### Mental Illness Inpatients Resident

Information on the number of mental illness patients resident in hospital, or on home leave, on 17 February each year is sourced from the annual Mental Illness & Learning Disability (MILD) Census. It is a count of all mental illness and learning disability patients who are resident in hospital or on home leave at the time of the Census, and is collected from each hospital on the basis of age and length of stay.

**Table 1.1: Mental Illness Inpatients Resident on 17 February by Year, 2019 - 2023 (including patients on Home Leave)**

## Mental Illness Compulsory Admissions Under the Mental Health (NI) Order 1986

Information on the number of compulsory admissions under the Mental Health Order (1986) is based on the KH15/KH15b information return, received on a quarterly basis from each Health & Social Care Trust in Northern Ireland. This return collects information on all patients admitted during the quarter who were detained at point of admission under the Mental Health (NI) Order 1986. Patients admitted to Hospital on a 'Voluntary' basis are not included in the KH15/KH15b information in Tables 1.4 and 1.5.

It is also important to note that a patient under the care of a consultant in a psychiatric specialty is only included under one mental category. Therefore, where a patient has been assigned to more than one specialty, the mental illness specialty takes precedence over any other. As a consequence inpatients admitted under the learning disability POC may be included in this table.

**Table 1.4: Mental Illness Compulsory Admissions Under the Mental Health (NI) Order 1986 by Sex and Year (2018/19 - 2022/23)**

Sex	2018/19		2019/20		2020/21		2021/22		2022/23		Change 2018/19 to 2021/22

## Learning Disability Inpatients Resident

The Mental Illness & Learning Disability (MILD) Census is carried out annually, and is a count of all mental illness and learning disability patients who are resident in hospital or on home leave at the time of the Census. Information is collected from each hospital on the basis of age and length of stay. The Census is a snapshot of the resident population on 17 February each year.

**Table 2.1: Learning Disability Inpatients Resident on 17 February by Year, 2019 to 2023 (including patients on Home Leave)**

## Learning Disability Compulsory Admissions Under the Mental Health (NI) Order 1986

Information on the number of compulsory admissions under the Mental Health Order (1986) is based on the KH15/KH15b information return, received on a quarterly basis from each Health & Social Care Trust in Northern Ireland. This return collects information on all patients admitted during the quarter who were detained at point of admission under the Mental Health (NI) Order 1986. Patients admitted to Hospital on a 'Voluntary' basis are not included in the KH15/KH15b information in Tables 2.4 and 2.5.

It is also important to note that a patient under the care of a consultant in a psychiatric specialty is only included under one mental category. Therefore, where a patient has been assigned to more than one specialty, the mental illness specialty takes precedence over any other.

**Table 2.4: Learning Disability Compulsory Admissions Under the Mental Health (NI) Order 1986 by Sex and Year (2018/19 - 2022/23)**

Sex	2018/19		2019/20		2020/21		2021/22		2022/23		Change 2018/19 to 2022/23

**Total Number of Detentions Under the Mental Health Order (NI) 1986, including those Detained on Admission and those who became Detained after Admission**

Information on number of compulsory admissions (detained on admission) under the Mental Health Order (1986) detailed in the table below is sourced from the quarterly KH15/KH15b information returns, whilst information on the number of patients admitted on a 'Voluntary' basis, who became detained after admission is sourced from the quarterly KH16 information return. Those 'Detained after Admission' are classified as patients who were admitted on a 'Voluntary' basis but later became detained under the Mental Health (NI) Order 1986, as a result of a change in their legal status.

It is important to note that the information below refers to admissions and not patients, where a patient may be included more than once during the year. Readers should note that a patient under the care of a consultant in a psychiatric speciality is only included under one mental category. Therefore, where a patient has been assigned to more than one speciality, the mental illness speciality takes precedence over the any other. As a consequence inpatients admitted under the learning disability POC may be included in this table.

**Table 3.1: Total Detentions (Detained on Admission and Detained After Admission) under the Mental Health Order (NI) 1986 (2018/19 - 2022/23)**

### Number of Electro-Convulsive Treatments (ECT) Administered and the Number of Patients receiving ECT

Information on (i) the number of patients receiving Electro-Convulsive Therapy (ECT) and (ii) the number of ECT treatments administered each year is sourced from each Health & Social Care (HSC) Trust in the quarterly KH17 information return.

It is important to note that prior to 2021/22, patients receiving ECT in different quarters, may be counted more than once during a financial year. However for 2021/22 onwards information refers to the number of patients receiving ECT during the year, as any duplicates have been removed.

**Table 3.2: Electro-Convulsive Treatments by Year (2018/19 - 2022/23)**

Hospital / HSC Trust	2018/19		2019/20		2020/21		2021/22		2022/23

## Appendix 1: Guidance

### General Guidance on using the data

The data contained in this publication details an annual analysis of:

- (i) Census of patients who were being treated as an inpatient within the mental health and learning disability POCs on 17 February 2023.
- (ii) Compulsory admissions within the mental health and learning disability POCs under the Mental Health (NI) Order 1986

### a. Mental Health and Learning Disability Census

#### Description of the data

Data refers to the number of mental health and learning disability patients resident in hospital or on home leave on 17 February each year.

Data is collected separately for mental health and learning disability patients and is presented by hospital, age of the patient and their length of stay at the time of the census.

Data is recorded separately on the number of inpatients on home leave; although, these are recorded in the overall total number of inpatients. Home leave refers to all inpatients who were not actually resident in the hospital at the time of the survey, but who were absent on pass, home on trial, having special treatment, boarded out or absent without leave.

#### Data provider

Data relating to the number of mental health and learning disability patients resident in hospital is sourced directly from HSC Trusts using the aggregate MILD Census Departmental information return.

#### Data quality assessment

Data is of 'Very Good' quality and is derived from a range of administrative systems (PAS, MAXIMS, EPEX and PARIS). Data providers have been issued with in-depth guidance providing instructions for recording, collection and submission of data, available from the link below.

<https://www.health-ni.gov.uk/publications/mental-illnesslearning-disability-mild-census-return>

In addition, across all data regardless of source, variance checks are employed as an integral part of the production process, with large discrepancies between the current year and the previous year being queried with the data provider.

#### Guidance on using data

Resident Population – this is the number of mental health and / or learning disability patients who were resident in hospital on 17 February each year.

This information is useful in determining the number of mental health and learning disability patients in hospital. This data provides a useful insight into the number of patients being treated / cared for in an inpatient setting.

Length of Stay – This is the length of time which the patient has been resident in the mental health / learning disability hospital. This data is useful in determining the long stay population, i.e. those patients who have been in hospital for a year or more.

### b. Compulsory Admissions under the Mental Health (NI) Order 1986

#### Description of the data

Data refers to the number of patients admitted to hospital who were detained at admission each year, whether or not they had been subsequently discharged.

All data is presented by the hospital on admission and gender of the patient, and then aggregated up to HSC Trust and Northern Ireland.

#### Data provider

Data relating to the number of compulsory admissions under the Mental Health (NI) Order 1986 is sourced directly from HSC Trusts using the aggregate KH15 and KH15b Departmental information returns.

#### Data quality assessment

Data is of 'Very Good' quality and is derived from a range of administrative systems (PAS, ELCID, MAXIMS, EPEX and PARIS). Data providers have been issued with in-depth guidance providing instructions for recording, collection and submission of data, available from the link below.

<https://www.health-ni.gov.uk/publications/admissions-under-mental-health-ni-order-1986-legal-status-kh15kh15b>

In addition, across all data regardless of source, variance checks are employed as an integral part of the production process, with large discrepancies between the current year and the previous year being queried with the data provider.

#### Guidance on using data

Compulsory admissions – this refers to mental health and learning disability patients who have been formally detained under the Mental Health (NI) Order 1986. Figures detail the number of compulsory admissions and not patients, as a patient may be detained more than once. It also does **not** include those admitted to hospital voluntarily.

This information is useful in determining the number of people being detained each year, by gender, under the Mental Health (NI) Order 1986. Where possible, information is presented for the last few years to provide a useful insight into the demand for compulsory admissions.

### **c. Patients Detained After Admission under the Mental Health (NI) Order 1986**

#### **Description of the data**

Data refers to the number of patients admitted to hospital on a 'Voluntary' basis, who became detained after admission each year, whether or not they had been subsequently discharged.

All data is presented by the hospital on admission, and then aggregated up to HSC Trust and Northern Ireland.

#### **Data provider**

Data relating to the number of patients admitted on a 'Voluntary' basis who became detained under the Mental Health (NI) Order 1986 after admission, is sourced directly from HSC Trusts using the aggregate KH16 Departmental information returns.

#### **Data quality assessment**

Data is of 'Very Good' quality and is derived from a range of administrative systems (PAS, ELCID, MAXIMS, EPEX and PARIS). Data providers have been issued with in-depth guidance providing instructions for recording, collection and submission of data, available from the link below.

<https://www.health-ni.gov.uk/publications/changes-legal-status-patients-kh16>

In addition, across all data regardless of source, variance checks are employed as an integral part of the production process, with large discrepancies between the current year and the previous year being queried with the data provider.

#### **Guidance on using data**

Detained After Admission – this refers to mental health and learning disability patients who were admitted to hospital on a 'Voluntary' basis but who became formally detained under the Mental Health (NI) Order 1986 after admission.

This information is useful in determining the number of people being admitted to hospital on a 'Voluntary' basis each year, who subsequently became detained after admission, under the Mental Health (NI) Order 1986.

### **d. Electro-Convulsive Therapy Treatments Administered and Patients Receiving Electro-Convulsive Therapy Treatment**

#### **Description of the data**

Data refers to (i) the number of electro-convulsive therapy treatments administered during each year, and (ii) the number of patients receiving ECT during each year.

All data is presented by the hospital providing the treatment, and then aggregated up to HSC Trust and Northern Ireland.

#### **Data provider**

Data relating to the number of patients receiving ECT and the number of ECT treatments administered a, is sourced directly from HSC Trusts using the aggregate KH17 Departmental information returns.

#### **Data quality assessment**

Data is of 'Very Good' quality and is derived from a range of administrative systems (PAS, ELCID, MAXIMS, EPEX and PARIS). Data providers have been issued with in-depth guidance providing instructions for recording, collection and submission of data, available from the link below.

<https://www.health-ni.gov.uk/publications/electro-convulsive-therapy-treatments-administered-kh17>

It is important to note that data on patients receiving ECT prior to 2021/22 may include a patient more than once if they received ECT in more than one quarter. Data for 2021/22 onwards has been de-duplicated for each quarter and should not include a patient more than once during a financial year.

In addition, across all data regardless of source, variance checks are employed as an integral part of the production process, with large discrepancies between the current year and the previous year being queried with the data provider.

## Appendix 2: Mental Health / Learning Disability Specialties in each Hospital during 2022/23

Hospital/HSC Trust	Specialities
<b>Belfast HSC Trust</b>	
Acute Mental Health Inpatient Unit	Mental Illness
Beechcroft CAMHS	Child & Adolescent Psychiatry
Iveagh Centre	Learning Disability
Knockbracken Healthcare Park	Mental Illness, Old Age Psychiatry, Forensic Psychiatry
Mater Infirmorum	Mental Illness
Muckamore Abbey	Learning Disability
<b>Northern HSC Trust</b>	
Causeway	Mental Illness
Holywell	Mental Illness, Old Age Psychiatry, Learning Disability
<b>South Eastern HSC Trust</b>	
Downshire	Mental Illness, Old Age Psychiatry
Lagan Valley PNU	Mental Illness, Old Age Psychiatry
Ulster MHU	Mental Illness
<b>Southern HSC Trust</b>	
Bluestone	Mental Illness, Old Age Psychiatry, Learning Disability
St Luke's	Old Age Psychiatry
<b>Western HSC Trust</b>	
Grangewood	Mental Illness
Lakeview	Learning Disability
Tyrone & Fermanagh	Mental Illness, Old Age Psychiatry
Waterside	Old Age Psychiatry

<sup>1</sup> Three wards from Mater Infirmorum and two wards from Knockbracken Healthcare Park transferred to Acute Mental Health Inpatient Unit when it opened in June 2019. Mental health wards still exist at Knockbracken Healthcare park but none remain at Mater Infirmorum.

### Appendix 3: About Hospital Information Branch (HIB)

Hospital Information Branch is responsible for the collection, quality assurance, analysis and publication of timely and accurate information derived from a wide range of statistical information returns supplied by the Health & Social Care (HSC) Trusts and the HSC Board. Statistical information is collected routinely from a variety of electronic patient level administrative systems and pre-defined EXCEL survey return templates.

The Branch aims to present information in a meaningful way and provide advice on its uses to customers in the HSC Committee, Professional Advisory Groups, policy branches within the DoH, other Health organisations, academia, private sector organisations, charity/voluntary organisations as well as the general public. The statistical information collected is used to contribute to major exercises such as reporting on the performance of the HSC system, other comparative performance exercises, target setting and monitoring, development of service frameworks as well as policy formulation and evaluation. In addition, the information is used in response to a significantly high volume of Parliamentary / Assembly questions and ad-hoc queries each year.

Information is disseminated through a number of key statistical publications, including: Inpatient Activity, Outpatient Activity, Emergency Care, Mental Health & Learning Disability and Waiting Time Statistics (Inpatient, Outpatient, Diagnostics and Cancer). A detailed list of these publications is available from:

<https://www.health-ni.gov.uk/topics/doh-statistics-and-research>

**Further information** on Mental Health and Learning Disability statistics in Northern Ireland, is available from:

## Appendix 4: A National Statistics publication

National Statistics status means that official statistics meet the highest standards of trustworthiness, quality and public value.

All official statistics should comply with all aspects of the UK Statistics Authority Code of Practice for Statistics. They are awarded National Statistics status following an assessment by the Authority's regulatory arm. The Authority considers whether the statistics meet the highest standards of Code compliance, including the value they add to public decisions and debate.

It is the DoH responsibility to maintain compliance with the standards expected of Statistics. If we become concerned about whether these statistics are still meeting the appropriate standards, we will discuss any concerns with the Authority promptly. National Statistics status can be removed at any point when the highest standards are not maintained, and reinstated when standards are restored.

This data was designated as National Statistics on 3rd June 2013.

Since the latest review by the Office for Statistics Regulation, we have continued to comply with the Code of Practice for Statistics, and have made the following improvements:

- Move the release date from September to August in order to release statistics as soon as they are ready.

- Improved the validation process for Trusts, and raising queries on data quality at the earliest stage.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed. Further information on the Code of Practice for Statistics is available at:

<http://www.statisticsauthority.gov.uk/assessment/code-of-practice/>

A list of those who received 24-hour pre-release access to this publication is available at:

<https://www.health-ni.gov.uk/topics/doh-statistics-and-research-mental-health-and-learning-disabilities/mental-health-and-learning-disability-statistics>

For enquiries about National Statistics, including production or achieving the standards set out by the Code of Practice for Statistics you can email the authority enquiries team ([authority.enquiries@statistics.gsi.gov.uk](mailto:authority.enquiries@statistics.gsi.gov.uk)) or phone 0845 604 1857 (Calls cost 5p per minute in addition to your phone company's access charge).
