

Northern Ireland Housing Statistics 2021-22

Release date 15/12/2022

Annual publication

The Northern Ireland Housing Statistics is an annual compendium of statistics which provides information on a range of areas relating to housing. The report is divided into sections covering supply, energy, social renting demand, private renting demand, owner occupier demand and household characteristics.

Key points

Supply

Energy

- The Affordable Warmth Scheme has improved 2,841 homes in 2021/22.
- Between 2012-13 and 2021-22 47,887 boiler replacement grants were approved, amounting to £32 million.

Social renting demand

- On 31 March 2022 there were 44,426 applicants on the social housing waiting list.
- Of these applicants, 31,407 were in 'housing stress'.
- In 2021-22 10,135 households were accepted as statutorily homeless.

Private renting demand

Average weekly rent

Owner occupier demand

- In Quarter 3 of 2022, the House Price Index stands at 158.8.
- This is a 10.7% increase since the same quarter in 2021.
- The standardised house price for this quarter is £176,131.

HPI reference period: Q1 2015=100

Household characteristics

Lead Statistician: Katie McFadden

Housing Team: Lesley Curry, Connie Callaghan

Introduction

This annual compendium of statistics contains information on a range of areas relating to housing. The report is divided into sections covering: supply; energy; social renting demand; private renting demand; owner occupier demand and household characteristics. In this summary document you will find quick and concise coverage of each of these topics. More in depth statistics and information on methodology can be found in the accompanying tables and appendix documents at:

<https://www.communities-ni.gov.uk/publications/northern-ireland-housing-statistics-2021-22>

Professional Services Unit (PSU) receives data for this report from a number of data providers. PSU carries out a number of validation checks to quality assure all data received, however, responsibility for accuracy of the data supplied lies primarily with the source.

The Northern Ireland Housing Statistics 2021-22 is the sixth edition of this series to reflect a restructuring of format. These changes were introduced with the intention of creating a simplified and visually appealing format that will help explain the statistics and aid understanding.

The United Kingdom Statistics Authority has designated these statistics as National Statistics.

National Statistics status means that official statistics meet the highest standards of trustworthiness, quality and public value. All official statistics should comply with all aspects of the Code of Practice for Statistics. They are awarded national statistics status following an assessment by the Authority's regulatory arm. The Authority considers whether the statistics meet the highest standards of code compliance, including the value they add to public decisions and debate.

The continued designation of the Northern Ireland Housing Statistics report as a National Statistic was confirmed in January 2019 following a [compliance check](#) by the Office for Statistics Regulation. PSU have made a number of improvements to comply with the Code of Practice for Statistics, including hyperlinks to the data tables and appendices within the release, allowing users to access them directly to enhance accessibility and enhanced [quality assurance of administrative data](#). For further examples and more information see Notes, page 11.

This report presents figures for the period April 2021 - March 2022. Users should note that Government rules in response to the global COVID-19 pandemic would have impacted housing market activity and subsequent collection of data in this period.

Section One - Supply

This section provides a wide range of information relating to housing supply. Detailed data on housing stock, tenure, new dwelling starts and completions, volume of construction, and planning applications and decisions can be found in the [accompanying tables](#).

Household tenure 2021-22*

- Owned outright
- Owned with mortgage
- Rented- NIHE
- Rented from housing association
- Rented privately
- Rent free

- In 2021/22, dwellings that were owned outright and dwellings that were owned with a mortgage accounted for 73% of households (45% and 28% respectively).
- In the same period, 13% of properties were privately rented and 4% were rented from housing associations. NIHE rented properties made up 9% of households.

Key housing supply figures

This is a 1% increase from 2021 (814,210)

Average household size
Census 2021: **2.44**

Total stock per 1,000 population
2021-22

Social Housing Development Programme 2021-22

- The Social Housing Development Programme (SHDP), managed by NIHE, provides grant funding to housing associations so that they can build or acquire new social housing.
- Since 2010/11, 17,148 social houses have been completed through this scheme. Of these, 97% were self-contained and 3% were shared.
- In 2021/22, there were 1,713 SHDP starts, a 29% decrease on 2020/21 (2,403).
- In the same period, there were 835 SHDP completions, a 36% decrease on 2020/21 (1,304).

* Please note that the Continuous Household Survey methodology changed in 2020-21 and 2021-22 in response to the COVID-19 pandemic. As a result, caution should be taken in reaching any conclusions based on 2020-21 and 2021-22 data and comparisons with previous years. For more information see [Appendix – Section One](#)

Section One - Supply

Building control starts & completions 2021-22*

Residential planning decisions granted 2021-22

Map based on Planning DFI data and developed by Professional Services Unit, DfC. © Crown Copyright and database rights MOU209

Decisions granted

- 500-599 (2)
- 600-699 (3)
- 700-799 (1)
- 800-899 (3)
- 900-1,100 (2)

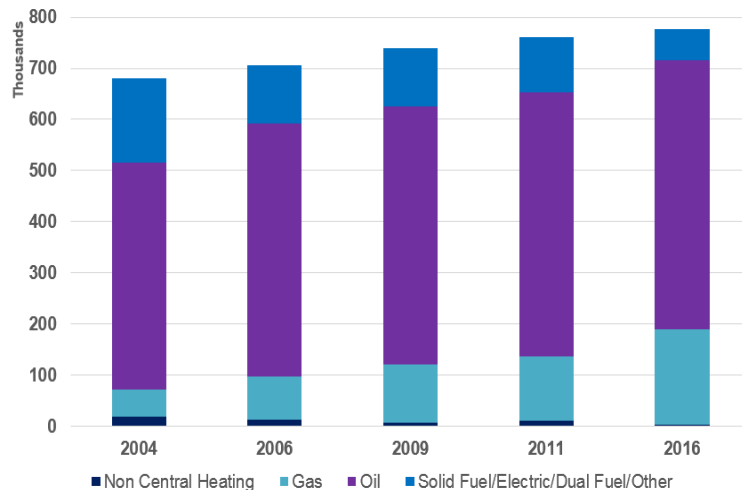

- Of the 8,846 planning decisions made in 2021-22, 95% were granted (8,408).
- The highest proportions of residential planning decisions granted related to urban extensions and alterations (28%) and rural new single dwellings (25%).
 - Newry, Mourne and Down received the greatest number of residential planning applications during 2021-22 (1,232), however, the proportion of decisions granted was lower than for the other local government districts.

* Please note that this publication reports on two different measures of social housing: Building Control and SHDP. These figures often differ from each other but this is not due to error. The same social housing units are recorded by both data providers, the difference lies in when they are recorded. For more information see [Appendix – Section one.](#)

Section Two - Energy

This section provides information relating to domestic energy. Detailed data on household fuel type, energy efficiency, Warm Homes Scheme and Boiler Replacement Scheme can be found in the [accompanying tables](#).

Central heating by fuel type 2016

- Information on central heating is taken from the House Condition Survey (HCS), the most recent of which is the 2016 edition.
- The 2016 HCS defines central heating as a heating system with a distribution system sufficient to provide heat in at least two rooms.
- The percentage of homes with central heating has risen from 95% in 2001 to over 99% in 2016.
- Gas has seen the largest increase in installations in this time frame, whilst solid fuel, electric and dual system heating systems have decreased.
- In 2016, oil central heating accounted for 68% of heating systems. This was followed by gas at 24%.

Affordable Warmth Scheme 2021-22

The Affordable Warmth Scheme, introduced in September 2014, is targeted at fuel poor households in the private sector.

There were a total of 2,787 approvals issued in 2021/22 and a total of 2,841 homes were improved in 2021/22 at a cost of £11.8 million.

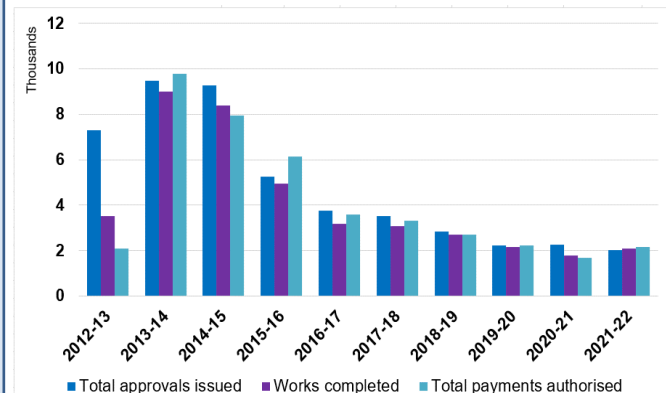

Standard Assessment Procedure (SAP) ratings 2016

SAP is the Government's recommended system for home energy ratings as it allows comparisons of energy efficiency. The SAP rating is expressed as a logarithmic scale, which normally runs from 1 (very inefficient) to 100 (no energy costs).

In 2016, social housing (NIHE and housing associations) had the highest SAP rating of all tenures at 72.63. The private rented sector and owner occupied dwellings had ratings of 65.33 and 65.11 respectively.

Boiler Replacement Scheme 2021-22

- The Boiler Replacement Scheme is a DfC scheme, administered by the Housing Executive.
- The scheme is for owner occupiers whose gross annual income is less than £40,000 and is to help with the cost of replacing boilers over 15 years old.
- Between 2012-13 and 2021-22, 47,887 grants were approved amounting to £32 million. This equates to an average of £673 per household. Of these, 40,816 replacements have been completed.

Section Three – Social renting demand

This section provides information relating to the social rented sector (Northern Ireland Housing Executive & housing associations). Detailed data on average weekly rents, housing benefit receipt, social housing waiting lists and allocations and homelessness can be found in the [accompanying tables](#).

Waiting lists, housing stress & allocations 2021-22

- The Housing Executive holds data on all housing applications and allocations made through the social housing selection scheme in the Housing Management System.
- The total number of applicants on the waiting list (with no existing NIHE/housing association tenancy) at 31 March 2022 was 44,426.
- Of these applicants, 31,407 were in 'housing stress'. This means they have 30 or more points under the social housing selection scheme.
- The local government districts with the highest number of applicants were Belfast (12,237) and Derry City and Strabane (5,531).
- The number of properties allocated by the NIHE and housing associations to applicants on the waiting list who were not already social sector tenants was 6,010. This equated to 69% of total allocations made in 2021/22.
- The remaining properties (2,698) allocated by the NIHE and housing associations in 2020/21 were to tenants who had applied for a transfer from an existing tenancy. This equated to 31% of total allocations made in 2021/22.

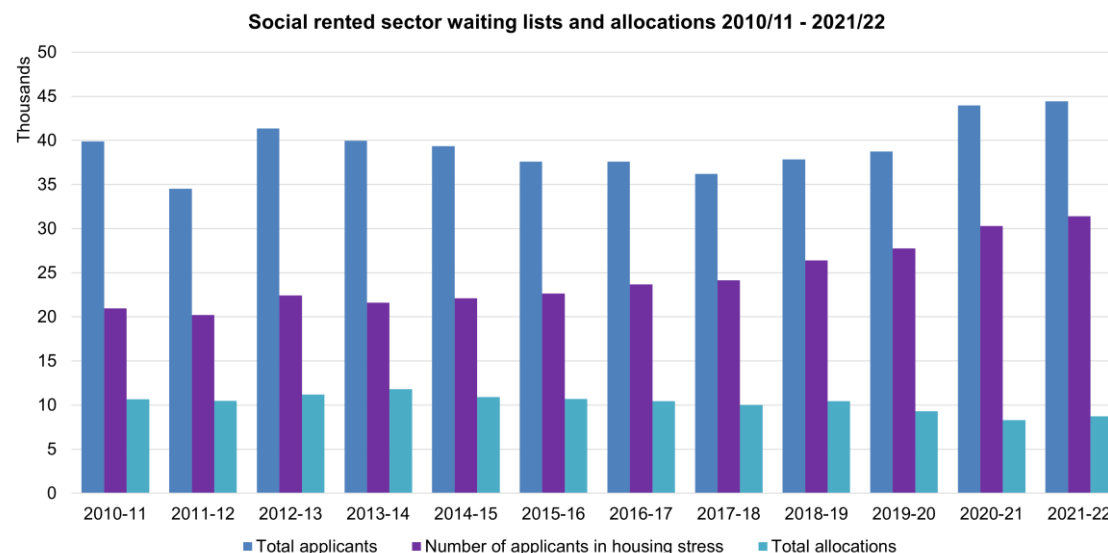

Social rented sector waiting lists by LGD 2021-22

Waiting List

- 2,000 - 2,799 (3)
- 2,800 - 3,399 (3)
- 3,400 - 3,799 (2)
- 3,800 - 5,999 (2)
- 6,000 - 12,300 (1)

Map based on Northern Ireland Housing Executive (NIHE) data and developed by Professional Services Unit, DfC. © Crown Copyright and database rights MOU209

Section Three – Social renting demand

Homelessness 2021-22*

Top reasons for presenting as homeless

- Accommodation not reasonable
- Sharing breakdown/family dispute
- Loss of rented accommodation
- Marital/relationship breakdown
- Neighbourhood harassment
- Domestic Violence
- No accommodation in Northern Ireland
- Other

Who is accepted as homeless?

Families (36%) and single males (26%) were the household types with the highest proportion of homelessness acceptances in 2021/22.

Within the single males category, those aged between 26 and 59 were the highest acceptances of homelessness with 2,045 cases.

Full duty applicants 2021-22

- Full duty applicant (FDA) status is granted to a household presenting as homeless once the NIHE makes enquiries to check if the household is eligible for assistance.
- The NIHE needs to determine that the household has a priority need for accommodation and that they did not become homeless or threatened with homelessness intentionally.
- Once a household is granted FDA status the NIHE has an obligation to ensure that accommodation becomes available for these households to occupy.
- In 2021-22, of the 15,758 households presenting as homeless, 64% were accepted as full duty applicants (10,135 households) and 19% were rejected (2,998). Of those households accepted as full duty applicants during the year, 2,146 were discharged (Refer to [Appendix 3](#) for definitions of each outcome).

*For more in depth information regarding homelessness in Northern Ireland please refer to the latest edition of the [Northern Ireland Homelessness Bulletin](#), which is published by PSU on the DfC website.

Section Four – Private renting demand

This section provides information relating to private renting demand. Detailed data on average rent and length of time of residence for private renters can be found in the [accompanying tables](#).

Key points

- Estimates in this section are taken from the Family Resources Survey (FRS). The survey has been carried out in Northern Ireland since 2002-03, while it has been running in Great Britain since 1992.
- Data collection for the FRS in 2020/21 was impacted by COVID-19 restrictions resulting in a heavily reduced sample size. This has led to additional uncertainty around the estimates. As such, for 2020/21, it is not possible to publish all of the usual analysis.

Average weekly rent

- The estimated average (median) rent per week for the private rented sector in Northern Ireland in 2020-21 was £114, £38 below the UK average (£152) and lower than England (£160), Scotland (£115) and Wales (£127).
- The estimated average (median) rent per week for the social rented sector in Northern Ireland in 2020-21 was £80, £12 lower than the UK average (£92) and £34 lower than that of the private rented sector (figures may not sum due to rounding).

Time in residence (*analysis not available for 2020/21 due to reduced sample*)

- In 2019-20 across the UK, 23% of private renters had resided in their accommodation for less than 12 months compared with 16% in Northern Ireland. The proportion residing at their current address for five years or more was 28% across the UK compared to 40% in Northern Ireland.

Estimated median weekly rent 2020-21

Social rented sector

Private rented sector

Section Five – Owner occupier demand

This section provides information relating to owner occupied housing. Detailed data on the Northern Ireland House Price Index, National House Building Council (NHBC) new house sales and prices, the Northern Ireland Co-Ownership Housing Scheme, mortgages and mortgage possessions can be found in the [accompanying tables](#).

House Price Index – Quarter 3 July-September 2022

- The NI House Price Index has been designed and produced by Land and Property Services to provide a measure of change in the price of a standardised residential property sold in Northern Ireland.
- The index uses information on all verified residential property sales as recorded by Her Majesty's Revenue & Customs (HMRC).
- The reference base period is Quarter 1 2015 and the index is set to 100 for that period. Results for the most recent quarter are provisional and subject to revision.
- The NI HPI currently stands at 158.8 in the third quarter of 2022.
- The overall index showed an increase of 4.1% since the previous quarter in 2022, and it has increased by 10.7% since the same quarter in 2021.
- Verified residential property sales are defined as sales recorded by HMRC which could be matched to a domestic property in the NI Valuation List.
- In Quarter 3 2022 there were 6,402 verified residential property sales. This was an decrease of 24.4% on the same quarter of 2021.

Section Five – Owner occupier demand

NHBC new dwelling sales and prices 2021-22

- Data for new house sales and prices are derived from information provided by solicitors to the National House Building Council (NHBC). NHBC's primary purpose is to help raise standards to protect homeowners. NHBC is an independent non-profit distributing company, reinvesting all resources in further research and work to improve the construction standard of new UK houses for the benefit of homeowners.
- The average price of NHBC-registered new houses peaked in 2007-08 at £210,700. The average annual price stands at £202,700 for 2021-22, an increase of 1% on 2020-21 (£200,900). Note that the monetary amounts for individual years have not been adjusted to account for inflation.
- From a peak of 7,005 sales in 2004-05, the number of NHBC new house sales showed a general decline to 1,142 sales in 2013-14. From 2014-15 until 2018-19, the general trend in the number of sales reversed slightly, reaching 1,613 in 2018-19. Following decreases in both 2019-20 and 2020-21, the number of sales recorded for 2021-22 was 1,458, an increase of 3.6% from the previous year (1,408).

**Average selling price of new NHBC registered houses
2006-07 to 2021-22**

First time buyers: Lending and affordability

Mean income:
£40,090

Mean age:
32

- The number of loans granted to first-time buyers rose year-on-year, from 2,900 in 2008 to 10,800 in 2019. Following a decline in 2020 (8,600), the number of loans granted in 2021 increased to 12,200.
- During the same thirteen year period, the mean percentage advance for first-time buyers generally increased from 70% (2008) to 77% (2021), with a small amount of fluctuation in the intervening years.
- The mean capital and interest payments as a percentage of income for first time buyers was 28.9% in 2008. This percentage for first-time buyers has generally fallen over the 13 year period to 15.8% in 2021.

Section Six – Household characteristics

This section provides information relating to a range of household characteristics. Detailed data on household projections, household type, tenure and household income and expenditure can be found in the [accompanying tables](#).

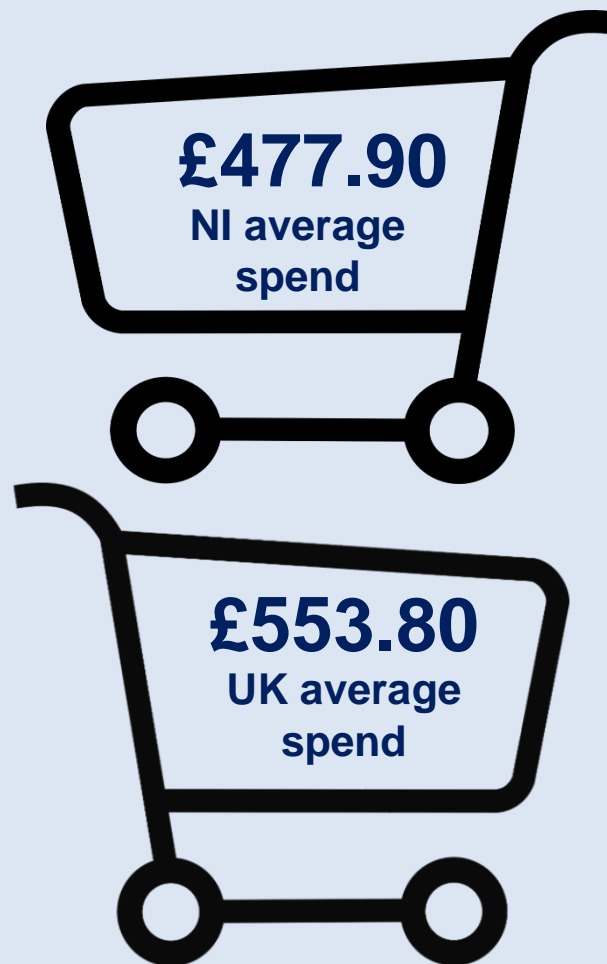

Household income by tenure 2020/21**

- Results from the 2020-21 Family Resources Survey show that households with the highest housing costs were in the private rented sector, at £110 per week. This compares to estimates of £85 in the social rented sector and £40 for those buying with a mortgage.
- Those buying with a mortgage had the highest estimated average weekly household income of £1,051, followed by those who owned outright (£749) and private renters (£658). The social rented sector had the lowest estimated average weekly income of £421.

Satisfaction with home, 2021-22**

- Overall, 90% of adults were satisfied with their home (house/apartment or flat).
- Adults living in the least deprived areas were more likely to be satisfied with their home (95%) than those living in more deprived areas (81%).
- Adults without a disability were more likely to be satisfied with their home (92%) than adults who have a disability (86%).

Estimated weekly household expenditure NI & UK 2019-21*

* For a full list of what 'average spend' encompasses, refer to [Table 6.8 and Appendix- Section six](#).

Average rates bill 2021-22

Average Rates Bill (£)

- 900 - 949 (1)
- 950 - 999 (3)
- 1,000 - 1,049 (3)
- 1,050 - 1,099 (1)
- 1,100 - 1,149 (1)
- 1,150 - 1,199 (2)

Map based on DoF data and developed by Professional Services Unit, DfC. © Crown Copyright and database rights MOU209

- Rates are a property tax based on the valuation of homes in Northern Ireland. The income from rates provides funding for services at both local (council) and regional (NI Assembly) levels.
- In 2021-22 the average rates bill was £1,036.
- The highest average bill payable was in Ards and North Down (£1,174) and the lowest was in Belfast (£923).

** Due to the impacts that COVID-19 restrictions have had on the methodology and data collection of the Continuous Household Survey and the Family Resources Survey, please take caution in reaching any conclusions based on 2020-21 and 2021-22 data and comparisons with previous years. For more information see [Appendix – Section Six](#)

1. Changes for this release

Table 3.3c 'Housing Associations: Average weekly rent' is a new series of the data provided to PSU by DfC Housing Regulation Branch. Housing Regulation Branch within the Department for Communities (DfC) collects information on social housing stock owned by housing associations registered with DfC. This information is used to produce Table 3.3c (and previously 3.3a and 3.3b).

Table 3.12 'Households accepted as homeless by household type': An additional table reporting on all households accepted as homeless in Northern Ireland between 2018-19 and 2021-22, by household type, has been included. Data are recorded by the Housing Executive in its Housing Management System (HMS).

Table 6.12 'Satisfaction with house/apartment/flat' is an additional table which reports the results from the Continuous Household Survey. It reports on satisfaction with house/apartment/flat based on gender, age, religious background, marital status, disability, dependants, level of deprivation, and whether you live in a urban or rural environment.

2. Previous release changes

Due to a change in data collection methodology the information provided to PSU by DfC Housing Regulation and Inspection Branch, for the purpose of producing Table 3.3b, can no longer be analysed to produce figures for average weekly rent and annual collectible rent which are comparable to those published up to and including the year 2015-16. These figures have therefore been included in the report as a historical table, to which further updates have been discontinued.

Table 6.7, 'Difference from bedroom standard by tenure' has been discontinued as the data provider no longer uses the software (SIRXS) previously used to derive the variable 'difference from bedroom standard' for different tenures, and as such can no longer provide these figures.

Table 6.7 (previously Table 6.8), 'Average gross weekly household income and expenditure by UK region, financial year ending March 2016 to financial year ending March 2018' has been published with the following footnote to reflect a change in methodology in the calculation of the variable 'average gross weekly household income': 'Figures for 'average gross weekly household income' are not directly comparable to data published within this report in previous years. This is due to a change in methodology. Data for the financial year ending 2018 are based on person-level analysis, while years previous are based on household-level'.

Tables 6.7 and 6.8 (previously Tables 6.8 and 6.9): In addition, the following footnote, identifying an error in the Living Cost and Food (LCF) Survey, has also been added to Tables 6.7 and 6.8: *An error has been identified in the Living Cost and Food (LCF) Survey which has been found to impact the Family spending in the UK: April 2017 to March 2018 release. This affects, to a small degree, most estimates of average expenditure. The overall impact is that average weekly household expenditure in the UK is underestimated by around 0.5%, while the interpretation of the statistics remains the same.*

3. User engagement

Northern Ireland Housing Statistics:

User feedback is welcome so we would like to encourage your participation in our [user engagement survey](#), and thank you in advance.

4. National Statistics

Since the latest review by the Office for Statistics Regulation, the following improvements have been made in order to continue to comply with the Code of Practice for Statistics:

- **Accessibility:** Accessibility has been enhanced through additional signposting, clear labelling of appendices and provision of hyperlinks to supporting information. Data has also been made available in Open Source format.
- **QAAD:** In order to introduce greater clarification within the associated Quality Assurance of Administrative Data (QAAD) document, PSU have thoroughly reviewed processes behind data acquisition and subsequent data publication. This has resulted in the inclusion of additional detail, rationale and examples, in regard to data provision, checking and validation; ultimately allowing for better justification of assurance levels.

The statistics last underwent a [full assessment](#) against the [Code of Practice](#) in 2012-2013.

It is the Department for Communities' responsibility to maintain compliance with the standards expected of National Statistics. If we become concerned about whether these statistics are still meeting the appropriate standards, we will discuss any concerns with the Authority promptly. National Statistics status can be removed at any point when the highest standards are not maintained, and reinstated when standards are restored.

For enquiries about National Statistics, including production or achieving the standards set out by the Code of Practice for Statistics you can email the authority enquiries team (authority.enquiries@statistics.gsi.gov.uk) or phone **0845 604 1857** (Calls cost 5p per minute in addition to your phone company's access charge). If you would like to write to the National Statistics office, please send letters to: **UK Statistics Authority, 1 Drummond Gate, London, SW1V 2QQ.**

This report can be found on:

www.communities-ni.gov.uk
