

Coverage: Northern Ireland

Published: 28th August 2024 by Analytics Division (Department for Communities)

The NI Benefits Statistics Summary provides an up to date and concise overview of the benefits administered by DfC. Additional benefits statistics are available here.

¹With the introduction of Universal Credit (UC), there will be no new claimants to Income-based JSA, Income-related ESA and Income Support. UC was rolled out on a phased geographical basis from September 2017 to December 2018. ²Figures typically refer to claimants although Personal Independence Payment figures refer to claims in payment, Pension Credit refers to beneficiaries (claimants and partners) and Universal Credit refers to households. ³State Pension figures include estimates of the number of claimants made through the Get Your State Pension system. See Note 3 p.12 for more details.

What you need to know

The Department for Communities (DfC) publishes the Benefits Statistics Summary Bulletin each quarter. The DfC Benefit Statistics Summary brings together key statistics on the main DfC administered benefits.

Detailed **Personal Independence Payment (PIP)** and **Universal Credit (UC)** statistics are published in separate publications, available <u>here</u>.

Housing Benefit statistics are published in a separate publication. Housing statistics can be found here.

Note: The "Client Group Analysis" series of statistics has been suspended until further notice. These statistics will be resumed once a method of incorporating Universal Credit data into the analysis has been assessed as suitably robust.

Data notes

Figures are rounded to the nearest ten to protect individual records and some additional disclosure control has also been applied - figures are only slightly affected by these procedures. Totals may not sum due to rounding.

Time series are presented as a 5-year rolling period. Older figures are available on request.

Additional tables and data

In addition to the summary document, there are a large number of tables which enable the user to examine in further detail each benefit. These are provided to the user as:

• Supplementary benefit statistics tables – for each Benefit Statistics Summary release, Excel spreadsheets are produced containing a large number of tables with much more detailed breakdowns for each benefit:

https://www.communities-ni.gov.uk/topics/benefits-statistics

- Jobseeker Statistics for Northern Ireland statistics are available via NOMIS: <u>https://www.nomisweb.co.uk/Default.asp</u>
- Department for Work and Pensions (DWP) statistics are available at: https://www.gov.uk/government/organisations/department-for-work-pensions
- Geographic statistics are available on the NISRA Data Portal: <u>https://data.nisra.gov.uk/</u>

Further information on individual benefits including eligibility criteria is available from NI Direct: https://www.nidirect.gov.uk/information-and-services/money-tax-and-benefits/benefits-and-financial-support

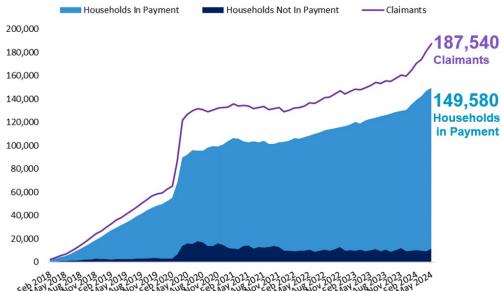

About these statistics

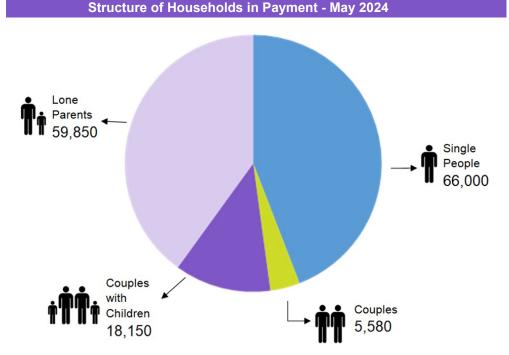

All of the statistics in this report are accredited official statistics except Universal Credit statistics which are currently designated as 'Official Statistics in development' (previously Experimental Statistics). It is hoped Universal Credit statistics will be designated as accredited official statistics in 2024/2025.

These official statistics were last independently reviewed by the Office for Statistics Regulation in November 2020. They comply with the standards of trustworthiness, quality and value in the <u>Code of Practice</u> for <u>Statistics</u> and should be labelled 'accredited official statistics'. See Note 2 for further information.

Universal Credit - Official Statistics in Development (previously Experimental Statistics)

Universal Credit Households & Claimants: November 2017 - May 2024

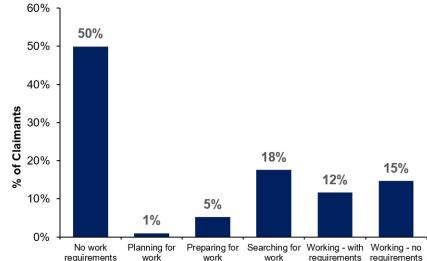

The migration of legacy benefits to UC, known as 'Move to UC', began in October 2023, since then 17,060 households have been migrated.

Key Facts

- In May 2024, 6,580 new households started on Universal Credit. Of these, • 3,350 were households which migrated to UC from legacy benefits.
- The number of households on Universal Credit increased from 149.310 in February 2024 to 161,180 in May 2024. The number of claimants reached 187,540.
- Of the 187,540 claimants on Universal Credit, 18% (32,960) were in the • 'searching for work' conditionality regime.
- In May 2024, 44% of Universal Credit households in payment were single • people without children and 40% were lone parents.
- The average amount of Universal Credit paid to the 149,580 households in payment was £920 per month.
- See Universal Credit publication for further information. •

3

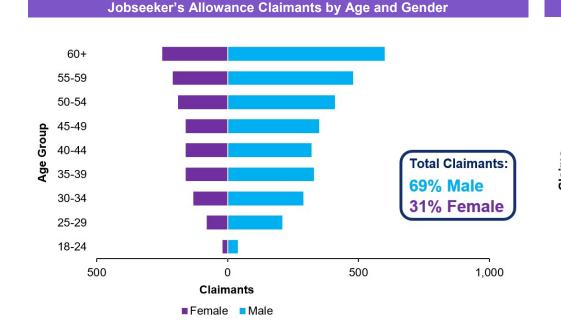

Jobseeker's Allowance - Accredited Official Statistics

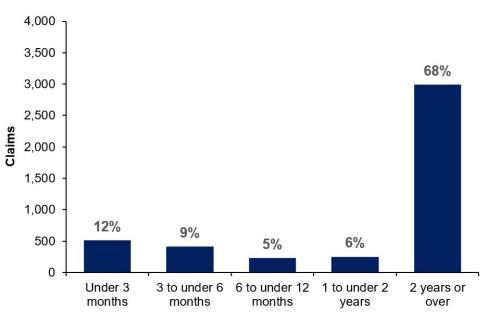

Jobseeker's Allowance Claimants: May 2019 - May 2024

Key Facts

The official source of statistics for unemployment related benefits is the experimental Claimant Count, which includes Jobseeker's Allowance claimants and out-of-work Universal Credit claimants who are claiming principally for the reason of being unemployed. Details can be found <u>here</u>. The DfC JSA figures are presented here to enable cross-benefit analysis and provide a wider range of breakdowns.

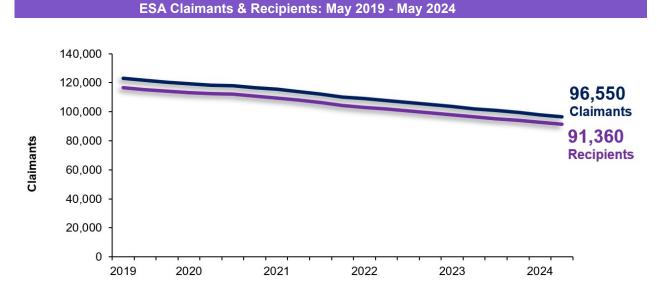

- With the introduction of Universal Credit, there will be no new claimants to Income-based JSA. However claims can still be made to New Style JSA, depending on claimants' National Insurance contributions.
- At May 2024, there were 4,380 claimants of Jobseeker's Allowance. This represents a decrease of 14% (690) on a year earlier and a decrease of 5% (220) since February 2024. The decreasing trend is largely due to the introduction of Universal Credit and the rise in claimants in early 2020 can be attributed to the impact of the COVID-19 pandemic.
- 68% (2,990) of JSA claims had a duration of 2 years or longer.
- The average weekly Jobseeker's Allowance benefit payment was £103.31.
- See supplementary tables for further information.

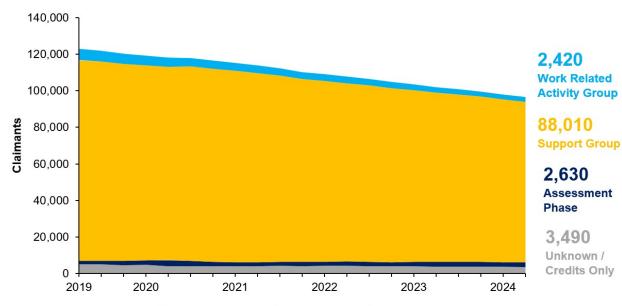

Jobseeker's Allowance Claims by Duration of Claim

Employment and Support Allowance - Accredited Official Statistics

ESA Claims by Phase of Claim: May 2019 - May 2024

Unknown/Credits Only Assessment Phase Support Group Work Related Activity Group

Key Facts

- At May 2024, there were 96,550 claimants of Employment and Support Allowance. This represents a decrease of 5% (5,480) on a year earlier. This decrease is mainly due to the introduction of Universal Credit.
- Of the 96,550 claimants, 52% (50,430) were female and 48% (46,120) were male.
- Of the 96,550 claimants, 3% (2,420) were in the Work Related Activity Group, 91% (88,010) were in the Support Group. The remaining 6% (6,120) were either in the assessment phase or were receiving credits only or their phase was unknown.
- The average weekly Employment and Support Allowance benefit payment was £176.55.
- See <u>supplementary tables</u> for further information. Note: due to the diminishing numbers of claimants, supplementary tables are no longer produced for Incapacity Benefit and Severe Disablement Allowance.

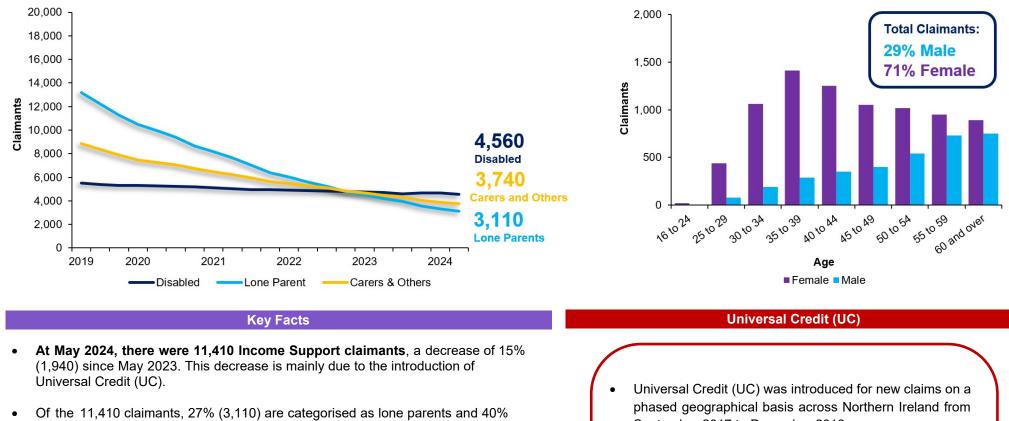

Incapacity Benefit & Severe Disablement Allowance

- Between 2010 and 2014, existing Incapacity Benefit and Severe Disablement Allowance customers were moved to ESA by reassessing their eligibility for the benefit. A small number of claimants remained on each benefit with numbers decreasing over time due to attrition.
- At May 2024, there were 900 claimants of Incapacity Benefit and 560 claimants of Severe Disablement Allowance, decreases of 90 and 80 respectively on a year earlier.

Income Support - Accredited Official Statistics

Income Support Claimants: May 2019 - May 2024

Income Support Claimants by Age and Gender

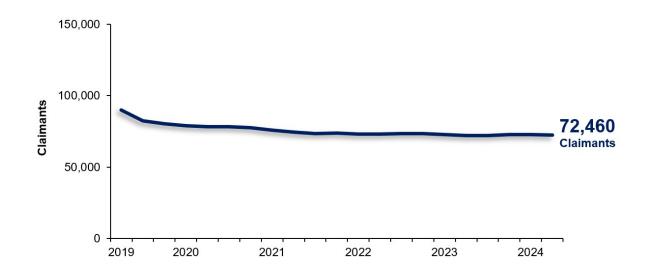

- (4,560) are disabled.
- The average weekly Income Support payment was £178.60 for a disabled claimant . and £68.08 for a lone parent.
- The number of lone parents has been affected by the Lone Parent Obligations policy • changes which came into effect in 2008. An extension of this is that from January 2017 existing Lone Parents with a youngest child aged 5 or over can no longer make a new or repeat claim for income support solely on the basis of their parental status. However, for this series Lone Parents are defined as "single claimants with a child under 16".
- See supplementary tables for further information.

- September 2017 to December 2018.
- With the introduction of Universal Credit, there will be no new claimants to the following benefits covered in this publication:
 - Income-based JSA
 - Income-related ESA
 - Income Support
- A summary of UC statistics is included in this bulletin. Detailed UC statistics are available via a separate publication.

Disability Living Allowance - Accredited Official Statistics

Disability Living Allowance Claimants: May 2019 - May 2024

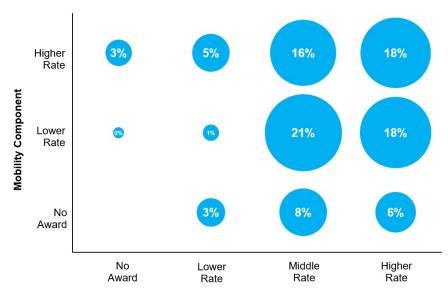

Key Facts

- At May 2024, there were 72,460 claimants of Disability Living Allowance, a fall of less than 1% (290) on a year earlier.
- There were 72,300 recipients of DLA (those actually in receipt of a payment).
- 45% (32,840) of claimants were children (under 16), 2% (1,320) were aged between 16 and 65 and 53% (38,310) were aged 66 and over.
- 17% (12,410) of claimants were claiming the care component only, 3% (2,180) were claiming the mobility component only and 80% (57,860) were claiming both the care and mobility components.
- 18% (13,030) of claimants were claiming the highest rate of award (i.e. higher rate mobility and higher rate care components).
- The average weekly Disability Living Allowance benefit payment was £123.21.
- See <u>supplementary tables</u> for further information.

- Personal Independence Payment (PIP) replaced Disability Living Allowance for claimants of working age on 20th June 2016. With the introduction of PIP there have been no new working age claimants to DLA from this date.
- The main reassessment of existing working age DLA claimants to PIP commenced in December 2016 and has now been completed. DLA claimants turning 16 will continue to be reassessed for PIP.
- A summary of PIP statistics is included in this bulletin. Detailed PIP statistics are available via a <u>separate publication</u>.

DLA Claimants by Care/Mobility Component

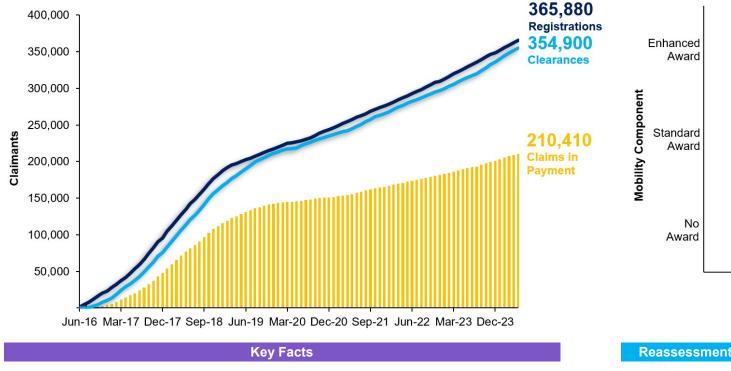

Care Component

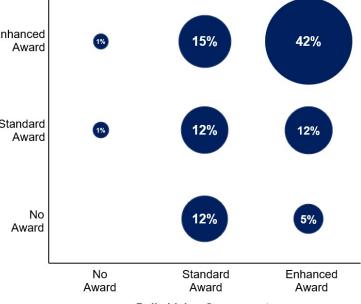

Personal Independence Payment - Accredited Official Statistics

PIP Registrations, Clearances, & Claims in Payment: June 2016 - May 2024

PIP Claims in Payment by Daily Living/Mobility Component

- Personal Independence Payment replaced Disability Living Allowance for claimants of working age on 20th June 2016.
- At May 2024, there were 210,410 Personal Independence Payment claims in payment. The overall award rate for normal rules Personal Independence Payment new claims with an assessment was 61%.
- 45% (94,920) of claims in payment had psychiatric disorders as the main disabling condition.
- 16% (34,220) of claims in payment were receiving the daily living component only, 3% (5,410) were receiving the mobility component only and 81% (170,780) were receiving both the daily living and mobility components.
- See <u>Personal Independence Payment publication</u> for further information.

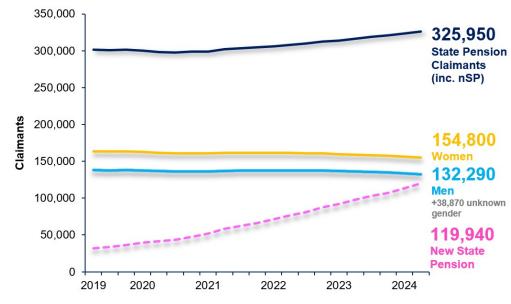

Daily Living Component

Reassessment of Disability Living Allowance Claimants

- The main reassessment of existing working age DLA claimants to PIP commenced in December 2016 and has now been completed. DLA claimants turning 16 will continue to be reassessed for PIP.
- 66% of DLA reassessed claims are granted an award of PIP (based on initial decision).
- Of the 210,410 claims in payment, 111,210 (53%) of these are reassessed DLA claims.
- Of the 111,210 reassessed DLA claims in payment, 93,400 (84%) received an award at the enhanced rate and 59,180 (53%) received the highest level of award (i.e. enhanced daily living component and enhanced mobility component).

State Pension - Accredited Official Statistics State Pension Claimants: May 2019 - June 2024

Key Facts

- At June 2024, there were 325,950 claimants of State Pension, a rise of 3% (9,350) on a year earlier.. Please note, State Pension figures include estimates of the number of claimants made through the Get Your State Pension system (38,870). For more information see note 3 on page 12.
- Of the claims for which gender information is held, 54% (154,800) were women and 46% (132,290) were men. The steady decrease of female State Pension claimants between 2012 and 2020 is due to increases in women's State Pension age. Pension age for men and women increased from 65 to 66 between November 2018 and October 2020. SP claimants has steadily increased from November 2020. Further information is available <u>here.</u>
- The average weekly State Pension amount in payment at June 2024 was £206.11, an increase of £17.31 since May 2023.
- New State Pension (nSP) was introduced for people reaching State Pension age from 6 April 2016. At June 2024, there were 119,940 nSP recipients.
- See <u>supplementary tables</u> for further information.

Pension Credit Claims by Type of Claim: May 2019 - May 2024	Key Facts
90,000 80,000 70,000 60,000 50,000 40,000 - 40,000 - - - - - - - - - - - - -	 At May 2024, there were 59,220 claimants of Pension Credit, a fall of 1% (790) on a year earlier. There were 68,600 beneficiaries (claimants and partners), a fall of 2% (1,440) on a year earlier. 86% (59,220) of beneficiaries were claimants and 14% (9,380) were partners. Of all beneficiaries (claimants and partners), 57% (39,280) were female and 43% (29,320) were male. Of all claimants, 62% (36,610) were female and 38% (22,610) were male.
30,000 -	• The average weekly Pension Credit benefit payment was £85.64.
20,000 - 21,770 10,000 - Guarantee and Savings Credit	 The downward trend in the number of Pension Credit claimants is mainly du to the increase in State Pension age and the increase in State Pensio amounts.
0	See <u>supplementary tables</u> for further information.

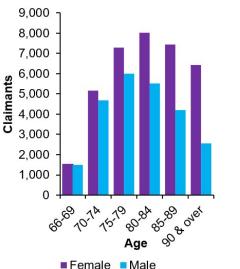

Attendance Allowance - Accredited Official Statistics

Key Facts

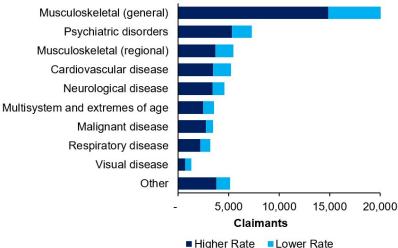

AA Claimants by Age and Gender

AA Claimants by Disabling Condition, May 2024

- At May 2024 there were 60.290 claimants of Attendance Allowance, an increase of 8% (4,390) on a year earlier.
- Of the 60,290 claimants, 58,240 (97%) were recipients and 2,050 (3%) were receiving credits only.
- 59% (35.860) of claimants were female and 41% (24,430) of claimants were male.
- 57% (34,140) of claimants were aged 80 or over.
- 71% (42,650) of claimants were receiving the higher rate of award.
- See supplementary tables for further information.

Carer's Allowance - Accredited Official Statistics

2019

2020

2021

Key Facts Carer's Allowance Claimants: May 2019 - May 2024 CA Claimants by Age and Gender At May 2024, there were 76,690 12,000 90,000 claimants of Carer's Allowance, an 11,000 increase of 1% (1,040) on a year 80.000 10,000 earlier. 9,000 70,000 8.000 28.850 Of the 76,690 claimants, 47,840 were Claimants 7,000 60,000 recipients and 28,850 were receiving **Credits Only** 6,000 Claimants credits only. 50,000 5,000 4,000 Of all claimants, 65% (50,070) were ٠ 40,000 3.000 female and 35% (26,630) were male. 2.000 30,000 47.840 1.000 Of all claimants, 68% (52,510) were of 20.000 Recipients 0 working age and 32% (24,180) were of under 25 35-44 45-54 55.65 66.74 25-34 15.84 Ś pension age. 10,000 0 Age

Request for User Feedback

DfC are continuing to reach out to users of this publication to better understand how the statistics are being used and whether there are any improvements that can be made.

We want to hear from people who use the figures within the Benefit Statistics Summary. We would like to find out what people use the statistics for and to make sure that the publication is as useful as it can be. Analytics Division also wishes to assess how we communicate with users on an ongoing basis.

We would appreciate if you completed a short questionnaire to give us your views on the publication. An online version of this questionnaire is available at the following link: <u>http://www.smartsurvey.co.uk/s/U2UE1/</u>

Alternatively, a hard copy can be requested by emailing analyticsdivision@communities-ni.gov.uk

Many thanks for your time.

Notes

1. Glossary of terms

Claimants:	The number of clients on the administrative system at the reference date.
Recipients/Beneficiaries:	The number of clients on the administrative system at the reference date who received a benefit payment. For Pension Credit this includes
	partners.
Households (Universal Credit):	Households are counted as being on Universal Credit where a claimant or claimants within the household are included in the count of
	claimants.
Credits Only:	The number of clients entitled to the benefit, but who do not actually receive a payment.

2. Accredited Official Statistics, Official Statistics in Development and Code of Practice

Accredited Official Statistics

<u>Accredited Official Statistics</u> are official statistics that have been independently reviewed by Office for Statistics Regulation (OSR) and confirmed to comply with the standards of trustworthiness, quality and value in the <u>Code of Practice for Statistics</u>. Producers of accredited official statistics are legally required to ensure they maintain compliance with the Code. Accredited official statistics are called National Statistics in the Statistics and Registration Service Act 2007.

These accredited official statistics were independently reviewed by OSR in 2013 as part of the Assessment of Benefit Statistics Summary for Northern Ireland, with accreditation confirmed in June 2013. They comply with the standards of trustworthiness, quality and value in the Code of Practice and should be labelled National Statistics (or 'accredited official statistics'). In November 2020, a <u>compliance check</u> confirmed that the designation (or accredited official statistics labelling) should continue.

Official Statistics in Development

Universal Credit Statistics are currently designated as 'Official Statistics in Development' (previously called Experimental Statistics), these are new and undergoing development. They are published to involve users and stakeholders in their development and as a means to ensure they will meet user needs going forward. As these statistics are still in development, they are subject to retrospective revision in any future releases. The methodology and quality assurance are still in development and are subject to change.

Feedback on these Universal Credit statistics is particularly welcome from users and will be used to further develop the statistics. (Northern Ireland Universal Credit statistics feedback survey).

Code of Practice

Our statistical practice is regulated by OSR. They set the standards of trustworthiness, quality and value in the Code of Practice for Statistics that all producers of official statistics should adhere to. You are welcome to contact us directly with any comments about how we meet these standards using the contact details. Alternatively, you can contact OSR by emailing regulation@statistics.gov.uk or via the OSR website.

3. Data source and quality

All statistics are based on 100% extracts from the benefit administrative systems. Data is partially validated and is deemed of sufficiently high quality to report on. Data is extracted at 2 weekly, 4 weekly or 6 weekly intervals. Data is represented as end of reported month to aid presentation, but actual extract data will not generally be exactly this date. The statistics show the number of people claiming benefit on the extract date.

State Pension data extracts are not available as regularly as for other benefits. For this reason, the reporting date of State Pension may not align exactly with the other benefits in this publication. For example, November's publication may contain State Pension data at December because no data is available for November.

As data is taken from live administrative systems, it relies on the customer reporting correct information about themselves and staff correctly inputting this data into the system. This does not always occur. Recent estimates (2023) indicate that approximately 4.0% of expenditure on benefits is misallocated due to fraud and error. Additional errors that do not result in an incorrect payment can also occur. The Department engages in initiatives to reduce fraud and error in the benefit systems on an ongoing basis.

From July 2020, new claims to State Pension have been administered through the Department for Work and Pension's (DWP) "Get Your State Pension" (GYSP) online service. At present, the Department for Communities is using Management Information (MI) systems to estimate the overall total number of GYSP claimants. This is because the provision of further, more detailed, information on these GYSP claims is still at the development stage in DWP. The MI estimates used to derive State Pension totals in this publication are likely to overestimate the total number of GYSP claims because it will include people who have not yet reached State Pension age and also some deceased claimants. The overcount is currently likely to be around 1% of the total State Pension Caseload, caution should therefore be exercised when using these statistics. Revisions to the estimates will be made in future editions once DWP have completed their developments and provided further detail about the GYSP claimants.

4. Rounding/Disclosure control

The accuracy of statistics may be slightly effected by rounding and/or disclosure control. Even when data (either administrative or sample) do not contain National Insurance number, name and address it may still be possible to identify someone. Say, for example, a data table showed disability type, by ethnicity, within small geographic areas. Some of the cells in the table may only contain one person. It is possible in such cases for personal and sensitive information to be deduced. This is data disclosure and in DfC steps are taken to ensure that it doesn't happen. As an additional protective measure, details of the disclosure control methodology are not published.

5. Measure of unemployment related benefits

The official source of statistics for unemployment related benefits is the experimental Claimant Count, which includes Jobseeker's Allowance claimants and out-ofwork Universal Credit claimants who are claiming principally for the reason of being unemployed. Details can be found <u>here</u>.

The DfC JSA figures are presented in this publication because they are consistent with the other benefits used to produce DfC Accredited Official Statistics and permit a wider set of breakdowns and cross-benefit analysis.

6. Universal Credit Conditionality Regimes

Conditionality regime specifies the category a claimant is in at the end of any given month. Conditionality refers to those work-related activities an eligible adult will have to carry out in order to retain eligibility for Universal Credit. Each eligible adult will fall into one of six conditionality regimes based on their capacity and circumstances. Different members of a household may be subject to the same or different requirements. As circumstances change claimants can also transition between different levels of conditionality.

The conditionality regimes within this publication have been taken from the Universal Credit Full Service system (UCFS) and renamed in order to aid the reader. 'No work requirements' covers the UCFS category 'no work related requirements', 'planning for work (light touch out of work)', 'preparing for work (work preparation and work focused interview)', 'searching for work (intensive)', 'working with requirements (light touch in work)' and 'working no requirements (no work related requirements)'. Conditionality Regimes are detailed in the following table:

No work requirements	Not expected to work at present. Health or caring responsibility prevents claimant from working or preparing for work.
Planning for work	Expected to work in the future. Lone parent/lead carer of child aged 1. Claimant required to attend periodic interviews to plan for their return to work.
Preparing for work	Expected to start preparing for future even with limited capability for work at the present time or parent of a child aged 2. The claimant is expected to take reasonable steps to prepare for working including Work Focused Interview.
Searching for work	Not working, or with very low earnings. Claimant is required to take action to secure work - or more/better paid work. The Work Coach supports them to plan their work search and preparation activity.
Working - with requirements	In work but could earn more, or not working but has a partner with low earnings.
Working - no requirements	Individual or household earnings over the level at which conditionality applies. Required to inform Department for Communities of changes of circumstances, particularly if at risk of decreasing earnings or losing job.

7. Welfare Reform

Universal Credit (UC) was introduced for new claims on a phased geographical basis across Northern Ireland from September 2017 to December 2018. With the introduction of UC, there will be no new claimants to the following benefits covered in this publication: Income-based JSA, Income-related ESA and Income Support. A summary of UC statistics is included in this bulletin. Detailed UC statistics are available via a <u>separate publication</u>.

From 20 June 2016, DLA has been replaced for working age claimants by Personal Independence Payment (PIP). There have been no new working age claimants to DLA from this date. Reassessment of existing DLA claimants to PIP began in December 2016 and has now been completed. Claimants turning 16 will continue to be reassessed for PIP. A summary of PIP statistics is included in this publication. Detailed PIP statistics can be found in a separate publication here.

State Pension age for women increased from 60 to 65 between May 2010 and November 2018 and then increased from 65 to 66 for both men and women between November 2018 and October 2020. State Pension age is currently scheduled to remain at 66 until April 2026. More information is available from <u>NI Direct</u>.

The Lone Parent Obligation policy came into effect from 24th November 2008; Lone Parents with a youngest child aged 12 or over were no longer able to make a new or repeat claim for Income Support solely on the basis of their parental status. Existing Income Support Lone Parents with a youngest child aged 12 or over had their eligibility removed over a period of time commencing 2nd March 2009. From October 2009, this policy was extended to Lone Parents with a youngest child aged 10 or 11 and from October 2010, was extended to Lone Parents with a youngest child aged 7 or over. From January 2017, the policy has been extended to Lone Parents with a youngest child aged 5 or over. Many affected Lone Parents will leave Income Support and claim Jobseeker's Allowance. However, there are exceptions to these rules where the youngest child can legitimately be over the ages mentioned above. Similarly, some former Lone Parents remain on Income Support for other reasons (e.g. they have a long term caring responsibility and claim Carer's Allowance). However for this series, lone parents are defined as "single IS claimants with a child under 16".

8. Known issues, changes and revisions

Changes for this release

'Accredited Official Statistics' replaces the designation 'National Statistics'.

Previous changes

February 2024 (released May 2024) Disabling condition categories for Attendance Allowance claimants updated.

November 2020 (released February 2021) References to "working age" and "pension age" have been updated to reflect the fact that State Pension age is 66 exactly from October 2020 and will remain there until 2026. Some age bands in tables and reference population estimates have been changed to reflect this.

9. Great Britain statistics

Benefit statistics to cover Great Britain (England, Scotland and Wales) only are produced by the Department for Work and Pensions (DWP) and are available here.

10. Other National and Official Statistics issued by the Department for Communities

Other Accredited Official Statistics and Official Statistics produced by the Department for Communities can be found on the DfC website here.
