Section 1

Introduction

Section 1 - Introduction

Quality Health managed the regional Staff Survey for Health and Social Care Northern Ireland between October 2015 and December 2015.

1. Survey Methodology and Sampling

A total of 15 organisations across HSCNI participated in the survey, using either an all online or mixed mode approach.

The five Health and Social Care Trusts and the Northern Ireland Ambulance Trust opted for a mixed mode approach. The purpose of doing this was to ensure that all staff had a mechanism to engage in the survey, particularly staff working in remote locations with no internet access and staff who do not access IT equipment regularly or at all as part of their role. Approximately 60% of staff in these organisations were invited to participate online. The remaining 40% were invited to participate via a hard copy of the e-mail invitation, directing them to the online questionnaire (Belfast only); or were provided with a full paper copy of the questionnaire to complete, which included the option to complete the survey online, if preferred. These paper invitations were sent either directly to staff at their home address or directly to the Trust for internal distribution through the internal post. Western Trust and Southern Trust were the only trusts to use internal distribution (Western Trust using only internal distribution and Southern Trust using a hybrid).

A number of reminders were sent to non-responders at timed intervals: a total of three reminders were sent via e-mail for the online contingent, each containing details of how to access the questionnaire; and for the paper contingent, two reminders were sent - a first reminder letter, and a final reminder which included a further copy of the questionnaire. Western and Southern Trust opted for the latter for their paper contingent, due to time constraints and had the final reminder mailing only.

All organisations surveyed a full census of staff, with sample sizes ranging from 19 to 22,567. The overall number of staff surveyed in HSCNI was 70,213. 17,796 completed questionnaires were returned from this sample. Response rates for the survey are detailed at page 12 of this report.

2. Reporting Methodology and Non-specific Responses

In common with the approach adopted by the Care Quality Commission and used for NHS England surveys, for all questions other than demographic questions, Quality Health has classified certain response options as "non-specific". Non-specific responses are not included in the base numbers used to obtain percentage scores.

Non-specific responses are those which indicate that either the question did not apply to the respondent, such as "Not applicable to me", or that the respondent was unable to give an answer to the question, such as "Can't remember" or "Too early to tell" or "Don't know".

The rationale for doing this is that excluding non-specific responses from these calculations makes it easier to make comparisons between results for different organisations, as we are presenting only the results from those respondents who felt able to give an evaluative response to questions.

This methodology has been applied to ALL the data presented in this report - HSCNI 2012 results, HSCNI 2015 results and NHS England 2014 results. This means that, for those HSCNI 2012 questions that are comparable to HSCNI 2015 and contain non-specific response options, the score presented herein for the HSCNI 2012 question will differ from that published in 2012.

Section 1 - Introduction

3. Organisational Context

It is important when considering the results presented within this report to recognise that the survey covers fifteen organisations, of different sizes and with different functions. Only six of these (the five Health and Social Care Trusts, and the Ambulance Service) have responsibility for the provision of direct patient care, varying in size from 1,104 to 22,321 staff. Some organisations have no responsibility for the provision of direct patient care, and this should be taken into account when considering the results of those questions in the survey that focus on this area, where a lower score would be expected from these organisations.

Section 2

Executive Summary and Recommendations

Section 2 - Executive Summary and Recommendations

Performance and analysis over time

Overall

Overall, staff in Northern Ireland are generally positive about their jobs, with improvements over time, and positive comparisons to scores on equivalent questions in England.

61% of staff in Northern Ireland say that they would recommend their organisation as a place to work (Q29j; an improvement from 56% in 2012; and better than the equivalent 54% in England). 67% of staff say that if a friend or relative needed treatment they would be happy with the standard of care provided by their organisation (Q29i), although there is a big gap between the top performing organisation at over 80% and the lowest at under 40% (although this score wasn't from any of the six organisations with responsibility for the provision of direct patient care). 73% of staff say that care of patients is their organisation's top priority (Q29h; an improvement from 59% in 2012; and better than the equivalent 66% in England).

71% of staff in Northern Ireland say that they are enthusiastic about their job (Q28b).

89% of staff in Northern Ireland say that they feel their role makes a difference (Q16b). 88% of staff say that they are satisfied with the quality of care they give (Q16a). 79% of staff say that they are able to do their job to a standard they are personally pleased with (Q15b); this has increased significantly from the 65% reported in 2012.

Amongst the highest scoring individual questions, 1% of staff say that they experienced physical violence from their manager (although this is still concerning); 99% say that they have access to occupational health services; and 1% say that they have felt injured or unwell as a result of exposure to dangerous substances at work. Amongst the lowest scoring individual questions, only 32% of staff say that their organisation takes effective action if discrimination is reported; only 30% say that communication between senior management and staff is effective; and 70% say they worked additional hours to meet deadlines.

Overall staff engagement can be calculated using a series of 'Key Findings' covering different aspects of the survey, and is measured on a scale of 1 to 5. The average score in Northern Ireland is 3.72, with a range between organisations from 3.06 to 4.02. These have also been broken down by personnel area, with a closer range from 3.02 to 3.87. The equivalent score in England is 3.69. Detail of how overall staff engagement and Key Findings have been calculated can be found at pages 24 and 30 of this report.

Your personal development

There are some significant differences between organisations on many of the personal development questions, and in most areas Northern Ireland does score better than the equivalent scores in England.

67% of staff in Northern Ireland say that they received effective induction on commencement (Q1a), and 52% on change of role (Q1b), but there is a significant range of scores between organisations: under 25% to over 80% on the former; 0% to over 60% on the latter.

Section 2 - Executive Summary and Recommendations

Your personal development (continued)

65% of staff in Northern Ireland say they had an appraisal (Q4a), an improvement from 52% in 2012, although this is still significantly below the equivalent 84% in England. Where these took place, 58% of staff say that they helped them improve how they did their job (Q4b); 78% say they agreed clear objectives for their work (Q4c); and 62% say it left them feeling valued (Q4d). 79% of staff say they agreed a Personal Development Plan (Q5a), a significant improvement from 46% in 2012; and 75% of staff say these plans have been actioned (Q5b).

Your job

Scores to questions about their jobs are generally good and improving, although a significant proportion of staff still report that they are working additional hours because of insufficient resources.

67% of staff in Northern Ireland say that they work over their contracted hours (Q6b), fewer than the 73% who reported this in 2012. However, 51% of staff say that this is acceptable (Q8). The commonest reasons for working additional hours (Q7a to Q7i) are: because they want to provide the best care they can (82%); because they don't want to let their colleagues down (75%); to meet deadlines; and/or because it's impossible to do the job otherwise (63%). 44% of staff say that they can meet the conflicting demands of their work (Q10c), although this has improved from 32% in 2012, and is significantly better than the equivalent 28% in England. 35% of staff say that there are enough staff in their team/area/department to do the job properly (Q10e); this is significantly better than the equivalent 29% in England. 34% of staff say that they have time to carry out all of their work (Q10f), an improvement from 28% in 2012.

Fewer staff than in 2012 (81% compared to 89%) say that their team communicates closely to achieve objectives (Q9e).

Significantly more staff than in 2012 (92% compared to 79%) say that they know what is expected of them at work (Q10a), and this is now significantly better than the equivalent 84% in England, a very high score overall.

Significantly more staff than in 2012 (50% compared to 41%) say that they are involved in decisions that affect their work (Q10b).

61% of staff say that they have adequate materials, supplies and equipment to do their work (Q10d), although this is significantly better than the equivalent 55% in England.

Flexible working / work-life balance

39% of staff who responded to the survey say that their organisation is committed to helping them achieve a balance between work and home life (Q18a). 58% of staff say that they can approach their immediate manager to talk about flexible working (Q18c). However, 45% say that their manager is able to help them in this (Q18b; a drop from 53% in 2012).

Section 2 - Executive Summary and Recommendations

Your managers

Staff views of their managers are mixed, with some significant movements – in both directions – over time.

There have been some significant improvements since 2012. 55% of staff in Northern Ireland now say that their immediate manager asks their opinion before making decisions that affect their work (Q19c; an improvement from 51% in 2012). 29% of staff say that senior managers try to involve them in important decisions (Q20a; an improvement from 25% in 2012). 38% of staff say that senior managers act on staff feedback (Q11f; an improvement from 29% in 2012), significantly better than the equivalent 28% in England.

In other cases, particularly around senior management, the scores have dropped. 52% of staff in Northern Ireland now say that senior management build strong, positive relationships with the community (Q21b; a drop from 60% in 2012). 63% of staff say that senior management build strong, co-operative links with other organisations (Q21c; a drop from 70% in 2012). 54% of staff say that senior management set out a clear vision of where their organisation is headed (Q21a; a drop from 61% in 2012), and there is a big gap between the top performing organisation at 80% and the lowest at just over 30%.

83% staff in Northern Ireland say that they know who the senior managers are in their organisation (Q29g). However, only 30% of staff say that communication between senior managers and staff is effective (Q20b; lower than the equivalent 36% in England).

Your organisation

74% of staff in Northern Ireland say that feedback from patients, clients and service users is collected (Q23a), although this is lower than the equivalent 89% in England. Where it is, 61% of staff say that they are given regular updates on it (Q23b). 66% of staff say that this feedback is used to make decisions (Q23c), which is significantly better than the equivalent 54% in England.

88% of staff in Northern Ireland say that they are aware of their organisation's policy and process for raising concerns about negligence and wrongdoing (Q24a); and 81% of staff say that they are aware of their organisation's whistle-blowing process (Q24d). 80% of staff say that they would be confident to speak up and raise concerns if they had cause to (Q24b); and 65% say that they are confident their organisation would appropriately handle the investigation that resulted (Q24c).

772 staff in Northern Ireland (5%) say that they had personally experienced discrimination from patients, their relatives or other members of the public (Q25c). 1,299 staff (8%) say that they had personally experienced discrimination from their manager, team leader or other colleagues (Q25d). The biggest proportions of these (Q25e) are to do with religion (22%), gender (18%), age (15%) and ethnic background (13%). 28% of staff said that they reported any discrimination experienced (Q25f); and 32% say that their organisation took effective action as a result.

Section 2 - Executive Summary and Recommendations

Communication and engagement

Scores on communication and engagement are generally improving, and compare well to the equivalent questions in England, but there is still considerable scope for improvement on many questions.

45% of staff in Northern Ireland say that their organisation communicates effectively with staff about what it is trying to achieve (Q26a); this is a significant improvement from 39% in 2012. 43% of staff say that different parts of their organisation communicate effectively with each other (Q26b); this is a significant improvement from 23% in 2012.

57% of staff in Northern Ireland say that they look forward to going to work (Q28a; better than the equivalent 51% in England). 80% of staff say that time passes quickly while they are working (Q28c; better than the equivalent 74% in England). 66% of staff say that there are frequent opportunities to show initiative in their role (Q29b; an improvement from 58% in 2012).

61% of staff in Northern Ireland say that they would recommend their organisation as a place to work (Q29j; an improvement from 56% in 2012; and better than the equivalent 54% in England). 67% of staff say that if a friend or relative needed treatment they would be happy with the standard of care provided by their organisation (Q29i), although there is a big gap between the top performing organisation at over 80% and the lowest at under 40% (although this score wasn't from any of the six organisations with responsibility for the provision of direct patient care). 73% of staff say that care of patients is their organisation's top priority (Q29h; an improvement from 59% in 2012; and better than the equivalent 66% in England).

Health, safety and well-being at work

Policies around providing general health and well-being advice to staff appear to be achieving excellent results. However, there are some concerning scores around some aspects of health, safety and well-being at work – particularly around the number, and reporting, of certain types of incidents.

2,366 staff in Northern Ireland (14%) say that they had experienced physical violence from patients, their relatives or other members of the public (Q30a). 92 staff say that they had experienced physical violence from their manager (Q30b). 231 staff say that they had experienced physical violence from other colleagues (Q30c). 77% of staff say that they had reported such violence (Q30d). Where it was reported, there were significant differences between organisations in whether staff say that effective action was taken as a result: for physical violence from patients (Q32a), their relatives or other members of the public, this ranged from under 30% to over 70%; for physical violence from other staff (Q32b), it ranged from under 25% to nearly 70%.

4,163 staff in Northern Ireland (25% of respondents) say that they had experienced harassment, bullying or abuse from patients, their relatives or other members of the public (Q31a). 2,073 staff (12%) say that they had experienced harassment, bullying or abuse from their manager (Q31b). 2,600 staff (16%) say that they had experienced harassment, bullying or abuse from other colleagues (Q31c). 54% of staff say that they had reported this (Q31d), better than the equivalent score of 51% in England, and there were significant differences between organisations (from under 30% to 80%). Where it was reported, there were significant differences between organisations in whether staff say that effective action was taken as a result: for harassment, bullying or abuse from patients (Q32c), their relatives or other members of the public, this ranged from under 25% to over 60%; for harassment, bullying or abuse from other staff (Q32d), it ranged from under 25% to 60%.

Section 2 - Executive Summary and Recommendations

Health, safety and well-being at work (continued)

A significant proportion of staff in Northern Ireland (36%) say that they were injured or felt unwell as a result of work-related stress (Q33e).

There has been a focus on implementing policies and practices on general physical and mental health and well-being, and clear improvements can be seen. 89% of staff in Northern Ireland say that their organisation provides advice on mental health and well-being (Q35a). 67% of staff say that their organisation provides advice on diet (Q35b; an improvement from 42% in 2012). 73% of staff say that their organisation provides advice on alcohol consumption (Q35c; an improvement from 51% in 2012). 78% of staff say that their organisation provides advice on exercise (Q35d; an improvement from 57% in 2012). 91% of staff say that their organisation provides help to stop smoking (Q35e; an improvement from 79% in 2012). 91% of staff say that their organisation provides access to the cycle to work scheme (Q35f; an improvement from 82% in 2012). 67% of staff say that their organisation provides healthy good in the canteen (Q35g; an improvement from 62% in 2012, although there are wide variations between the top – over 70% - and bottom – 20% - organisations).

91% of staff in Northern Ireland say that they know how to report errors, near misses and incidents (Q37a), and 95% of staff say that they or a colleague did report these when they happened (Q37d). 45% of staff say that their organisation would treat staff involved fairly (Q39a); 55% of staff say that their organisation informs staff about incidents that happen (Q39f); and 52% of staff say that their organisation feeds back to staff what has been done in response. There are some big differences between organisations on these questions.

82% of staff in Northern Ireland say that their organisation does enough to promote the importance of hand hygiene to staff (Q40a), and 72% of staff say their organisation does enough to promote this to patients and other visitors (Q40b). However, there are significant differences between the best and worst performing organisations: just over 30% to 90% on the former, and under 30% to over 80% on the latter. Four of the five Health and Social Care Trusts score over 80% on promoting the importance of hand hygiene to staff.

Section 2 - Executive Summary and Recommendations

Recommendations and action points

The recommendations and action points are provided based on the overall scores across the whole of Northern Ireland. However, it is important to acknowledge that a range of different types and sizes of organisations participated in this survey – ranging from large Health and Social Care Trusts with over 10,000 and 20,000 employees responsible for delivering front line patient and client care, to smaller organisations many of which do not provide direct care to patients and clients with employee numbers ranging 19 to 1,293. Direct comparisons cannot always be made and organisations will need to interpret the recommendations based on their own results, the service they provide and the composition of their workforce.

1. Communication and engagement with staff is critical, and underpins good performance in every other area of the survey. Build on the Engagement Strategy that is already in place to ensure that it remains a key priority for each organisation
2. Share the results of this survey widely with staff, as part of this Engagement Strategy. Publicise results, and work with staff groups to understand more about areas with lower scores. Develop mechanisms for staff to feed into action planning for improvement as a result
3. Share good practice in engagement and communications between organisations. Identify which have the better scores for staff engagement, and learn from successful initiatives that have been put in place
4. Ensure all staff have effective inductions when they join an organisation, and when they change jobs
5. Continue the improvement in the coverage of appraisals – a significant number of staff still say that they do not have one. Where they take place, ensure that clear objectives are agreed for work and for personal development. Continue the improvement in agreeing Personal Development Plans, and ensure that these are followed up and actioned
6. Significant numbers of staff report working additional hours. Consider whether resources are deployed in the most appropriate places. Drill down into the data for each organisation to identify the hotspots of particular concern
7. Investigate the areas where staff say there are not enough materials to carry out their jobs, and action as appropriate
8. Consider approaches and review strategies to improve work life balance. Ensure that managers understand what they can and cannot offer to staff as part of this, and why this appears to have dropped since 2012
9. Review approaches in lower performing organisations for senior managers to communicate with staff – particularly around the vision and priorities of the organisation
10. Where possible, involve staff in decision-making that affects their roles

Section 2 - Executive Summary and Recommendations

11. Review strategies and mechanisms for obtaining feedback on patient experience and patient outcomes. Where this is collected, share it with staff. Use this feedback to inform change and improvement, and ensure that staff are aware that this has been done
12. Within each organisation, review the approach to communicating whistleblowing policies, and other processes for staff to raise concerns. Ensure that all staff know that these are in place, and how to use them. Reassure staff they will be afforded appropriate protection and that the organisation will take them seriously and take action where necessary
13. Consider internal communications more generally – particularly around how different parts of each organisation communicate with each other
14. Ensure that senior and middle managers recognise that positive staff engagement requires that communication is a two-way process. Develop appropriate strategies for obtaining staff views and feedback. Ensure that this is properly considered and acted on, and that feedback is given to staff on the resulting actions
15. Ensure the continued visibility of senior managers in each organisation, and that they are personally involved in developing and delivering key communications
16. Consider further strategies for involving staff in key decisions in each organisation. Act on staff feedback, and ensure that actions taken are widely communicated back to staff
17. Where there are hotspots of reported discrimination in organisations, drill down into the results to understand where this is happening, and on what basis and consider action as appropriate. Encourage staff to report all incidents of discrimination, from patients/clients/service users and from their managers/colleagues
18. Identify and tackle any hotspots in individual organisations around physical violence towards staff: from patients/their relatives/the public, managers, and other colleagues. Encourage staff to report any incidents when they occur. Ensure staff know what action has been taken as a result
19. Identify and tackle any hotspots in individual organisations around harassment, bullying and abuse of staff: from patients/their relatives/the public, managers, and other colleagues. Encourage staff to report any incidents when they occur. Ensure staff know what action has been taken as a result
20. Consider the issue of reported injury and work-related stress, and analyse ways in which organisations can meet legitimate problems. In particular, consider what can be done to improve communication, reduce conflicting pressures, and eliminate barriers to effective working
21. Maintain the good progress on implementation and communication of policies and practices around general physical and mental health and well-being
22. Improve the provision of healthy food in workplace canteens for those organisations that are under-performing
23. Where necessary, review processes around reporting errors, near misses and incidents – and around reporting concerns about unsafe clinical practice. Ensure staff know how to report incidents. Encourage staff to report incidents, and ensure that they feel safe doing so. Communicate whatever action is taken as a result

Section 2 - Executive Summary and Recommendations

24. Review which organisations are performing poorly in relation to promoting the importance of hand hygiene to staff, patients and visitors. Make necessary improvements, learning from some of the top performers in this area.
25. Within each organisation, review Heat Maps to identify areas of lower performance, and scores for different personnel areas. Develop action plans as appropriate.

Section 3

Response Rate Summaries

Response Rates Summary: Organisation

The official sample size for the 2015 HSCNI Staff Survey was 70,213. 17,796 completed questionnaires were returned from this sample. 191 members of staff returned their questionnaires without filling them in. A group of 699 staff were excluded from the official sample as ineligible. The response rate to the 2015 HSCNI Staff Survey was therefore 26% (17,796 usable responses from a final sample of 69,514). The table and chart below show the response rate by Organisation.

Organisation	Sample Size	Excluded	Adjusted Sample	Not Returned	Blank	Refused	Completed	Response Rate
Belfast Health and Social Care Trust	22,567	246	22,321	17,991	50	16	4,264	19%
Northern Health and Social Care Trust	12,974	83	12,891	9,228	30	9	3,624	28%
Southern Health and Social Care Trust	10,308	30	10,278	8,082	20	0	2,176	21%
South Eastern Health and Social Care Trust	10,965	252	10,713	7,216	27	11	3,459	32%
Western Health and Social Care Trust	9,538	14	9,524	6,927	58	0	2,539	27%
Northern Ireland Ambulance Service	1,108	4	1,104	765	1	0	338	31%
Northern Ireland Blood Transfusion Service	186	0	186	144	0	0	42	23%
Business Services Organisation	1,326	33	1,293	548	4	0	741	57%

Section 4

Engagement Scores

How overall staff engagement is calculated

The overall indicator of staff engagement has been calculated using the responses to nine individual questions which make up three Key Findings related to staff engagement. Details of the questions used are provided below:

- KF22 'Staff ability to contribute towards improvement at work'
 - I am able to make suggestions to improve the work of my team / department.
 - There are frequent opportunities for me to show initiative in my role.
 - I am able to make improvements happen in my area of work.

- KF24 'Staff recommendation of the trust as a place to work or receive treatment'
 - Care of patients / service users is my organisation's top priority.
 - I would recommend my organisation as a place to work.
 - If a friend or relative needed treatment, I would be happy with the standard of care provided by this organisation.

- KF25 'Staff motivation at work'
 - I look forward to going to work.
 - I am enthusiastic when I am working.
 - Time passes quickly when I am working.

Firstly, three scale summary scores were calculated by assigning numbers to a series of responses, and calculating the average score. For example, for KF24 'Staff recommendation of the organisation as a place to work or receive treatment' staff were asked the extent to which they agreed with the following three statements: "Care of patients / service users is my organisation's top priority", "I would recommend my organisation as a place to work", and "If a friend or relative needed treatment, I would be happy with the standard of care provided by this organisation". If they answered "strongly disagree", they would score 1; if they answered, "disagree", they would score 2; if they answered, "neither agree nor disagree", they would score 3; if they answered "agree", they would score 4; and if they answered "strongly agree", they would score 5. If a respondent were to score 4, 3 and 5 for the three statements then their average score would be $(4 + 3 + 5) = 12 / 3 = 4.00$.

The same process was also conducted for the other Key Findings (22 and 25) to create three scale summary scores for each respondent.

From this, the overall indicator of staff engagement was created by taking the average from these three scale summary scores. For example, if a respondent had an overall score of 3.67 on KF22 'Staff ability to contribute towards improvement at work', an overall score of 4.00 on KF24 'Staff recommendation of the organisation as a place to work or receive treatment', and an overall score of 4.33 on KF25 'Staff motivation at work' then their overall staff engagement score would be $(3.67 + 4.00 + 4.33) = 12 / 3 = 4.00$. The overall staff engagement scores for all respondents are then summarised to create scores at the required level for reporting (i.e. region, organisation and personnel area).

Engagement scores by organisation

RED and **GREEN** indicators based on a variance of 5% or more (0.25 or more for scale scores). **AMBER** variances are based on a negative variance between 3% and 5% (0.15 to 0.25 for scale scores). Measures where a lower score is better are marked by an asterisk and are italicised.

Section 5

Key Findings

How the Key Findings are calculated

Key Findings	Question Number(s)
<p>Please note that 'key findings' relate to a question, or group of questions, originally taken from the 2014 NHS National Staff Survey. Where relevant these will be included for HSCNI. However, some may be excluded where not directly comparable due to differing requirements or timescales.</p>	
<p>Key Finding 1. Percentage of staff feeling satisfied with the quality of work and patient care they are able to deliver</p> <p>This is the percentage of staff who agreed or strongly agreed with at least two of the following three statements: "I am able to do my job to a standard I am personally pleased with", "I am satisfied with the quality of care I give to patients / service users" and "I am able to deliver the patient care I aspire to". Note: staff giving 'not applicable to me' responses to the last two statements were excluded when calculating this score.</p>	<p>Q15b Q16a Q16c</p>
<p>Key Finding 2. Percentage of staff agreeing that their role makes a difference to patients</p> <p>This is the percentage of staff who agreed or strongly agreed with the following statement: "I feel that my role makes a difference to patients / service users". Note: staff giving 'not applicable to me' responses were excluded when calculating this score.</p>	<p>Q16b</p>
<p>Key Finding 3. Work pressure felt by staff</p> <p>The work pressure score assesses the extent to which staff have a workload that is more than they can cope with and includes the extent to which staff feel there is a lack of time or resources to do their job well. Possible scores range from 1 to 5, with 1 representing that staff experience low work pressures, and 5 representing that staff experience high work pressures.</p>	<p>Q10c Q10d Q10e</p>
<p>Key Finding 4. Effective team working</p> <p>The effective team working score assesses the extent to which staff feel they work in a team where team members have shared objectives, meet often to discuss the team's effectiveness and have to communicate closely with each other to achieve the team's objectives. An 'effective' team is one that is rated highly on these aspects. Possible scores range from 1 to 5, with 1 representing ineffective teamwork, and 5 representing effective teamwork.</p>	<p>Q9c Q9d Q9e</p>
<p>Key Finding 5. Percentage of staff working extra hours</p> <p>This is the percentage of staff that said that, in an average week, they work longer than the hours for which they are contracted. This was calculated from those ticking " up to and including 5 hours"/ " over 5 hours, up to and including 10 hours"/ "over 10 hours" to question 6c (paid hours) or 6d (additional unpaid hours)..</p>	<p>Q6c Q6d</p>
<p>Key Finding 6. Percentage of staff receiving job-relevant training, learning or development in last 12 months</p> <p>This is the percentage of staff who in the past 12 months received any form of training, learning or development from their employer, and also agreed or strongly agreed with at least one of the following statements: "My training, learning and development has helped me to do my job more effectively", "It has helped me to deliver a better patient / service user experience", and "It has helped me stay up-to-date with professional requirements".</p>	<p>Q3a Q3b Q3c</p>

How the Key Findings are calculated

Key Findings	Question Number(s)
<p>Key Finding 7. Percentage of staff appraised in last 12 months This is the percentage of staff who answered “yes” to having an 'appraisal, annual review, development review or KSF development review' in the last 12 months</p>	Q4a
<p>Key Finding 8. Percentage of staff having well structured appraisals in last 12 months This is the percentage of staff who had an appraisal in the previous 12 months and also answered “yes” to each of the following three questions: “Did it help you to improve how you do your job?”, “Did it help you agree clear objectives for your work?” and “Did it leave you feeling that your work is valued by your organisation?”</p>	Q4b Q4c Q4d
<p>Key Finding 9. Support from immediate managers Support from immediate managers assesses the extent to which staff feel their manager or supervisor provides them with support, guidance and feedback on their work and takes into account their opinions before making decisions that affect their work. Possible scores range from 1 to 5, with 1 representing unsupportive managers, and 5 representing supportive managers.</p>	Q19a Q19b Q19c Q19d Q29f
<p>Key Finding 11. Percentage of staff suffering work related stress in last 12 months This is the percentage of staff who said that, in the last 12 months, they had felt unwell as a result of work related stress.</p>	Q33e
<p>Key Finding 12. Percentage of staff witnessing potentially harmful errors, near misses or incidents in last month This is the percentage of staff who, in the previous month, had witnessed at least one error or near miss that could have potentially hurt patients and / or staff.</p>	Q37b Q37c
<p>Key Finding 13. Percentage of staff reporting errors, near misses or incidents witnessed in the last month This is the percentage of staff who had, in the last month, seen errors, near misses, or incidents that could have hurt staff or patients and said that they or a colleague had reported it. Respondents who had not seen any errors, near misses or incidents in the last month, or did not know whether such errors had been reported, were excluded from the calculation.</p>	Q37d

How the Key Findings are calculated

Key Findings	Question Number(s)
<p>Key Finding 14. Fairness and effectiveness of procedures for reporting errors, near misses and incidents</p> <p>This scale assesses culture of incident reporting in organisations. The scale measures the extent to which staff are aware of the procedures for reporting errors, near misses and incidents; to what extent they feel that the organisation encourages such reports, and then treats the reports fairly and confidentially; and to what extent the organisation takes action to ensure that such incidents do not happen again. Possible scores range from 1 to 5, with 1 representing procedures that are perceived to be unfair and ineffective, and 5 representing procedures that are perceived to be fair and effective.</p>	Q39a Q39b Q39c Q39d Q39e Q39f Q39g
<p>Key Finding 15. Percentage agreeing that they would feel secure raising concerns about unsafe clinical practice</p> <p>This is the percentage of staff who agreed or strongly agreed that they would feel secure raising concerns about unsafe clinical practice.</p>	Q38b
<p>Key Finding 16. Percentage of staff experiencing physical violence from patients, relatives or the public in last 12 months</p> <p>This is the percentage of staff who, in the previous 12 months, had experienced physical violence from patients / service users, their relatives or other members of the public.</p>	Q30a
<p>Key Finding 17. Percentage of staff experiencing physical violence from staff in last 12 months</p> <p>This is the percentage of staff who, in the previous 12 months, had experienced physical violence from colleagues or managers.</p>	Q30b Q30c
<p>Key Finding 18. Percentage of staff experiencing harassment, bullying or abuse from patients, relatives or the public in last 12 months</p> <p>This is the percentage of staff who, in the previous 12 months, had experienced harassment, bullying or abuse at work from patients / service users, their relatives or other members of the public.</p>	Q31a
<p>Key Finding 19. Percentage of staff experiencing harassment, bullying or abuse from staff in last 12 months</p> <p>This is the percentage of staff who, in the previous 12 months, had experienced harassment, bullying or abuse from colleagues or managers.</p>	Q31b Q31c

How the Key Findings are calculated

Key Findings	Question Number(s)
<p>Key Finding 21. Percentage of staff reporting good communication between senior management and staff This is the percentage of people who agreed or strongly agreed with at least three of the following four statements: "Senior managers act on staff feedback"; "Senior managers here try to involve staff in important decisions"; "Communication between senior management and staff is effective" and staff "receive clear feedback from their manager".</p>	Q11f Q20a Q20b Q29f
<p>Key Finding 22. Percentage of staff able to contribute towards improvements at work This is the percentage of people who agreed or strongly agreed with at least two of the following three statements: "There are frequent opportunities for me to show initiative in my role"; "I am able to make suggestions to improve the work of my team / department"; and "I am able to make improvements happen in my area of work".</p>	Q29b Q29d Q29e
<p>Key Finding 23. Staff job satisfaction This scale measures job satisfaction in the following areas: recognition for good work; support from immediate managers and colleagues; freedom to choose methods of working; amount of responsibility; opportunities to use skills; and the extent to which the organisation is seen to value the work of staff. Possible scores range from 1 to 5, with 1 representing that staff are dissatisfied with their jobs, and 5 representing that staff are satisfied with their jobs.</p>	Q13a Q13b Q13c Q13d Q13e Q13f Q13g
<p>Key Finding 24. Staff recommendation of the organisation as a place to work or receive treatment Staff were asked whether or not they thought care of patients and service users was the organisation's top priority, whether or not they would recommend their organisation to others as a place to work, and whether they would be happy with the standard of care provided by the organisation if a friend or relative needed treatment. Possible scores range from 1 to 5, with 1 representing that staff would be unlikely to recommend the organisation as a place to work or receive treatment, and 5 representing that staff would be likely to recommend the organisation as a place to work or receive treatment.</p>	Q29h Q29i Q29j
<p>Key Finding 25. Staff motivation at work Staff were asked questions about the extent to which they look forward to going to work, and are enthusiastic and absorbed in their jobs. Possible scores range from 1 to 5, with 1 representing that staff are not enthusiastic and absorbed by their work, and 5 representing that staff are enthusiastic and absorbed by their work.</p>	Q28a Q28b Q28c

How the Key Findings are calculated

Key Findings	Question Number(s)
<p>Key Finding 27. Percentage believing that the organisation provides equal opportunities for career progression or promotion This is the percentage of staff who said that their organisation acts fairly with regards to career progression / promotion, regardless of ethnic background, gender, religion, sexual orientation, disability or age. (Note: staff giving 'Don't Know' responses were excluded when calculating this score.)</p>	Q25a
<p>Key Finding 28. Percentage of staff experiencing discrimination at work in the last 12 months This is the percentage of staff who said that they had experienced discrimination from patients / service users, their relatives or other members of the public and / or from colleagues or managers in the last 12 months.</p>	Q25c Q25d
<p>Key Finding 29. Percentage agreeing that feedback from patients/service users is used to make informed decisions in their directorate / department This is the percentage of staff who agreed or strongly agreed that feedback from patients/service users is used to inform changes.</p>	Q23a Q23c

Key Finding heat map by organisation

RED and **GREEN** indicators based on a variance of 5% or more (0.25 or more for scale scores). **AMBER** variances are based on a negative variance between 3% and 5% (0.15 to 0.25 for scale scores). Measures where a lower score is better are marked by an asterisk and are italicised.

Questions Scores Most Changed Over Time

Question Scores Most Changed Over Time

2012

2015

+ / -

We have highlighted those questions where the HSCNI score, when compared year on year, shows a change of 5% or greater, in the table below. Where the change is an improvement then the change has been coloured green, where the change is a decline it has been coloured red. All figures are displayed to 0 decimal places, all calculations are based on the actual percentage scored. This may result in an apparent difference of +/- 1% between the change as displayed and the variation in the scores as displayed.

			2012	2015	+ / -
1	Your Personal Development	Q5a: (+) Appraisal agreed a Personal Development Plan	46%	79%	33%
2	Health, Safety and Well-Being at Work	Q35b: (+) Organisation provides staff with advice on diet	42%	67%	25%
3	Health, Safety and Well-Being at Work	Q35d: (+) Organisation provides staff with advice on exercise	57%	78%	21%
4	Health, Safety and Well-Being at Work	Q35c: (+) Organisation provides staff with advice on alcohol consumption	51%	73%	21%
5	Communication and Engagement	Q26b: (+) Different parts of the organisation communicate effectively with each other	23%	43%	19%
6	Your Job	Q15b: (+) Able to do their job to a standard they are personally pleased with	65%	79%	14%
7	Your Personal Development	Q2g: (+) Received training in handling patients' confidential information	70%	84%	14%
8	Communication and Engagement	Q29h: (+) Care of patients is the organisation's top priority	59%	73%	14%
9	Your Job	Q10a: (+) Know what is expected of them at work	79%	92%	13%
10	Your Personal Development	Q4A_Agg: (+) Had an appraisal / review in last 12 months	52%	65%	12%
11	Your Job	Q10c: (+) Can meet the conflicting demands of their work	32%	44%	12%
12	Your Personal Development	Q2a: (+) Received equality and diversity training	60%	72%	12%
13	Health, Safety and Well-Being at Work	Q35e: (+) Organisation provides staff with help to stop smoking	79%	91%	12%
14	Your Personal Development	Q2f: (+) Received computer skills training	48%	59%	10%
15	Your Job	Q10b: (+) Involved in decisions about changes that affect their work	41%	50%	9%
16	Health, Safety and Well-Being at Work	Q35f: (+) Organisation provides staff with access to the cycle to work scheme	82%	91%	9%
17	Your Job	Q11f: (+) Senior managers act on staff feedback	29%	38%	9%
18	Communication and Engagement	Q29b: (+) Frequent opportunities to show initiative in their role	58%	66%	8%
19	Your Job	Q7h: (-) Have worked additional hours because they don't want to let their colleagues down	83%	75%	-7%

We have highlighted those questions where the HSCNI score, when compared year on year, shows a change of 5% or greater, in the table below. Where the change is an improvement then the change has been coloured green, where the change is a decline it has been coloured red. All figures are displayed to 0 decimal places, all calculations are based on the actual percentage scored. This may result in an apparent difference of +/- 1% between the change as displayed and the variation in the scores as displayed.

20	Your Job	Q6b: (-) Have worked over contracted hours	73%	67%	-6%
21	Your Personal Development	Q2e: (+) Received Infection control training	79%	85%	6%
22	Communication and Engagement	Q26a: (+) Organisation communicates clearly with staff about what it is trying to achieve	39%	45%	6%
23	Your Job	Q10f: (+) Have time to carry out all their work	28%	34%	6%
24	Your Job	Q13c: (+) Satisfied with freedom to choose their own method of working	57%	63%	5%
25	Your Job	Q7g: (-) Have worked additional hours because they want to provide the best care they can	88%	82%	-5%
26	Health, Safety and Well-Being at Work	Q39f: (+) Organisation informs staff about errors, near misses or incidents that happen	49%	55%	5%
27	Your Personal Development	Q5c: (+) Immediate manager supported actioning the Personal Development Plan	82%	87%	5%

28	Flexible Working / Work-Life Balance	Q18a: (+) The organisation is committed to helping staff balance work and home life	45%	39%	-5%
29	Your Managers	Q21a: (+) Senior management set out a clear vision of where the organisation is headed	61%	54%	-6%
30	Your Managers	Q21c: (+) Senior management build strong, co-operative links with other organisations	70%	63%	-7%
31	Your Job	Q9e_Agg: (+) Team communicate closely to achieve objectives	88%	81%	-8%
32	Your Job	Q7i: (+) Have worked additional hours because they want the extra money	35%	27%	-8%
33	Flexible Working / Work-Life Balance	Q18b: (+) Their immediate manager helps them find a good work-life balance	53%	45%	-8%
34	Your Managers	Q21b: (+) Senior management build strong, positive relationships with the community	60%	52%	-8%
35	Your Job	Q7e: (+) Have worked additional hours because they enjoy their job	56%	47%	-9%
36	Your Organisation	Q24d: (+) Aware of the organisation's whistle-blowing process	95%	81%	-13%
37	Your Job	Q6c: (-) Have worked additional paid hours	31%	50%	18%

Questions Scores Most Changed Over Time - Analysis

Where the same questions were asked previously, 27 questions have seen significant increases (over 5%) since the last survey. The largest increases are in the number of staff reporting that their appraisal agreed a Personal Development Plan (up 33%); three of the questions on the organisation providing staff with advice on health and wellbeing (advice on diet up 25%, advice on exercise up 21%, advice on alcohol consumption up 21%); and different parts of the organisation communicating well with each other (up 19%).

10 questions have seen significant decreases (over 5%) since the last survey. The largest decreases are around staff working additional hours (working additional unpaid hours up 24%, working additional paid hours up 18%, and working additional hours because they enjoy their job down 9%).

Detailed Analysis - Explanation of Results

Quality Health have scored your results in line with the schema used for the NHS England National Staff Survey 2014 (NHS 2014), where comparable, and have expressed these as percentages. In each case the score represents the percentage of respondents whose views are in line with the statement. Each statement is marked with either a (+) or a (-):

(+) indicates that the statement measures a positive aspect of the respondent's experience of work, and a higher score is better than a lower one.

(-) indicates that the statement measures a negative aspect of the respondent's experience of work, and so a lower score is better than a higher one.

We have highlighted those questions where the HSCNI score, when compared year on year, shows a change of 5% or greater, in the following table. Where the change is an improvement then the change has been coloured green, where the change is a decline it has been coloured red.

We have then presented the scores for all evaluative questions in each section of the survey as plot charts, using a common scale of 0-100%. A "●" represents the score for HSCNI 2015, "●" represents the score for HSCNI 2012 and "●" the score for NHS 2014, where a comparable score can be produced - where no comparable score exists there is no marker.

In each chart the series of "●" represents the scores achieved by the HSCNI organisations surveyed.

Benchmark Charts

In this example HSCNI's score for 2015 is 72%, the score for HSCNI in 2012 is 68%, and the score for NHS 2014 is 70%. The lowest HSCNI organisation score achieved was 64%, the best HSCNI organisation score achieved was 84%.

We have then presented the actual scores achieved by HSCNI and, where available, that achieved by NHS England - if there is no available comparative score then a "-" is displayed. Where possible we have also compared the HSCNI 2015 score to the HSCNI 2012 and NHS England 2014 scores, with a sequence of arrows where comparative score exists, and a "☒" where it does not. Where the scores differ by 5% or more then the direction of the arrow shows which scores higher - if the arrow points up then HSCNI has scored higher, if down then HSCNI has scored lower. The colour of the arrow indicates whether HSCNI's result is better or worse than that for the comparator.

Some questions are marked as "_Agg". These indicate an aggregated score, where the response ranges for the question are broadly, but not directly, comparable; for example a response range of Yes or No is broadly comparable to a range of Strongly Disagree to Strongly Agree, as both contain a positive element, which we have used to generate the relevant scores.

Performance and analysis over time

Your Personal Development

There are some significant differences between organisations on many of the personal development questions, and in most areas Northern Ireland does score better than the equivalent scores in England.

67% of staff in Northern Ireland say that they received effective induction on commencement (Q1a), and 52% on change of role (Q1b), but there is a significant range of scores between organisations: under 25% to over 80% on the former; 0% to over 60% on the latter.

65% of staff in Northern Ireland say they had an appraisal (Q4a), an improvement from 52% in 2012, although this is still significantly below the equivalent 84% in England. Where these took place, 58% of staff say that they helped them improve how they did their job (Q4b); 78% say they agreed clear objectives for their work (Q4c); and 62% say it left them feeling valued (Q4d). 79% of staff say they agreed a Personal Development Plan (Q5a), a significant improvement from 46% in 2012; and 75% of staff say these plans have been actioned (Q5b).

Recommendations and action points

1. Ensure all staff have effective inductions when they join an organisation, and when they change jobs
2. Continue the improvement in the coverage of appraisals – a significant number of staff still say that they do not have one. Where they take place, ensure that clear objectives are agreed for work and for personal development. Continue the improvement in agreeing Personal Development Plans, and ensure that these are followed up and actioned.

Performance and analysis over time

Your Job

Scores to questions about their jobs are generally good and improving, although a significant proportion of staff still report that they are working additional hours because of insufficient resources.

67% of staff in Northern Ireland say that they work over their contracted hours (Q6b), fewer than the 73% who reported this in 2012. However, 51% of staff say that this is acceptable (Q8). The commonest reasons for working additional hours (Q7a to Q7i) are: because they want to provide the best care they can (82%); because they don't want to let their colleagues down (75%); to meet deadlines; and/or because it's impossible to do the job otherwise (63%). Only 44% of staff say that they can meet the conflicting demands of their work (Q10c), although this has improved from 32% in 2012, and is significantly better than the equivalent 28% in England. 35% of staff say that there are enough staff in their team/area/department to do the job properly (Q10e); this is significantly better than the equivalent 29% in England. 34% of staff say that they have time to carry out all of their work (Q10f), an improvement from 28% in 2012.

Fewer staff than in 2012 (81% compared to 89%) say that their team communicates closely to achieve objectives (Q9e).

Significantly more staff than in 2012 (92% compared to 79%) say that they know what is expected of them at work (Q10a), and this is now significantly better than the equivalent 84% in England, a very high score overall.

Significantly more staff than in 2012 (50% compared to 41%) say that they are involved in decisions that affect their work (Q10b).

61% of staff say that they have adequate materials, supplies and equipment to do their work (Q10d), although this is significantly better than the equivalent 55% in England.

Recommendations and action points

1. Significant numbers of staff report working additional hours. Consider whether resources are deployed in the most appropriate places. Drill down into the data for each organisation to identify the hotspots of particular concern
2. Investigate the areas where staff say there are not enough materials to carry out their jobs, and action as appropriate.

Flexible Working / Work-Life Balance

39% of staff who responded to the survey say that their organisation is committed to helping them achieve a balance between work and home life (Q18a). 58% of staff say that they can approach their immediate manager to talk about flexible working (Q18c). However, 45% say that their manager is able to help them in this (Q18b; a drop from 53% in 2012).

Recommendations and action points

1. Consider approaches and review strategies to improve work life balance. Ensure that managers understand what they can and cannot offer to staff as part of this, and why this appears to have dropped since 2012.

Performance and analysis over time

Your managers

Staff views of their managers are mixed, with some significant movements – in both directions – over time.

There have been some significant improvements since 2012. 55% of staff in Northern Ireland now say that their immediate manager asks their opinion before making decisions that affect their work (Q19c; an improvement from 51% in 2012). 29% of staff say that senior managers try to involve them in important decisions (Q20a; an improvement from 25% in 2012). 38% of staff say that senior managers act on staff feedback (Q11f; an improvement from 29% in 2012), significantly better than the equivalent 28% in England.

In other cases, particularly around senior management, the scores have dropped. 52% of staff in Northern Ireland now say that senior management build strong, positive relationships with the community (Q21b; a drop from 60% in 2012). 63% of staff say that senior management build strong, co-operative links with other organisations (Q21c; a drop from 70% in 2012). 54% of staff say that senior management set out a clear vision of where their organisation is headed (Q21a; a drop from 61% in 2012), and there is a big gap between the top performing organisation at 80% and the lowest at just over 30%.

83% staff in Northern Ireland say that they know who the senior managers are in their organisation (Q29g). However, only 30% of staff say that communication between senior managers and staff is effective (Q20b; lower than the equivalent 36% in England).

Recommendations and action points

1. Review approaches in lower performing organisations for senior managers to communicate with staff – particularly around the vision and priorities of the organisation
2. Where possible, involve staff in decision-making that affects their roles.

Performance and analysis over time

Your organisation

74% of staff in Northern Ireland say that feedback from patients, clients and service users is collected (Q23a), although this is lower than the equivalent 89% in England. Where it is, 61% of staff say that they are given regular updates on it (Q23b). 66% of staff say that this feedback is used to make decisions (Q23c), which is significantly better than the equivalent 54% in England.

88% of staff in Northern Ireland say that they are aware of their organisation's policy and process for raising concerns about negligence and wrongdoing (Q24a); and 81% of staff say that they are aware of their organisation's whistleblowing process (Q24d). 80% of staff say that they would be confident to speak up and raise concerns if they had cause to (Q24b); and 65% say that they are confident their organisation would appropriately handle the investigation that resulted (Q24c).

772 staff in Northern Ireland (5%) say that they had personally experienced discrimination from patients, their relatives or other members of the public (Q25c). 1,299 staff (8%) say that they had personally experienced discrimination from their manager, team leader or other colleagues (Q25d). The biggest proportions of these (Q25e) are to do with religion (22%), gender (18%), age (15%) and ethnic background (13%). 28% of staff said that they reported any discrimination experienced (Q25f); and 32% say that their organisation took effective action as a result.

Recommendations and action points

1. Review strategies and mechanisms for obtaining feedback on patient experience and patient outcomes. Where this is collected, share it with staff. Use this feedback to inform change and improvement, and ensure that staff are aware that this has been done
2. Within each organisation, review the approach to communicating whistleblowing policies, and other processes for staff to raise concerns. Ensure that all staff know that these are in place, and how to use them. Reassure staff they will be afforded appropriate protection and that the organisation will take them seriously and take action where necessary
3. Where there are hotspots of reported discrimination in organisations, drill down into the results to understand where this is happening, and on what basis and consider action as appropriate. Encourage staff to report all incidents of discrimination, from patients/clients/service users and from their managers/colleagues.

Performance and analysis over time

Communication and engagement

Scores on communication and engagement are generally improving, and compare well to the equivalent questions in England, but there is still considerable scope for improvement on many questions.

45% of staff in Northern Ireland say that their organisation communicates effectively with staff about what it is trying to achieve (Q26a); this is a significant improvement from 39% in 2012. 43% of staff say that different parts of their organisation communicate effectively with each other (Q26b); this is a significant improvement from 23% in 2012.

57% of staff in Northern Ireland say that they look forward to going to work (Q28a; better than the equivalent 51% in England). 80% of staff say that time passes quickly while they are working (Q28c; better than the equivalent 74% in England). 66% of staff say that there are frequent opportunities to show initiative in their role (Q29b; an improvement from 58% in 2012).

61% of staff in Northern Ireland say that they would recommend their organisation as a place to work (Q29j; an improvement from 56% in 2012; and better than the equivalent 54% in England). 67% of staff say that if a friend or relative needed treatment they would be happy with the standard of care provided by their organisation (Q29i), although there is a big gap between the top performing organisation at over 80% and the lowest at under 40% (although this score wasn't from any of the six organisations with responsibility for the provision of direct patient care). 73% of staff say that care of patients is their organisation's top priority (Q29h; an improvement from 59% in 2012; and better than the equivalent 66% in England).

Recommendations and action points

1. Communication and engagement with staff is critical, and underpins good performance in every other area of the survey. Build on the Engagement Strategy that is already in place to ensure that it remains a key priority for each organisation
2. Share the results of this survey widely with staff, as part of this Engagement Strategy. Publicise results, and work with staff groups to understand more about areas with lower scores. Develop mechanisms for staff to feed into action planning for improvement as a result
3. Share good practice in engagement and communications between organisations. Identify which have the better scores for staff engagement, and learn from successful initiatives that have been put in place
4. Consider internal communications more generally – particularly around how different parts of each organisation communicate with each other.
5. Ensure that senior and middle managers recognise that positive staff engagement requires that communication is a two-way process. Develop appropriate strategies for obtaining staff views and feedback. Ensure that this is properly considered and acted on, and that feedback is given to staff on the resulting actions

Communications and Engagement - Summary and Recommendations

6. Ensure the continued visibility of senior managers in each organisation, and that they are personally involved in developing and delivering key communications
7. Consider further strategies for involving staff in key decisions in each organisation. Act on staff feedback, and ensure that actions taken are widely communicated back to staff.

Performance and analysis over time

Health, safety and well-being at work

Policies around providing general health and well-being advice to staff appear to be achieving excellent results. However, there are some concerning scores around some aspects of health, safety and well-being at work – particularly around the number, and reporting, of certain types of incidents.

2,366 staff in Northern Ireland (14%) say that they had experienced physical violence from patients, their relatives or other members of the public (Q30a). 92 staff say that they had experienced physical violence from their manager (Q30b). 231 staff say that they had experienced physical violence from other colleagues (Q30c). 77% of staff say that they had reported such violence (Q30d). Where it was reported, there were significant differences between organisations in whether staff say that effective action was taken as a result: for physical violence from patients (Q32a), their relatives or other members of the public, this ranged from under 30% to over 70%; for physical violence from other staff (Q32b), it ranged from under 25% to nearly 70%.

4,163 staff in Northern Ireland (25% of respondents) say that they had experienced harassment, bullying or abuse from patients, their relatives or other members of the public (Q31a). 2,073 staff (12%) say that they had experienced harassment, bullying or abuse from their manager (Q31b). 2,600 staff (16%) say that they had experienced harassment, bullying or abuse from other colleagues (Q31c). 54% of staff say that they had reported this (Q31d), better than the equivalent score of 51% in England, and there were significant differences between organisations (from under 30% to 80%). Where it was reported, there were significant differences between organisations in whether staff say that effective action was taken as a result: for harassment, bullying or abuse from patients (Q32c), their relatives or other members of the public, this ranged from under 25% to over 60%; for harassment, bullying or abuse from other staff (Q32d), it ranged from under 25% to 60%.

A significant proportion of staff in Northern Ireland (36%) say that they were injured or felt unwell as a result of work-related stress (Q33e).

There has been a focus on implementing policies and practices on general physical and mental health and well-being, and clear improvements can be seen. 89% of staff in Northern Ireland say that their organisation provides advice on mental health and well-being (Q35a). 67% of staff say that their organisation provides advice on diet (Q35b; an improvement from 42% in 2012). 73% of staff say that their organisation provides advice on alcohol consumption (Q35c; an improvement from 51% in 2012). 78% of staff say that their organisation provides advice on exercise (Q35d; an improvement from 57% in 2012). 91% of staff say that their organisation provides help to stop smoking (Q35e; an improvement from 79% in 2012). 91% of staff say that their organisation provides access to the cycle to work scheme (Q35f; an improvement from 82% in 2012). 67% of staff say that their organisation provides healthy good in the canteen (Q35g; an improvement from 62% in 2012, although there are wide variations between the top – over 70% - and bottom – 20% - organisations).

Health, safety and well-being at work (continued)

91% of staff in Northern Ireland say that they know how to report errors, near misses and incidents (Q37a), and 95% of staff say that they or a colleague did report these when they happened (Q37d). 45% of staff say that their organisation would treat staff involved fairly (Q39a); 55% of staff say that their organisation informs staff about incidents that happen (Q39f); and 52% of staff say that their organisation feeds back to staff what has been done in response. There are some big differences between organisations on these questions.

82% of staff in Northern Ireland say that their organisation does enough to promote the importance of hand hygiene to staff (Q40a), and 72% of staff say their organisation does enough to promote this to patients and other visitors (Q40b). However, there are significant differences between the best and worst performing organisations: just over 30% to 90% on the former, and under 30% to over 80% on the latter. Four of the five Health and Social Care Trusts score over 80% on promoting the importance of hand hygiene to staff.

Recommendations and action points

1. Identify and tackle any hotspots in individual organisations around physical violence towards staff: from patients/their relatives/the public, managers, and other colleagues. Encourage staff to report any incidents when they occur. Ensure staff know what action has been taken as a result
2. Identify and tackle any hotspots in individual organisations around harassment, bullying and abuse of staff: from patients/their relatives/the public, managers, and other colleagues. Encourage staff to report any incidents when they occur. Ensure staff know what action has been taken as a result
3. Consider the issue of reported injury and work-related stress, and analyse ways in which organisations can meet legitimate problems. In particular, consider what can be done to improve communication, reduce conflicting pressures, and eliminate barriers to effective working
4. Maintain the good progress on implementation and communication of policies and practices around general physical and mental health and well-being
5. Improve the provision of healthy food in workplace canteens for those organisations that are under-performing
6. Where necessary, review processes around reporting errors, near misses and incidents – and around reporting concerns about unsafe clinical practice. Ensure staff know how to report incidents. Encourage staff to report incidents, and ensure that they feel safe doing so. Communicate whatever action is taken as a result
7. Review which organisations are performing poorly in relation to promoting the importance of hand hygiene to staff, patients and visitors. Make necessary improvements, learning from some of the top performers in this area.

Section 7

Survey Results Manual

Section 7 - Survey Results Manual

This section of the report sets out the results from the HSCNI Staff Survey 2015, ordered in exactly the same way as in the survey questionnaire sent to participants.

Reading the columns of figures

The results are shown firstly in absolute numbers, then as percentage responses. The first two columns show the results for the previous survey year. The next two columns show the results for the current survey year. We have provided a comparator to NHS Acute Trusts results from the NHS National Staff Survey of 2014 [NHS England 2014]. Please note that where there is no equivalent question then dashes are displayed.

The purpose of presenting the figures in this way is to give a direct, at-a-glance, comparison between the region's results year on year and the overall results from the comparator group

Conventions

The percentages are calculated after excluding those responses that did not answer that particular question. All percentages are rounded to the nearest whole number. When added together, the percentages for all answers to a particular question may not total 100% because of this rounding.

The number of responses that did not answer a particular question is shown as the "Missing" figure at the bottom of the actual number of responses. In some cases, the "Missing" figure is quite high, because it includes respondents who did not answer that question, or group of questions, because it was not applicable to their circumstances.

On some questions there are also some figures which are italicised. These figures have been recalculated to exclude responses where the respondent has provided a non-specific response or where the question was not applicable to the respondent's circumstances. For example, questions such as 2a - where both the 'Not applicable to me' response and those not answering ("Missing"), are excluded.

Changes made to the data

There are questions reported which have] been 'routed' (i.e. where respondents are directed to a subsequent question depending on their answer to the lead question). Sometimes there are conflicts in the answers that respondents give to these questions and the data is corrected to account for this. In this instance, respondents answering Q4a with No or Can't Remember are instructed to answer Q6 next - if these respondents answer Q4b-d, or Q5a-c, then their responses to these questions are removed.

YOUR PERSONAL DEVELOPMENT

If you have joined your organisation or changed your job role in the last 24 months, to what extent do you agree or disagree with the following statements about induction?

1a. I received an effective induction on commencement to my organisation	2012		2015		NHS England 2014	
	Responses	%	Responses	%	Responses	%
* <i>Strongly disagree</i>	-	-	571	9%	-	-
* <i>Disagree</i>	-	-	834	13%	-	-
* <i>Neither agree nor disagree</i>	-	-	761	11%	-	-
