Neighbourhood Renewal Measurement of Outcomes Report

2018

Ballymena
Neighbourhood Renewal Area

Outcome Indicators

Ballymena NRA

The Ballymena Neighbourhood Renewal Area (NRA) has a total population of 4,290 in 2016. Approximately 65% of residents are of working age. There were 83% of residents who identified themselves as having a 'Protestant and Other Christian (including Christian related)' religion or religion brought up in, while approximately 8% identify themselves as having a Catholic religion or religion brought up in.

Ballymena NRA has seen the Gap increase across many of the benefit indicators including Jobseeker's Allowance and Disability Living Allowance with the level for each indicator continuing to be higher than the Non NRA level.

There has been a narrowing of the gap across most of the health indicators to non NRAs, with the exception of deaths to those aged under 75. Ballymena NRA has seen a positive change against all the health indicators from 2005, particularly in the numbers of births to teenage mothers which has seen a reduction of around 75%.

Crime levels in Ballymena have been fairly consistent over the period 2003-2016 with a slight a decrease of 5% of total offences recorded since 2003. This has resulted in a general widening of the gap to non NRAs with increases in crimes of violence against the person and drug offences. Rates of drug offences for Ballymena NRA are among one of the highest across all NRAs.

Purpose

Regardless of where a deprived area is located it will inherently have similar problems. For example, higher than average rates of unemployment, physical and mental ill health, lower levels of educational attainment, higher rates of crime and problems with quality and maintenance of the environment.

The main aim of the Neighbourhood Renewal Strategy is to close the gap in the quality of life between the most deprived neighbourhoods and the rest of society.

The statistical indicators presented here provide evidence on the absolute change that is being recorded across the key Neighbourhood Renewal outcomes, and whether there have been positive or negative movements over time in statistical data in relation to:

- a. Worklessness;
- b. Education;
- c. Health, and
- d. Crime and anti-social behaviour.

Where possible the data presented has been updated to reflect the publication of new data for additional years. In some cases however, such as for a number of the education indicators, this has not been possible as data is not available for Neighbourhood Renewal Areas (NRAs).

The Neighbourhood Renewal Code of Practice and Guiding Principles states that one of the responsibilities of the Neighbourhood Renewal Partnership is to develop and agree an Area Action Plan which seeks to improve the social, economic and environmental conditions by amongst others:

- identifying evidence based needs, and
- prioritising the needs of the area that are to be met.

The purpose of the information presented here is to provide an evidence base for the area to enable staff and members of the partnerships to identify and prioritise need. The information highlights, across a number of key economic and social outcomes, if the gap is closing.

The findings presented here along with the Area's Annual Report should be reflected upon when taking forward the annual review of the Action Plan as well as considering the effectiveness of the projects/interventions being supported in contributing to closing the gap.

User Notes

i. The information is broadly split into two parts:

- Gap Analysis Table and Summary
- Measuring of impact across each Key Outcome Indicator.

The Gap Analysis table and Summary provide a high level data across the key indicators on whether the Neighbourhood Renewal Area (NRA) has experienced a positive or negative outcome or if there has been relatively little change. The table allows the user to compare the NRA and non-NRAs baseline position and the most current year available. The colour blocking shows whether the indicator has improved (green), not changed (yellow) or deteriorated (red) when the most recent year available is compared with the baseline position. The final column in the table shows whether the gap between the NRA and non-NRAs has widened (red arrow), is unchanged (yellow arrow) or had narrowed (green arrow).

The measuring of the individual key outcome indicators provides data on a year by year basis across a given period. This information allows the user to examine the trend and variances and consider if there has been any outside influences, for example, the economic downturn.

ii. Care should be taken when interpreting a positive or negative outcome as the NRA may still be experiencing significant problems – improving but still significantly behind non-NRAs.

iii. Given the changes in the provision of welfare, some key indicators are reporting a closing of the gap. This may be due to changes in the rules for claiming particular benefits and the migration to new benefits, for example, some claimants might be transferred to Employment and Support Allowance if they have been claiming other benefits like Income Support or Incapacity Benefit.

iv. Caution is advised when interpreting change over time where numbers are small. This is particularly evident when examining our smaller NRAs. The Demography section of this report provides information relating to the population size and breakdown.

Please note that some trend data has been revised since the last NR Outcome Indicator report with the data presented here the most up-to-date available. This is particularly the case for the crime data.

Summary

Gap narrowed

	Ballymena NRA	Non-NRA	
Economic			
Income Support			Improvement
Incapacity Benefit			No change
State Pension Credit			Deterioration
Education			
Percentage achieving 5+ GCSE A*-C			Data not available *
Percentage achieving 5+ GCSE A*-C inc English and Maths			
Health			
Alcohol Related Deaths			No change
Drug Related Deaths			Deterioration
Deaths from Suicide and Undetermined Intent			No change
Teenage births			Improvement
Crime			
Criminal damage			Improvement
Anti-Social Behaviour			Improvement
Offences Recorded with a Domestic Abuse Motivation			Deterioration
