LIMITATIONS

This report is presented to Department for Infrastructure (DfI) in respect of A5 Western Transport Corridor and may not be used or relied on by any other person. It may not be used by DfI in relation to any other matters not covered specifically by the agreed scope of this Report.

Notwithstanding anything to the contrary contained in the report, WSP Limited is obliged to exercise reasonable skill, care and diligence in the performance of the services required by DfI and WSP Limited shall not be liable except to the extent that it has failed to exercise reasonable skill, care and diligence, and this report shall be read and construed accordingly.

This report has been prepared by WSP Limited. No individual is personally liable in connection with the preparation of this report. By receiving this report and acting on it, the client or any other person accepts that no individual is personally liable whether in contract, tort, for breach of statutory duty or otherwise.

1. INTRODUCTION

1.1. BACKGROUND

1.1.1. WSP, on behalf of the Department for Infrastructure (the Department), undertook an Environmental Impact Assessment (EIA) for the A5 Western Transport Corridor (A5 WTC) and published the Environmental Statement in February 2016. An updated Non-Technical Summary (NTS) was published in April 2016. Together, these documents are herein referred to as the ES 2016.

1.1.2. The purpose of the EIA process is to gather environmental information which is then used to inform decision making and the scheme design. The EIA process ensures that potentially significant environmental effects that may be associated with the A5 Western Transport Corridor (Proposed Scheme) are identified and assessed and that mitigation measures to avoid, reduce or compensate impacts are identified and evaluated.

1.1.3. The ES 2016 for the Proposed Scheme contains the results of the assessments undertaken to form an essential part of the information to inform decision making.

1.1.4. An Environmental Statement Addendum (ESA 2019) and accompanying NTS Rev B were prepared to update the ES 2016 in order to provide the Department with up to date information to inform a decision on whether to proceed with the scheme. These documents were published, with the ensuing consultation process extending from 26 March 2019 to 17 May 2019.

1.1.5. In keeping the traffic assessment and forecasts concurrent over the whole life of the project which extends to 2028 and beyond, the Department has continued to update key areas of base data and the associated assessments. One key area requiring regular updating or substantiating is the subject of traffic forecasting. Following on from the statutory processes in 2016, the Department updated the traffic model with new survey information from both automatic traffic counters and roadside interviews. Where required, the assessments within the ESA 2019, in particular the noise and air quality assessments, utilised the updated forecasting results from the model. This base traffic data used to inform the modelling referred to within the ESA 2019 had not however, been made available as part of the consultation process.

1.1.6. This document now provides the traffic model base and forecast data and should be read in conjunction with the ES 2016, ESA 2019 and accompanying NTS.

2. PREDICTED TRAFFIC FLOWS

2.1.1. As referred to in 718736-3000-R-058 ES Addendum 2019 v1.0, Chapter 1.7, an updated traffic model was utilised where applicable, in the assessments presented in the ESA 2019. The existing and proposed road networks used in the traffic model have not changed. However, as mentioned on the previous page, the Department updated the traffic forecasting model with additional survey information from both automatic traffic counters and roadside interviews.

2.1.2. The associated data collection and traffic model updates have been undertaken in accordance with the Design Manual for Roads and Bridges Volume 12, Section 1, Part 1, The Application of Traffic Appraisal to Trunk Roads Schemes, and the Department for Transport (DfT) WebTAG Guidance.

2.1.3. Traffic forecasts have been developed using a bespoke version of TEMPRO[1] that has been adapted to local Northern Ireland forecasts of travel growth. This growth is applied at electoral ward level, an area consisting of approximately 1000 households, so that variations in travel growth can be replicated during traffic forecasting.

2.1.4. The traffic modelling has predicted the annual average daily traffic (AADT) flows in the anticipated whole scheme Opening Year of 2028 and the Design Year of 2043. Table 2-1 shows the two-way AADT for 4 key sections of the scheme presented in the ES 2016 and the comparable figures from the updated traffic model (to the nearest 100 vehicles). DMRB Volume 5, Section 1, Part 3, TA46/97 Traffic Flow Ranges for Use in the Assessment of New Rural Roads recommends that a dual carriageway is appropriate for a range of Opening Year AADT flows between 11,000 and 39,000. These figures are considered to be a starting point for the economic assessment of new roads, but it should be noted that other factors such as safety, consistency of standard and providing an integrated network are also considered when deciding on the final carriageway standard of the Proposed Scheme.

Table 2-1 – Predicted traffic flows by section

Section	Whole Scheme Opening Year 2028		Design Year Year 2043	
	ES 2016[2] (vehicles)	ESA 2019 (vehicles)	ES 2016 (2041)[2] (vehicles)	ESA 2019 (vehicles)
Londonderry to Strabane	17,800	20,300	19,800	22,300
Strabane to Omagh	20,200	16,600	23,900[3]	19,600
Omagh to A4	17,400	15,000	20,900	18,600
A4 to Aughnacloy	6,700	6,900	7,800	8,400

[1] The TEMPRO software provides summaries of National Trip End Model (NTEM) forecast data for transport planning purposes. The forecasts include population, employment, households by car ownership and trip ends.

[2] Extract from ES 2016, Volume 1 – Environmental Statement, A5WTC ES Chapter 6 – The Proposed Scheme, Section 6.3.6, Table 6.2 Predicted traffic flows by section. Note the Design Year of 2041 was utilised in the ES 2016.

[3] ES 2016, Volume 1 – Environmental Statement, A5WTC ES Chapter 6 – The Proposed Scheme, Section 6.3.6, Table 6.2 Predicted traffic flows by section contained a typographical error. The figure 22,300 should have read 23,900.

2.1.5. The base and forecast traffic data used for the purposes of the assessments reported in the ESA 2019 is presented in Appendix A. To aid in the understanding of this information, Base Year Traffic Flow and Forecast Year Traffic Flow diagrams have been included in Appendix B.

BASE AND FORECAST TRAFFIC DATA

Public

BLANK PAGE

Glossary of Abbreviations used in Base and Forecast Traffic Data Tables

FIELD NAME	DESCRIPTION
TEN LINK ID	Unique Identifier for Traffic Environmental Network link
TEN LINK LENGTH (metres)	Length of Link (metres)
ROAD WIDTH (metres)	Width of carriageway (metres)
SPEED LIMIT (mph)	Speed Limit of Link (mph/hr)
SATURN LINK ID (A_B_C node)	Anode / Bnode / Cnode lookup for Saturn Traffic Model
AADT 24HR FLOW (vehs)	Annual Average Daily Traffic Flow (vehs)
AADT 24HR SPEED (km/h)	Traffic Speed for AADT (km/hr)
AADT 24HR HGV (Proportion)	Proportion of Heavy Goods Vehicles for AADT
AAWT 24HR FLOW (vehs)	Annual Average Weekday Traffic Flow (vehs)
AAWT 24HR SPEED (km/h)	Traffic Speed for AAWT (km/hr)
AAWT 24HR HGV (Proportion)	Proportion of Heavy Goods Vehicles for AAWT
AM FLOW (vehs/h)	Morning Peak Traffic Flow (vehs/hr) [7:30am-9:30am]
AM HGV (Proportion)	Proportion of Heavy Goods Vehicles for AM Peak
IP FLOW (vehs/h)	Inter-Peak Period Traffic Flow (vehs/hr) [9:30am-4pm]
IP HGV (Proportion)	Proportion of Heavy Goods Vehicles for IP Period
PM FLOW (vehs/h)	Afternoon Peak Traffic Flow (vehs/hr) [4pm-6pm]
PM HGV (Proportion)	Proportion of Heavy Goods Vehicles for PM Peak
OFF-PEAK FLOW (vehs/h)	Off-Peak Period Traffic Flow (vehs/hr) [6pm-7:30am]
OFF-PEAK HGV (Proportion)	Proportion of Heavy Goods Vehicles for OP Period
AAWT 18HR FLOW (vehs)	18hr Annual Average Weekday Traffic Flow (vehs)
AAWT 18HR HGV (Proportion)	Proportion of Heavy Goods Vehicles for 18hr AAWT
DAYTIME FLOW (vehs)	Annual Average Weekday Daytime Traffic Flow (vehs) [7am to 7pm]
DAYTIME HGV (Proportion)	Proportion of Heavy Goods Vehicles for Daytime AAWT
EVENING FLOW (vehs)	Annual Average Weekday Evening Traffic Flow (vehs) [7pm to 11pm]
EVENING HGV (Proportion)	Proportion of Heavy Goods Vehicles for Evening AAWT
NIGHT FLOW (vehs)	Annual Average Weekday Night-time Traffic Flow (vehs) [11pm to 7am]
NIGHT HGV (Proportion)	Proportion of Heavy Goods Vehicles for Night-time AAWT

BASE YEAR 2015
