Changes in methodology occurred during the period 1959-2019 eg

Out-of State

The CSO changed the methodology used to measure overnight trips taken by ROI residents in NI from 2016, and revised figures back to 2012, consequently, figures from 2012 onwards are not directly comparable with results prior to 2012.

Significant changes in methodologies used to measure GB and other overseas visitors occurred in 2010 and 2002, resulting in discontinuities of series.

Significant changes in the methodology used to measure domestic tourism occurred in 2011 and consequently figures from 2011 onwards are not directly comparable with figures pre 2011.

1959-2004 domestic trips and and revenue relate to holiday visits only. Figures from 2005 onwards relate to total domestic trips (i.e. holiday, VFR, business and other) therefore domestic figures from 2005 onwards are not directly comparable with previous years' figures
