.dhsspsni.gov.uk/hsni-first-results-13-14.pdf>

4. Carers Reassessments

A **Carers Reassessment** is required when a carer's circumstances change resulting in a change in their level of need. For example, this could be additional family commitments, changes in their work pattern, or varying physical or mental health. The Reassessment can be either a complete rework of the original Carers Assessment or an amendment to aspects of it.

During the quarter ending 31 March 2015, 508 carers' reassessments were offered to carers in Northern Ireland. This represented an increase of 37% (137) from the previous quarter (371) and an increase of 32% (124) from the same quarter last year (384)³.

Figure 7 presents information on carers' reassessments since quarter ending 30 June 2012. Although the quarterly numbers of reassessments have been quite variable the last six quarters, Figure 7 clearly shows an increase in reassessments offered since 2012.

Of the 508 carers' reassessments offered in the latest quarter, 67% (341) were completed and 33% (167) were declined (Figure 7) ([Table 6](#)).

The 341 carers' reassessments which were completed represented an increase of 56% (123) from the previous quarter (218) and an increase of 56% (122) from the same quarter last year (219).

Figure 7 Carers Reassessments Offered, Accepted / Completed and Declined (quarters ending 30 June 2012 - 31 March 2015)

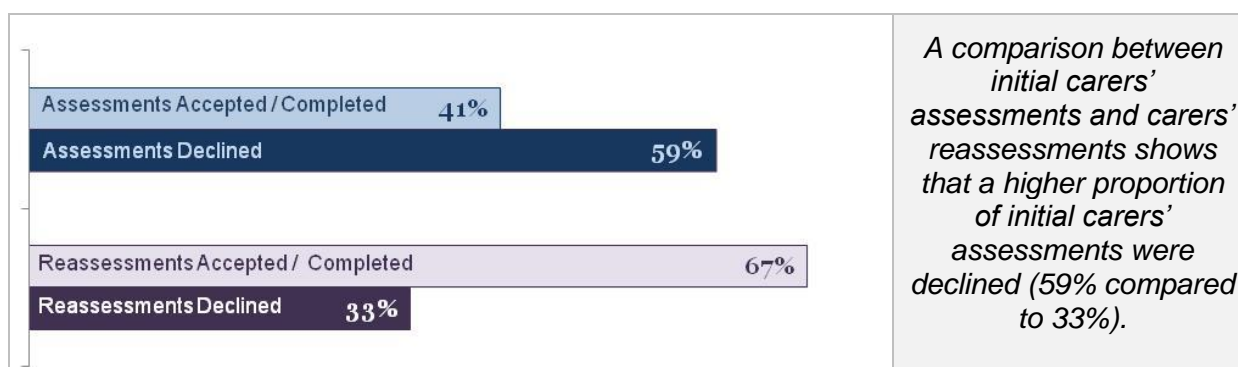

Note: Information prior to 31 March 2015 was sourced from the CA1 and CA1b community information returns.

The 167 carers' reassessments which were declined represented an increase of 9% (14) on the previous quarter (153) but were similar to the number from the same quarter last year (165).

³ All figures presented can be found in table format in [Appendix C](#) of this report and in excel format on the Department of Health and Social Care Northern Ireland website <http://www.dhsspsni.gov.uk/index/statistics/downloadable-data.htm>

Figure 8 Proportion of Carers Assessments and Carers Reassessments Accepted / Completed and Declined (quarter ending 31 December 2014)

Carers Reassessments by HSC Trust

Of all carers' reassessments offered in Northern Ireland, the Northern HSC Trust offered the most (55%) while the Western HSC Trust offered the least (5%) (Figure 9).

The Northern HSC Trust had the highest number of completed carers' reassessments (229) while the Western HSC Trust had the fewest (13). The Belfast HSC Trust had the highest number of declined carers' reassessments (74) while the Southern HSC Trust had the fewest (7) ([Table 7](#)).

Figure 9 Number of Carers Reassessments Offered by HSC Trust (quarter ending 31 March 2015)

Number of Carers Reassessments Offered by HSC Trust				
Belfast	Northern	South Eastern	Southern	Western
132	278	40	32	26

During quarter ending 31 March 2015, the Northern and Southern HSC Trusts had more carers' reassessments accepted / completed than declined (82% and 78% accepted / completed respectively). The Western HSC Trust had the same amount accepted / completed as the declined whereas the Belfast and South Eastern HSC Trusts had more declined than accepted / completed (56% and 60% declined respectively). It is worth noting however that reassessment figures may be relatively small and may therefore be somewhat volatile (Figure 10).

Figure 10 Proportion of Carers Reassessments Completed and Declined by HSC Trust (quarter ending 31 December 2014)

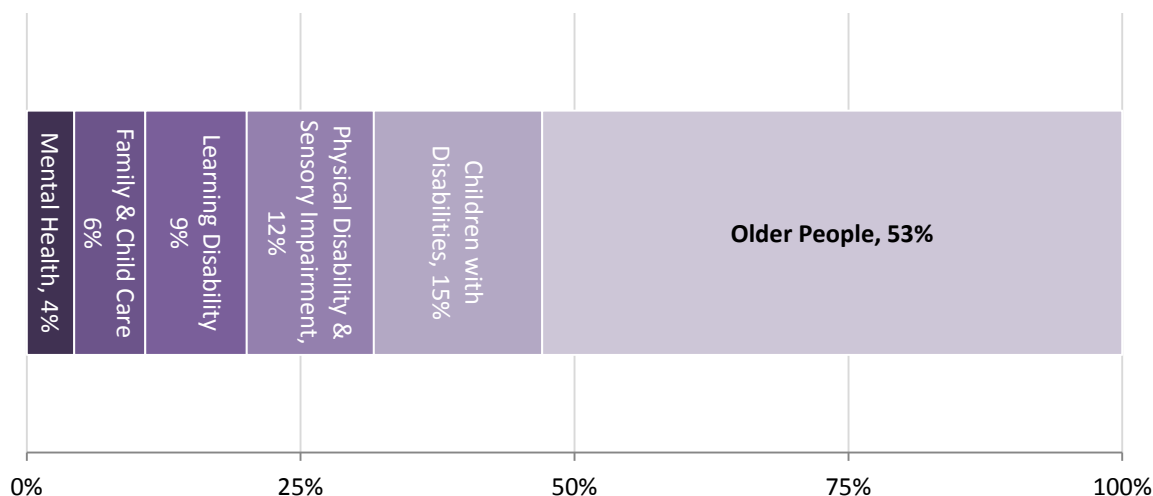

In Northern Ireland regionally, 67% of the offered carers reassessments were accepted / completed and 33% of offers were declined.

Client Group

As was the case with offers of an initial carers' assessment, regionally across Northern Ireland during the quarter ending 31 March 2015, the majority (53%) of carers who are offered a carers' reassessment are caring for someone in the Older People client group. Carers caring for someone in the Children with Disabilities client group accounted for 15% of reassessment offers with 12% of those offered a reassessment caring for someone in the Physical Disability and Sensory Impairment client group (Figure 11) ([Table 7](#)).

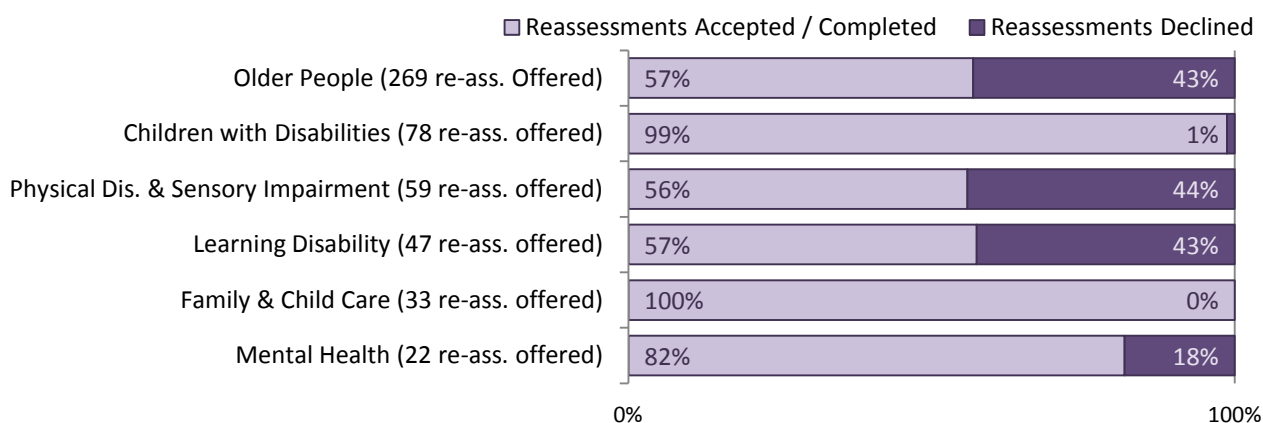

The least offers of a carers' reassessment were made to those carers who care for someone in the Family and Child Care (5%) and Mental Health (4%) client groups. No offers of a carers' reassessment were made to carers caring for someone in the CAMHS client group (Figure 11).

Figure 11 Proportion of Carers Reassessments Offered by Client Group (of Cared for Person) (quarter ending 31 March 2015)

Across Northern Ireland, all carers caring for someone in the Family and Child Care client group who were offered a carers' reassessment accepted / completed a reassessment. For those carers caring for someone in the Children with Disabilities client group, 99% of offers of a carers' reassessment were accepted / completed; in fact, carers caring for someone in each client group were more likely to accept / complete a carers' reassessment (Figure 12) ([Table 8](#)).

Figure 12 Proportion of Carers Reassessments Accepted / Completed and Declined by Client Group (quarter ending 31 March 2015)

Note: The analysis of client groups related to reassessments may be based on low numbers which can add to the volatility of the figures.

Reasons for Declining a Carers Reassessment

During the quarter ending 31 March 2015, the most frequent reason for declining an offer of a reassessment has been that the carer felt that they did not need any additional support (44%). This was followed by 19% of carers declining an offer of a reassessment as they felt that the time / place / environment offered was unsuitable but would like the opportunity to consider a reassessment at a later date (Figure 13).

44%
of carers who declined
an offer of a
reassessment felt that
they
**did not need any
additional support.**

The least frequent reason for declining a carers' reassessment during the quarter ending 31 March 2015 was that the carer felt that previous assessments or reassessments had not been beneficial (1%) ([Table 10](#)).

Figure 13 Reasons Given for Declining a Carers Reassessment (quarter ending 31 March 2015)

<i>The carer feels that they do not need any additional support</i>	44%
<i>The carer felt that time / place / environment offered was unsuitable but would like the opportunity to consider a reassessment at a later date</i>	19%
<i>The carer feels that the reassessment would not result in additional support</i>	17%
<i>The carer would not give a reason / No reason recorded</i>	11%
<i>The carer sees their caring duties as a private matter which they prefer not to discuss</i>	4%
<i>The carer found previous assessments / reassessments too time consuming</i>	3%
<i>The carer did not feel previous assessments / reassessments had been beneficial</i>	1%

Appendix A: Technical Notes

Carers assessment publication

This statistical bulletin was first published 10 February 2012 under the name “Carers’ Statistics for Northern Ireland (quarter ending 30 June 2011)”. The name of the bulletin has since changed to “Quarterly Carers’ Statistics for Northern Ireland”.

Data Collection

From quarter ending 31 March 2015, the CA1 and CA1b community information returns covering data on carers assessments were discontinued and replaced with a new Adult Carers Assessment return. The new return has revised and combined information needs from both DHSSPS and HSCB. This streamlining of information collection has caused some information published not to be directly comparable to outputs in previous quarters.

The new Adult Carers Assessment return template is detailed in Appendix D and is also available with associated guidance notes on the DHSSPS [website](#). The CA1 and CA1b information return templates can also be found on the website and are available on request from CIB.

The changes to the data collection are set out below:

- Figures on carer’s reviews are no longer collected.
- Figures are now collected by client group compared to the previous programmes of care (client group separates out children with disability as well as child and adolescent mental health services).
- All figures collected are available by client group (previous figures on programme of care were available for completed carers’ assessments only).
- There have been amendments to the definitions for those reasons provided for declining a carer’s assessment or reassessment.
- The age group of the carer is no longer collected. This information is however collected annually by the HSCB through the Delegated Statutory Functions returns.

All information referring to quarter ending 31 March 2015 use the new carers return as source, whereas quarters prior to this derive from the quarterly CA1 and CA1b community information returns.

Data Quality

The Adult Carers Assessment returns are validated and quality assured by HSC Trusts senior management before being submitted to the HSC Board. Further validations and consistency checks are carried out by the HSCB before being shared with statisticians in CIB.

Statisticians will use historical and/or other independent data to monitor emerging trends and variations within and between Trusts in order to query any discrepancies.

Statement of Administrative Sources

A detailed 'Statement of Administrative Sources' is available on the DHSSPS [website](#).

Rounding Conventions

Percentages have been rounded to whole numbers and as a consequence some percentages may not sum to 100.

Disclosure Conventions

The information presented in this publication has been assessed for the risk of disclosure. To prevent disclosure of the identity of individual carers, it may be necessary to suppress the values of cells with low counts and those which could otherwise be derived by means of simple arithmetic.

In some instances low counts will not be suppressed as the risk of sensitive personal data being disclosed is considered low against the benefit of such figures being available. Further detail can be found in the Government Statistical Service's (GSS) guidance on [disclosure control](#) for tables produced from administrative sources and the [Anonymisation Standard for Publishing Health and Social Care Data](#).

Our policy statement on confidentiality and security is contained within the DHSSPS Statistics Charter and is available on our [website](#).

Revisions Policy

These data are revised by exception. If revisions are required, background circumstances are reported and revision dates are noted in subsequent publications of these series of statistics.

Our policy statement on revisions and errors is contained within the DHSSPS Statistics Charter and is available on our [website](#).

Appendix B: Definitions

Carers and Direct Payments (Northern Ireland) Act 2002

The [Carers and Direct Payments Act \(Northern Ireland\) 2002](#) came into effect on 2 May 2002. This Act gives carers the right to a separate assessment of their needs and places an obligation on HSC Trusts to identify and provide information to carers. All carers providing or intending to provide care on a regular and substantial basis therefore have a legal right to have their needs assessed. The results of a carer's assessment should be recorded separately from that of the person cared for.

A Carer

A carer is someone who provides or intends to provide a **substantial** amount of care on a regular basis. The term 'carer' includes a person who may or may not be a relative and who may or may not be living with the person for whom they are caring. A carer provides help and support to someone, such as a family member, friend or neighbour, who may not be able to manage at home without this help because of frailty, illness or disability. A carer can be an adult caring for another adult, parents caring for ill or disabled children or young people of 16 or 17 years of age who care for someone.

It does not include someone who is providing care by virtue of a contract of employment, a volunteer working on behalf of a voluntary organisation, a foster carer or anyone who is providing personal assistance for payment either in cash or kind.

Substantial Care

The term 'substantial' is not defined in the [Carers and Direct Payments Act \(Northern Ireland\) 2002](#) but is left to professional judgement. It should not be based simply on the number of hours spent caring, but also take into consideration the impact of the caring role on the carers own health and well-being, key factors relating to the sustainability of the role and the extent of risk to the sustainability of the role.

Carers Assessment

Carers have a right to an assessment of their needs even when the person cared for has refused an assessment for community care services, or the provision of services, provided the person cared for would be eligible for community based services.

A carer's assessment is the process of gathering data for the purpose of determining a carer's needs and eligibility for services to sustain their caring role. All services offered to a carer should be the outcome of an assessment of need. The assessment must be formally documented, placed on file and a copy given to the carer. The "Carers Support and Needs Assessment" component of the [Northern Ireland Single Assessment Tool \(NISAT\)](#) for assessing the health and social care needs of older people is the "tool of choice" for use in assessing the needs of carers in all programmes of care, thus ensuring a standardised approach to assessment regardless of where they live in Northern Ireland. This component was issued to Trusts in June 2009 along with associated guidance.

The assessment focuses on the needs of the carer and the purpose of the assessment is to:

- give the carer an opportunity to talk about their caring role;
- determine the support needs of the carer;
- determine whether the carer is eligible for support; and
- determine if the needs identified can be met by the Trust or other services and to make an appropriate referral.

The focus of the assessment is on the carer's ability to care and the support they need to continue in their caring role. The assessment takes account of the carer's circumstances, age, views and preferences, available support, family and other commitments. The assessment is not a test for the carer but is about recognising, valuing and supporting the carer. The process can be important in itself even where service provision does not flow from the assessment. The decision about services to be provided should be informed by the assessments of both the carer and the person being cared for.

Carers Reassessment

A reassessment is required when/if the carer's circumstances change and hence the level of support required to enable the carer to continue caring. Changed circumstances could become known to the professional:

- through a planned event such as a review of existing support plan
- unplanned changes in carer's personal circumstances e.g. physical or mental health, additional other family commitments, changes in work pattern etc.
- a crisis which impacts on the health or wellbeing of the person cared for.

Carers Assessments / Reassessments Offered

The number of carers' assessments / reassessments offered is the total of those accepted / completed plus those declined (see definitions below).

Carers Assessments Accepted / Completed

This refers to all assessments completed during the quarter, which were focused on a carer's need for support to sustain their caring role, whether they took place on the same day as the assessment of the person cared for or were conducted on a separate date.

Carers Reassessments Accepted / Completed

This refers to all reassessments completed during the quarter in response to the changing need of the carer.

Carers Declining a Carers Assessment / Reassessment

This refers to all assessments / reassessments that were offered to carers by HSC trust staff, and the offer was declined during the quarter, for whatever reason. If a carer declined an assessment / reassessment more than once during the quarter, they should only be counted once.

Client Group

Client group refers to that of the cared for person.

Family and Child Care

This group is mainly concerned with activity and resources relating to the provision of social services support for families and/or children.

Children with Disabilities

This group is mainly concerned with children and young people who have a physical, sensory or learning disability or prolonged illness or condition which, in interaction with various barriers, and without the provision of adequate support services, may hinder their full and effective participation in society on an equal basis with others and hinder their optimal potential for personal development and social inclusion.

Child and Adolescent Mental Health Service (CAMHS)

This group is mainly concerned with children and young people where the primary reason for contact was due to mental health.

Older People

This programme includes all community contacts with those aged 65 or over except where the reason for contact was mental illness or learning disability. All community contacts where the reason for the contact was dementia are included regardless of age, as well as all work relating to homes for the elderly, including those for the Elderly Mentally Infirm

Mental Health

This programme includes all community contact where the primary reason for contact was due to mental health.

Learning Disability

This programme includes all community contacts where the primary reason for contact was due to learning disability. All community contacts with Down's Syndrome patients who develop dementia, for any dementia related care or treatment are included as are all contacts in learning disability homes and units.

Physical Disability and Sensory Impairment

This programme includes all community contacts by any health professional where the primary reason for the contact is physical and/or sensory disability. All patients and clients aged 65 and over are excluded and allocated to the Elderly Care Programme.

Other

Any carer caring for someone who does not fall under one of the outlined client groups should be included in this group.

Adult Carers Assessment return

This return records the number of carers for whom a carer's assessment or reassessment has been accepted / completed, the number of carers declining a carer's assessment or reassessment and the main reason given by the carer for declining a carer's assessment or reassessment during the quarter. These figures are available by the client group of the person for whom the carer is caring for.

Reasons for declining an offer of a Carers Assessment

- A1** - The carer sees their caring duties as a private matter which they prefer not to discuss.
- A2** - The carer does not see themselves as a carer and therefore does not see assessment as relevant.
- A3** - The carer felt that time/ place/ environment offered was unsuitable but would like the opportunity to consider an assessment at a later date.
- A4** - The carer feels that they do not need any support/ additional support.
- A5** - The carer feels that an assessment would not result in additional support/ service.
- A6** - The carer was concerned about the impact on their benefits/ income.
- A7** - The carer feels that assessment would be too complicated or time consuming.
- A8** - The carer would not give a reason/ No reason recorded.

Reasons for declining an offer of a Carers Reassessment

- R1** - The carer sees their caring duties as a private matter which they prefer not to discuss.
- R2** - The carer did not feel previous assessments/ re-assessments had been beneficial.
- R3** - The carer felt that time/ place/ environment offered was unsuitable but would like the opportunity to consider a re-assessment at a later date.
- R4** - The carer feels that they do not need any additional support.
- R5** - The carer feels that the re-assessment would not result in additional support.
- R6** - The carer found previous assessments/ re-assessments too time consuming.
- R7** - The carer would not give a reason/ No reason recorded.

The Adult Carers Assessment return template is detailed in Appendix D and is also available with associated guidance notes on the [DHSSPS website](#).
