

The Consumer Council's Home Energy Index

July 2019

Trend: Over the last 42 months (since January 2016), Northern Ireland's Home Energy Index (HEI) has increased by 37. It has remained stable since January 2019 (Figure 1).

Overview: The Consumer Council's Home Energy Index tracks changes in household gas, electricity and home heating oil (HHO) prices respectively, in Northern Ireland. It also creates a composite index; meaning that all three energy prices are combined to create one overarching figure, weighted for usage and market share.

July 2019 Findings: In July 2019, the Home Energy Index composite stood at 137.34 (Figure 1). This is slightly higher than the previous month (136.71). This is a reflection of modest increases in the price of HHO as natural gas and electricity have remained stable since October 2018 (Figure 2).

- **HHO:** Due to the reliance on HHO in Northern Ireland (approximately 68% of households), the index is particularly sensitive to changes in the price of HHO. Prices of oil have seen considerable fluctuations and increases since the index began in January 2016 (Figure 2). There was an increase in the price of HHO in July 2019.
- **Gas:** Natural gas prices did not change in July 2019.
- **Electricity:** Electricity prices did not change in July 2019.

Figure 1: Home Energy Index (composite of electricity, gas and HHO) for Northern Ireland (January 2016 – July 2019).

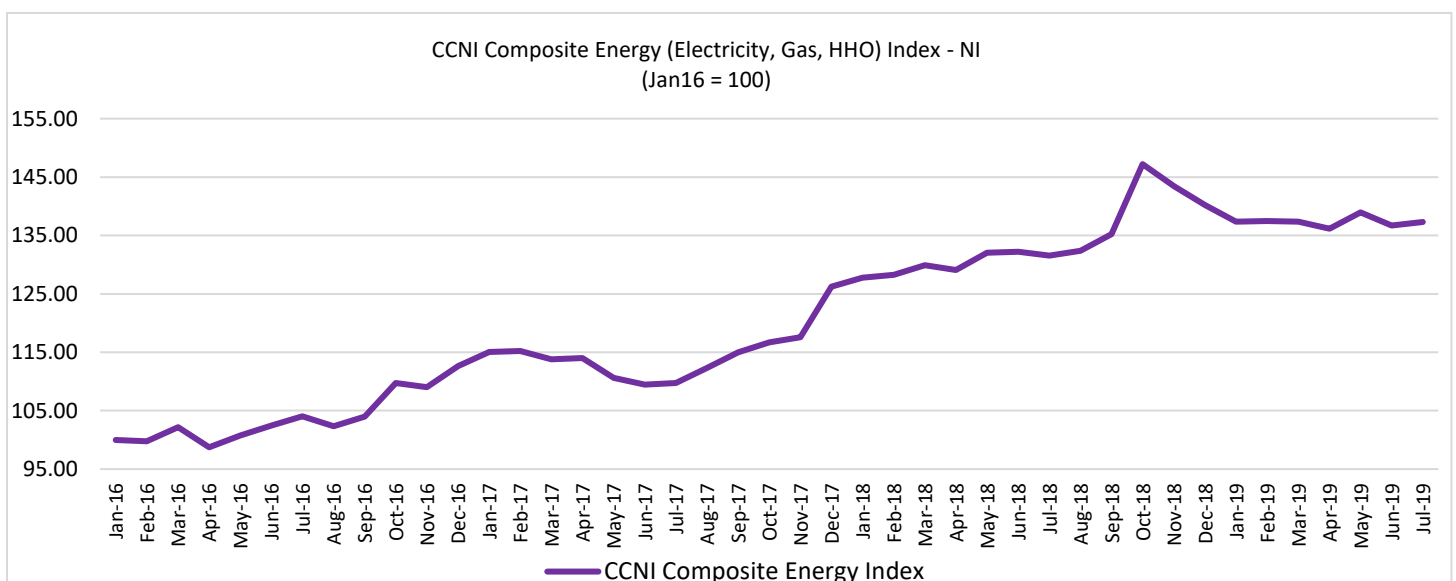

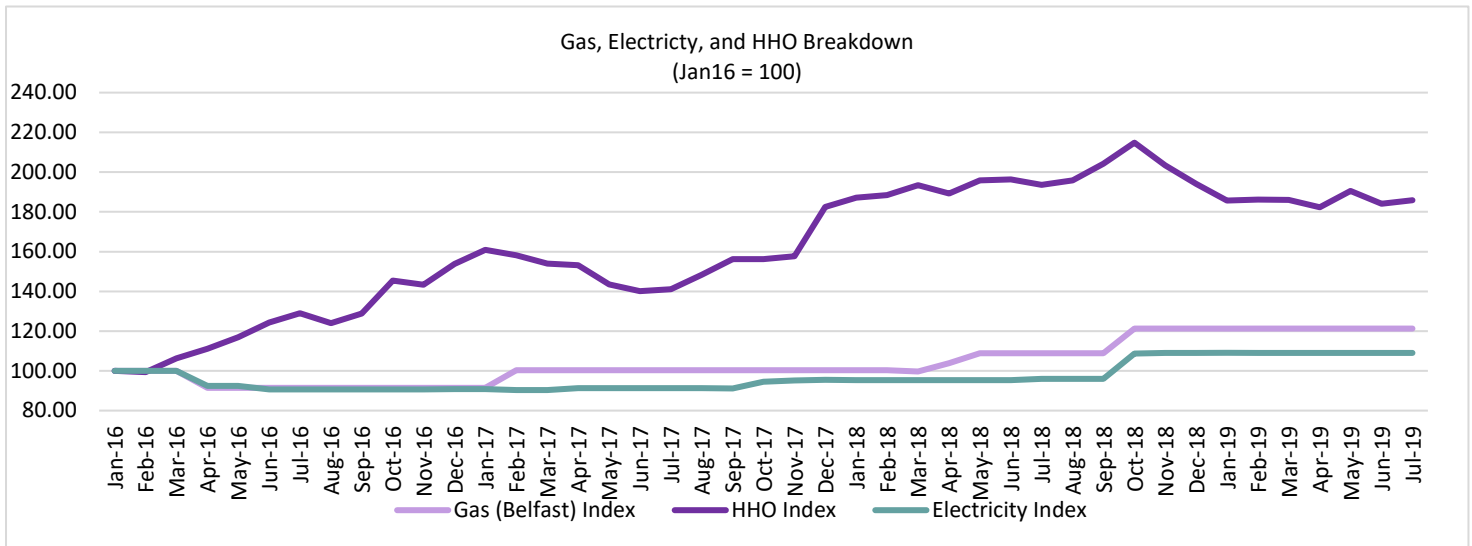

Figure 2: Gas, electricity and home heating oil (HHO) breakdown for Northern Ireland (January 2016 – June 2019).

What is a price index?

A price index is a number that shows the extent to which a price has changed from a base over a given period. The base period is set at 100 and changes in price are shown relative to that number, i.e. above or below 100.

How was the 'Home Energy Index' created?

The Consumer Council records tariffs from different energy suppliers across Northern Ireland. These are available on our website, please see below. Prices are weighted to take consideration of usage and market share of suppliers, so that changes in the index number better reflect the change impacting the consumer over time.

Consumer Information:

The Consumer Council's annual *Consumer Insight Survey* (May 2018) revealed that consumers' top concern in 2018 was the rising price of goods and services; and one of consumers top 'household expenditure worries' was paying energy bills. Further information on the survey results are available on The Consumer Council website www.consumercouncil.org.uk.

The Consumer Council has a variety of tools available to help consumers make better choices, shop around and save money. Please visit our website www.consumercouncil.org.uk to avail of the following:
