EXECUTIVE SUMMARY

- This report provides an analysis of the public finances in Northern Ireland (NI), focusing on the expenditure and revenue generated within the region. The report includes data on 2012-13 and 2013-14 (the latest year for which data is available) for the first time and also updates estimates for earlier years (2009-10 to 2011-12).

Revenue

- Total (non-north Sea) public sector revenue collected in NI was estimated to be £14.8 billion in 2012-13 or 2.5 per cent of the UK total. Revenue collected grew slightly to £14.9 billion in 2013-14, or 2.5 per cent of the equivalent UK total
- Over the period 2009-10 to 2013-14 NI public sector revenue grew relatively significantly, showing an increase of 13.1 per cent. In comparison, UK revenue grew by 15.8 per cent over the same time period.

Expenditure

- In 2012-13, total public sector expenditure in NI was estimated to be £24.3 billion, or 3.4 per cent of the equivalent UK total. This figure decreased slightly to £24.1 billion in 2013-14, equivalent to 3.3 per cent of the UK total.
- 'Identifiable' public sector expenditure in NI was estimated to be £19.8 billion in 2012-13 or 3.6 per cent of the corresponding UK total. This increased slightly in 2013-14 to £20.1 billion, or 3.5 per cent of the UK total.
- 'Non-identifiable' expenditure was estimated at £2.9 billion in 2012-13 (2.8 per cent of the UK total). Accounting adjustments amounted to a further £1.6 billion or 2.7 per cent of the overall UK accounting adjustment. For 2013-14 non-identifiable expenditure was estimated at £2.9 billion or 2.8 per cent of the equivalent UK total. Accounting adjustments amounted to a further £1.1 billion or 2.5 per cent of the UK accounting adjustment figure.
- Total public sector expenditure in NI grew slightly from 2009-10 to 2013-14, increasing by 5.7 per cent. A similar trend was recorded in the UK where total public sector expenditure grew by 5.8 per cent.

Overall Fiscal Balance

- For 2012-13 the estimated fiscal balance in NI was a deficit of £9.5 billion (29.1 per cent of GVA). The 2013-14 'fiscal deficit' decreased to £9.2 billion (27.9 per cent of GVA).
- In 2012-13 the net fiscal balance or fiscal deficit in NI was equivalent to £5,187 per head, a figure considerably higher than the UK figure of

£1,999. As a percentage of GVA, the NI fiscal deficit was 29.1 per cent, again higher than the UK equivalent of 8.7 per cent.

- In 2013-14 the fiscal deficit was equivalent to £5,006 per head. This compared to a UK per head figure of £1,763. The NI fiscal deficit, as a percentage of GVA, was 27.9 per cent, which remained significantly higher than the UK equivalent of 7.5 per cent.
- Unless otherwise stated all estimates exclude North Sea oil revenue.
- The calculations employed to derive this net fiscal balance figure for NI require the estimation of several expenditure and revenue items. Therefore, the net fiscal balance estimates presented in this report are subject to some statistical uncertainty.
- The estimations throughout this report are not National Statistics.

SECTION 1: INTRODUCTION AND OVERVIEW

- 1.1 The purpose of this report is to provide an overview of public sector finances in Northern Ireland (NI) for the financial years 2009-10 to 2013-14. The expenditure and revenue analysis determines the 'net fiscal balance' for NI, estimated as aggregate public sector revenue less aggregate public sector expenditure.
- 1.2 As with previous reports in this series, the methodology applied continues to be generally consistent with that adopted by the Scottish Government in its annual publication 'Government Expenditure and Revenue in Scotland' (GERS)¹. While actual data has been used where possible, it has been necessary to make a number of apportionments based on NI's share of United Kingdom (UK) Gross Value Added (GVA)², population share or alternative methods.
- 1.3 The figures within this report are estimates and should therefore be viewed as such³. Variations in methodologies or the subsequent provision of more actual data could produce a more accurate reflection of the true fiscal balance. Particular caution should be used in relation to individual components of the fiscal balance as many revenue streams have been estimated and are not true values.
- 1.4 Users may be aware that HM Revenue and Customs (HMRC) published its third report providing a disaggregation of tax receipts between England, Scotland, Wales and Northern Ireland⁴ in October 2015. This report apportioned total UK tax receipts, tax credits and benefit payments administered by HMRC to England, Wales, Scotland and Northern Ireland. While the HMRC were able to draw on administrative data where it was available, comprehensive actual data on Northern Ireland receipts is not routinely available. Therefore as with the Net Fiscal Balance and GERS reports, HMRC also had to estimate the tax attributable to Northern Ireland using a variety of statistical techniques, including apportionment assumptions and adjustments where necessary. In some instances these are similar to those employed by DFP in producing the Net Fiscal Balance Report, while others differ. HMRC has acknowledged that a variety of alternative methodologies could justifiably be applied, which would lead to different estimates.
- 1.5 In terms of this 2012-13 and 2013-14 report for NI, the main estimates are produced using the methodology developed for the GERS report to

¹ Scottish Government (March 2015) 'Government Expenditure and Revenue in Scotland 2013-14'
<http://www.gov.scot/Resource/0047/00472877.pdf>

² Gross Domestic Product data is not available for Northern Ireland so Gross Value-Added (GVA) data is used instead. $GVA + \text{taxes on products} - \text{subsidies on products} = \text{GDP}$. Further note that the GVA figures used exclude Extra-Regio (off-shore contribution to GVA that cannot be assigned to any region).

³ Estimates have been revised from previous reports as a result of changes in methodology, the use of alternative data sources and revision of previous figures used.

⁴ https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/285765/disagg-info.pdf

maintain consistency with that and previous reports in the Net Fiscal Balance series. However a separate estimate of the net fiscal balance position based on the HMRC revenue data is also provided for comparison and completeness.

1.6 The remainder of this report is structured as follows:

Section 2: NI's Public Sector Accounts

1.7 Section 2 provides overall estimates of net fiscal balances in NI based on aggregate public sector revenue and expenditure estimates for the financial years 2009-10 to 2013-14.

Section 3: Public Sector Revenue

1.8 Section 3 presents estimates of NI's public sector revenue raised over the financial years 2009-10 to 2013-14.

Section 4: Public Sector Expenditure

1.9 Section 4 provides public sector expenditure estimates for NI over the financial years 2009-10 to 2013-14.

Section 5: Conclusion

1.10 This section summarises the main results of the analysis.

Annex A: Fiscal Background

1.11 Annex A contains a brief background to the public sector fiscal framework in NI and the UK.

Annex B: Public Sector Revenue Methodology

1.13 Annex B provides details on the methodology employed in this report to produce estimates of public sector revenue in NI.

Annex C: Public Sector Expenditure Methodology

1.14 Annex C presents details on the methodology employed to produce estimates of public sector expenditure in NI.

Annex D: NI's Public Sector Accounts (Exc. Non-Id & Acc. Adjustment)

1.15 Annex D illustrates an estimate of the NI fiscal balance based on identifiable expenditure only.

Annex E: NI's Public Sector Accounts (Inc. North Sea Oil)

- 1.16 Annex E illustrates an estimate of the NI fiscal balance including a per capita share of North Sea oil revenue.

SECTION 2: NI'S PUBLIC SECTOR ACCOUNTS

Introduction

2.1 This section presents an overview of NI's public sector accounts for the period 2009-10 to 2013-14, including estimates of the net fiscal balance over this five year period. It is important to bear in mind that the figures set out in this report are estimates subject to a margin of error and should be treated accordingly. Furthermore, as well as providing 2012-13 and 2013-14 figures for the first time, this report provides revised estimates for 2009-10 to 2011-12. Year-on-year comparisons should be made on the basis of the consistent estimates provided in this report.

Net Fiscal Balance 2012-13 and 2013-14

2.2 The 'net fiscal balance' shows the difference between total public sector revenue and total public sector expenditure (including accounting adjustments).

2.3 In 2012-13, NI recorded a negative net fiscal balance of £9.5 billion (or 29.1 per cent of GVA). In 2013-14, NI recorded a slightly lower negative fiscal balance of £9.2 billion, 27.9% of GVA.

2.4 Applying the NI methodology, in 2012-13 the total UK current budget deficit (excluding North Sea oil revenues) amounted to approximately £127 billion. This figure reduced to £113 billion in 2013-14.

2.5 The net fiscal balance or 'fiscal deficit' in NI was equivalent to £5,187 per head in 2012-13 and £5,006 per head in 2013-14. This compares to per head figures in the UK of £1,999 and £1,763 in 2012-13 and 2013-14 respectively. The NI fiscal deficit as a percentage of regional GVA was 29.1 per cent in 2012-13 and 27.9 per cent in 2013-14. In both years these were higher than the UK equivalent of 8.7 per cent and 7.5 per cent respectively.

2.6 Table 2.1 contains headline public sector revenue and expenditure figures relating to 2012-13 and 2013-14 estimates for NI and the UK.

Table 2.1: Net fiscal balance estimates: NI and the UK, 2013-14 (£m)

£ Million	2012-13		2013-14	
	NI	UK	NI	UK
Aggregate Expenditure	24,292	717,916	24,083	720,487
Aggregate Revenue	14,833	590,571	14,923	607,466
Net Fiscal Balance	-9,459	-127,345	-9,160	-113,021
Net Fiscal Balance per capita (£)	-5,187	-1,999	-5,006	-1,763
Net Fiscal Balance as a % of financial year GVA	-29.1%	-8.7%	-27.9%	-7.5%

Net Fiscal Balance 2009-10 to 2013-14

- 2.7 The remainder of this section profiles NI's fiscal position over the period 2009-10 to 2013-14, identifying trends in aggregate expenditure and revenue.
- 2.8 Table 2.2 shows how NI's fiscal deficit has decreased by approximately £0.4 billion over the period; from £9.6 billion in 2009-10 to £9.2 billion in 2013-14. As a percentage of regional GVA, the deficit decreased by 3.0 percentage points from 2009-10 to 2013-14. Within that 5 year period, the deficit dipped to a low of £8.9 billion in 2011-12 before increasing in 2012-13 to £9.5 billion.

Table 2.2: NI Fiscal Position 2009-10 to 2013-14

£ Million	NI				
	2009-10	2010-11	2011-12	2012-13	2013-14
Aggregate Expenditure	22,774	23,357	23,703	24,292	24,083
Aggregate Revenue	13,191	14,247	14,848	14,833	14,923
Net Fiscal Balance	-9,583	-9,110	-8,855	-9,459	-9,160
Net Fiscal Balance per capita (£)	-5,344	-5,048	-4,881	-5,187	-5,006
Net Fiscal Balance as a % of financial year GVA	-30.9%	-28.9%	-27.6%	-29.1%	-27.9%

- 2.9 The information provided in this table is further illustrated in figures 2.3 and 2.4.
- 2.10 Figure 2.3 presents aggregate expenditure and revenue, highlighting NI's negative budget balance or 'deficit'. The gap between these two lines indicates the size of the NI deficit over the period 2009-10 to 2013-14.
- 2.11 Over the five year period, total spending increased by £1.3 billion (5.7 per cent) while estimated aggregate revenue increased by £1.7 billion (13.1 per cent), giving a net decrease in the NI fiscal deficit of approximately £0.4 billion (4.4 per cent).

Figure 2.3: NI Trends in Aggregate Revenue and Aggregate Expenditure, 2009-10 to 2013-14

2.12 Figure 2.4 illustrates the trend of the 'fiscal deficit' over the five year period 2009-10 to 2013-14. Decreases were recorded between 2009-10 and 2011-12. This coincides with increases in the 3 main revenue streams for Northern Ireland - income tax, NICs and VAT - and a decreasing rate of growth in government expenditure over this time period. Although an increase was recorded in the 'fiscal deficit' from 2011-12 to 2012-13, due to stagnant revenue and increased expenditure, it decreased over the most recent time period (2012-13 to 2013-14) by 3.2 per cent. This can be attributed to a decrease in expenditure coupled with increased revenue. Overall, the period of 2009-10 to 2013-14 witnessed a decrease in the 'fiscal deficit' of approximately 4.4 per cent.

Figure 2.4: NI Fiscal Deficit Position, 2009-10 to 2013-14

2.13 The NI fiscal position from 2009-10 to 2013-14 shows a broadly similar trend to that seen in the UK public finances where revenue grew by 15.8 per cent, while expenditure rose by 5.8 per cent.

Revenue

2.14 Table 2.5 details the main components of public sector revenue in NI over the period 2009-10 to 2013-14. A further disaggregation of revenue is presented in section 3.

2.15 In 2013-14, total estimated public sector revenue in NI was approximately £14.9 billion representing a significant increase of 13.1 per cent from 2009-10. Increased revenue from VAT contributed most in absolute terms to the increase in tax revenues.

Table 2.5: Summary of Total Public Sector Revenue in NI, 2009-10 to 2013-14 (£m)

Revenue Stream £ Million	NI				
	2009-10	2010-11	2011-12	2012-13	2013-14
Income tax	2,469	2,593	2,509	2,479	2,605
VAT	2,325	2,794	3,170	3,119	3,271
National Insurance Contributions (NICs)	2,051	2,091	2,173	2,235	2,295
Local Authority Revenue	1,000	1,028	1,057	1,105	1,123
Corporation tax (excluding NS revenues)	685	808	729	755	768
Fuel duties	876	901	886	869	880
Gross operating surplus & rent	1,908	1,989	2,090	2,191	1,982
Other Revenues	1,877	2,044	2,234	2,080	2,000
Current receipts (excluding NS revenues)	13,191	14,247	14,848	14,833	14,923

Note: figures may not sum to totals due to rounding.

Expenditure

2.16 Table 2.6 presents a summary of Total Expenditure on Services (TES) for the main spending functions in NI over the period 2009-10 to 2013-14. A more detailed breakdown of expenditure is provided in section 4, including the estimation of the accounting adjustment required to bring TES in line with Total Managed Expenditure (TME) – the principal public sector expenditure aggregate used in UK Public Finance Accounts.

Table 2.6: Summary of Total Public Sector Expenditure on Services (TES) in NI, 2009-10 to 2013-14 (£m)

Expenditure Category	NI				
	2009-10	2010-11	2011-12	2012-13	2013-14
Social protection	7,580	7,572	7,954	8,331	8,586
Health	3,466	3,621	3,658	3,863	3,899
Education	2,714	2,826	2,793	2,849	2,751
Public order and safety	1,367	1,499	1,488	1,442	1,410
Defence	1,089	1,133	1,107	1,039	1,038
General public services ¹	1,578	1,972	1,939	1,810	1,888
Other ²	3,885	3,568	3,499	3,371	3,419
Total	21,679	22,191	22,438	22,705	22,993

Note: figures may not sum to totals due to rounding.

1. This category is comprised of public and common services, international services, and debt interest.

2. This category is comprised of EU transactions, enterprise & economic development, science & technology, employment policies, agriculture, fisheries & forestry, transport, environment protection, housing & community amenities, and recreation, culture & religion.

Alternative Net Fiscal Balance 2013-14 estimate based on HMRC regional tax figures

2.17 As indicated in Section 1, HMRC has produced a report providing a disaggregation of tax receipts between England, Scotland, Wales and Northern Ireland. This provides alternative estimates for most tax revenues (except some that are locally raised such as rates income, and the non-cash item, gross operating surplus). The effect of applying these alternate HMRC estimates (where available) is to reduce total aggregate revenue for NI in 2013-14 from the £14.9bn included at Table 2.2 to £14.3bn. This in turn would increase the 2013-14 net fiscal balance from £9.2bn to £9.8bn.

SECTION 3: PUBLIC SECTOR REVENUE

Introduction

- 3.1 This section focuses on public sector revenues. As mentioned previously, there are a number of practical and theoretical difficulties that arise when allocating shares of UK tax revenue to each of its constituent countries as data on taxation is generally not available on a regional basis. Therefore, it has been necessary in some cases to estimate regional shares using reasoned assumptions. If more actual data was available this would lead to a more accurate reflection of total revenue raised in NI.
- 3.2 The data used to derive the figures for this report is taken from the Office for National Statistics (ONS) PSAT2 Database. Details of the methodology employed and the various sources of data used in estimating total public sector revenue in NI are provided in Annex B. In particular, table B1 provides a summary of the apportionment method applied and the source of data used to estimate each revenue stream.
- 3.3 North Sea oil revenues are excluded from this public sector revenue estimation. For a hypothetical exercise including a per capita share of North Sea revenues allocated to NI, refer to Annex E.

Estimated Revenue 2013-14

- 3.4 The estimates of revenue generated in NI and the UK for 2013-14 are presented in Table 3.1. The table also shows the estimated contribution from each revenue stream and the proportion of UK revenue raised in NI. Based on the calculations, NI revenues are estimated at £14.9 billion in 2013-14 or 2.5 per cent of the UK total non-North Sea revenue.

Table 3.1: Current Revenue: NI and UK 2013-14

Revenue Stream	UK (£ million)	NI (£ million)	Share of UK
Income tax (net of tax credits)	156,011	2,605	1.7%
Corporation tax (excluding North Sea revenues)	35,623	768	2.2%
Capital gains tax	3,907	86	2.2%
Inheritance tax	3,401	43	1.3%
Stamp duties	12,479	147	1.2%
National Insurance Contributions (NICs)	107,306	2,295	2.1%
VAT	120,226	3,271	2.7%
Fuel duties	26,881	880	3.3%
Tobacco duty	9,556	436	4.6%
Alcohol Duties	10,308	238	2.3%
Betting & Gaming duties	1,645	72	4.4%
Air Passenger duty	3,003	83	2.8%
Insurance Premium tax	3,018	78	2.6%
Land fill tax	1,179	30	2.5%
Climate Change Levy	1,200	27	2.3%
Aggregates levy	294	6	2.2%
VED	6,121	174	2.8%
Business rates (non-domestic rates)	24,493	566	2.3%
Council Tax (domestic rates)	27,360	557	2.0%
Other taxes & royalties ¹	12,677	333	2.6%
Interest & dividends	5,592	161	2.9%
Gross operating surplus and rent	31,939	1,982	6.2%
Other taxes on income and wealth	3,247	84	2.6%
Current Receipts (excluding North Sea Revenues)	607,466	14,923	2.5%
North Sea Revenues (NI on a per capita basis) ²	4,766	136	2.9%
Current Receipts (including North Sea Revenues)	612,232	15,059	2.5%

¹ Includes money paid into the National Lottery Distribution Fund.

² Consists of North Sea corporation tax, petroleum revenue tax and royalties.

3.5 The main sources of NI estimated tax receipts were: income tax (net of tax credits) amounting to £2.6 billion; Value-Added Tax (VAT) amounting to £3.3 billion; and National Insurance Contributions (NICs) amounting to £2.3 billion. Collectively, these estimated receipts accounted for around 55 per cent of NI public sector revenue in 2013-14.

3.6 Table 3.2 shows NI receipts and their respective proportion of total estimated NI public sector revenue.

Table 3.2: Current Revenue in NI 2013-14

Revenue Stream	NI (£ million)	Share of NI Total
Income tax (net of tax credits)	2,605	17.5%
Corporation tax (excluding North Sea revenues)	768	5.1%
Capital gains tax	86	0.6%
Inheritance tax	43	0.3%
Stamp duties	147	1.0%
National Insurance Contributions (NICs)	2,295	15.4%
VAT	3,271	21.9%
Fuel duties	880	5.9%

Estimated Revenue 2009-10 to 2013-14

3.7 Figures 3.3 and 3.4 illustrate the trends in NI and the UK respectively for each of the three largest revenue categories (namely income tax, VAT, and NICs).

Figure 3.3: Trend of NI Largest Revenue Categories, 2009-10 to 2013-14

3.8 In NI income tax, VAT and NICs have all experienced growth in the 5 years from 2009-10 to 2013-14. VAT in particular has experienced significant growth from 2009-10 to 2011-12, which can be partly attributed to the rise in the VAT rate from 17.5% to 20% in January 2011. Likewise, income tax, VAT and NICs have experienced growth in the UK over the same period. Figure 3.3 shows that NI VAT revenues are now higher than income tax revenues. Comparatively, in the UK income tax receipts continue to be substantially higher than the other main sources of revenue.

Figure 3.4: Trend of UK Largest Revenue Categories, 2009-10 to 2013-14

3.9 Table 3.5 shows estimates of UK and NI revenue for the period 2009-10 to 2013-14.

HMRC Revenue estimates for Northern Ireland

3.13 Table 3.7 compares the 2013-14 tax revenue estimates from the NI Net Fiscal Balance report and the HMRC report. It has not been possible to compare all revenue streams as some are included in the NI Net Fiscal balance report but not in the HMRC report and vice versa. The comparison highlights a number of differences in the estimates, however the most significant revenue stream not included in the HMRC report is Gross Operating Surplus & Rent (a non-cash item), which accounts for almost £2.0bn of the total revenue estimate in the Net Fiscal Balance report.

Table 3.7: Comparison of Revenue Estimates – NFB and HMRC

Tax Revenue Stream	NFB 2013-14 (£million)	HRMC 2013-14 (£million)
Income tax (net of tax credits)	2,605	2,620
Corporation tax (excluding NS revenues)	768	478
Capital gains tax	86	34

3.14 Table 3.8 shows that the NI fiscal deficit is estimated at £9.8bn using the HMRC tax revenue estimates. This is a difference of 6.9 per cent compared to the estimate using the methodology developed through the GERS report. As a percentage of GVA, the fiscal deficit estimate using HMRC data is 2.0 percentage points higher than the estimate calculated using the GERS methodology and the fiscal deficit per capita is 6.9 per cent higher at £5,365.

£ Million	2013-14 NI
Aggregate Expenditure	24,083
Aggregate Revenue	14,267
Net Fiscal Balance	-9,816
Net Fiscal Balance per capita (£)	-5,365
Net Fiscal Balance as a % of financial year GVA	-29.9%

SECTION 4: PUBLIC SECTOR EXPENDITURE

Introduction

- 4.1 This section provides a more detailed analysis of public expenditure in NI. The estimates presented are based on data contained in the November 2014⁵ Country and Regional Analysis (CRA) of HM Treasury's 'Public Expenditure Statistical Analysis' publication⁶ (hereafter referred to as PESA).
- 4.2 In accordance with PESA, public expenditure data has been disaggregated into three components: identifiable expenditure; non-identifiable expenditure; and an accounting adjustment. Identifiable expenditure is that which can be recognised as benefiting individuals, enterprises or communities within particular regions. Examples of identifiable expenditure include welfare payments and most health and education expenditure.
- 4.3 Non-identifiable expenditure is incurred on behalf of the UK as a whole and cannot be apportioned to an individual country or region. The largest element of non-identifiable expenditure is defence expenditure. For example, defence spend benefits the UK as a single entity rather than specific parts. Debt interest payments, defence, and international services are typically the largest elements of non-identifiable expenditure.
- 4.4 A hypothetical exercise estimating the NI fiscal balance excluding non-identifiable spending and the accounting adjustment is attached at Annex D of this report. However, clearly there are aspects of total UK public expenditure that need to be considered.
- 4.5 Both identifiable and non-identifiable expenditure consist of current and capital expenditure. Current expenditure includes items such as welfare payments and public sector pay. Capital expenditure largely comprises spend on infrastructure such as roads, schools and hospitals. Total identifiable and total non-identifiable expenditure sum to produce an estimate of Total Expenditure on Services (TES). An accounting adjustment is then required to bring TES into line with Total Managed Expenditure (TME), the principal public sector expenditure aggregate used in UK Public Finance Accounts.

⁵ See Annex C for more detail

⁶https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/380589/Country_and_Regional_Analysis_November_2014_Combined.pdf

In Summary:

- **Identifiable (Current + Capital) + Non-Identifiable (Current + Capital) = Total Expenditure on Services**
- **Total Expenditure on Services + Accounting Adjustment = Total Managed Expenditure**

Total Expenditure on Services

4.6 Table 4.1 shows estimated public sector TES for NI by expenditure category in 2013-14. Based on the methodologies adopted in this report, TES was estimated at £23.0 billion in NI. This was equivalent to 3.4 per cent of total UK public sector expenditure. The largest expenditure component was social protection, which accounted for 37.3 per cent of NI TES. Health and education were the next largest spending categories, accounting for respective TES shares of 17.0 per cent and 12.0 per cent.

Table 4.1: NI Total Expenditure on Services (TES), 2013-14

Current	90.3%	91.8%	92.9%	93.4%	93.4%	89.8%	91.6%	93.0%	93.5%	93.0%
Capital	9.7%	8.2%	7.1%	6.6%	6.6%	10.2%	8.4%	7.0%	6.5%	7.0%

4.9 Tables 4.4 and 4.5 present TES by current and capital expenditure for NI and the UK.

4.10 Over the period 2009-10 to 2013-14, estimated TES increased from £21.7 billion to £23.0 billion in NI, an increase of 6.1 per cent. UK TES increased from £637.9 billion to £677.4 billion over the same period, a similar increase of 6.2 per cent.

4.11 Current expenditure by the NI public sector accounts for approximately 93 per cent of TES in both NI and the UK. Between 2009-10 and 2013-14 current expenditure increased by 9.7 per cent in NI and by 9.9 per cent in the UK.

4.12 In comparison, NI public sector capital expenditure accounts for around 7.0 per cent of TES. Overall, capital expenditure declined by 27.7 per cent in Northern Ireland and by 26.8 per cent in the UK as a whole over the period 2009-10 to 2013-14.

1. The sum of the constituent items may not always agree exactly with the total shown due to rounding. The total presented is taken directly from PESA 2014.

4.13 Figures 4.6 and 4.7 show similar trends in the growth of the three largest expenditure categories in both NI and the UK respectively. The largest categories in both regions are social protection (which covers expenditure on welfare payments and so on), followed by health expenditure and then by expenditure on education.

Figure 4.6: Trend of NI Largest Expenditure Categories, 2009-10 to 2013-14

Figure 4.7: Trend of UK Largest Expenditure Categories, 2009-10 to 2013-14

4.14 Per capita TES spend for both NI and the UK is presented in Table 4.8. TES per capita for NI was estimated at £12,556 in 2013-14; 20.0 per cent (£2,052) higher than UK TES per capita.

4.15 TES per capita is generally higher in NI across most spending categories. In absolute terms, the greatest differences on a per capita basis occurred in social protection and public order & safety, which were £772 and £300 higher respectively in NI than in the UK.

Table 4.8: Total Expenditure on Services (TES) per capita: NI and UK, 2013-14 ¹

Total	12,556	10,504	2,052	120

1. Figures in this table have been rounded to the nearest whole number.

4.16 As might be expected public expenditure on services varies across the UK regions. NI public expenditure per capita differs from the UK average for a number of reasons. Higher public expenditure per capita in NI may be a reflection of the relative importance of particular activities, such as agriculture, forestry and fisheries. NI also has a lower population density than the UK which may partly explain the relative cost of providing a given level of public services, particularly in services such as health and education.

4.17 Furthermore, the range of activities classified within the public sector differs across the UK regions. This therefore affects the level of public expenditure required within those regions. For instance, water and sewerage services are within the public sector's remit in NI but are provided by the private sector in England.

Identifiable and Non-identifiable Expenditure

- 4.18 Public sector TES for NI may be disaggregated into identifiable expenditure and non-identifiable expenditure. In 2013-14, UK identifiable expenditure accounted for 81.8 per cent of UK TES. The remaining non-identifiable expenditure cannot be attributed directly to the UK regions because it is incurred for the benefit of the UK as a whole (e.g. defence spending). For the purposes of this analysis a share of UK non-identifiable expenditure may be apportioned to NI on a share of either UK population or UK Gross Value Added (GVA). Annex C of this paper further outlines the assumptions and methodologies employed in the apportionment of non-identifiable expenditure.
- 4.19 TES is shown by identifiable and non-identifiable expenditure for NI over the period 2009-10 to 2013-14 in Table 4.9. Identifiable expenditure amounted to £20.1 billion in 2013-14 while non-identifiable expenditure totalled £2.9 billion (12.8 per cent of TES).

Total	10,961	8,936	2,025	123

1. Figures in this table have been rounded to the nearest whole number.

Non-identifiable expenditure

- 4.22 This section presents a breakdown of non-identifiable expenditure on services in NI and the UK.
- 4.23 PESA contains data on non-identifiable expenditure as well as on expenditure incurred on programmes outside the UK. In order to ensure that the data is comparable, expenditure incurred outside the UK has been included within non-identifiable expenditure for both NI and the UK. The rationale for including such expenditure in non-identifiable expenditure rests on the fact that benefits are shared among the UK constituent countries. An example of this is the service provided by overseas UK embassies to all UK residents.
- 4.24 Table 4.12 provides estimates of non-identifiable expenditure for NI and the UK over the period 2009-10 to 2013-14. Tables 4.13 and 4.14 disaggregate non-identifiable expenditure into its current and capital components both for NI and the UK respectively.
- 4.25 In 2013-14, total non-identifiable expenditure attributed to NI was estimated at £2.9 billion, 2.8 per cent of the UK figure. Defence and debt interest were the largest elements, accounting for 71.4 per cent of non-identifiable expenditure apportioned to NI.
- 4.26 Tables 4.13 and 4.14 indicate that in 2013-14 current expenditure accounted for 95.2 per cent of non-identifiable expenditure in NI and for 95.9 per cent in the UK.

1. Note that the sum of the constituent items may not always agree exactly with the total shown due to rounding

4.27 Table 4.15 highlights similarities in the composition of non-identifiable expenditure for NI and the UK which is expected as NI's non-identifiable expenditure is estimated by apportioning a percentage share of the UK figure.

Table 4.15: Non-identifiable expenditure: NI and the UK, 2013-14 (£m)

	NI		UK	
	Expenditure	Share of non-identifiable expenditure	Expenditure	Share of non-identifiable expenditure
Public and common services	126	4.3%	4,423	4.2%
EU transactions	93	3.2%	5,174	5.0%
International services	284	9.7%	9,936	9.5%
Debt interest	1,059	36.1%	37,109	35.6%
Defence	1,038	35.4%	36,360	34.9%
Public order and safety	28	1.0%	981	0.9%
Enterprise and economic development	18	0.6%	634	0.6%

Total	1,605	1,626

1. Figures in this table have been rounded to the nearest whole number.

Accounting Adjustments

4.29 The public sector expenditure figures presented in this section have focused on Total Expenditure on Services (TES). However, Total Managed Expenditure (TME) is the main spending aggregate used in UK public sector finances. Therefore, an accounting adjustment is required to bring TES in line with TME. The largest component of this adjustment is general government capital consumption which is depreciation of fixed capital resources from public service provision. General government capital consumption represents approximately half of the total accounting adjustment. The other main component of the adjustment is certain VAT refunds.

4.30 Table 4.17 sets out total UK accounting adjustments for the years 2009-10 to 2013-14. In 2013-14, total UK accounting adjustments

were estimated at £43.4 billion. The accounting adjustments range from 6.0 per cent to 8.1 per cent of TME throughout this period.

Table 4.17: UK Accounting Adjustment, 2009-10 to 2013-14 (£m)

	2009-10	2010-11	2011-12	2012-13	2013-14
UK TME	680,739	700,892	701,163	717,919	720,361
UK TES	637,876	655,262	652,702	659,808	676,977
UK Accounting Adjustment	42,863	45,630	48,461	58,111	43,384

Source: November 2014 PESA Release - Country and Regional Analysis, Table A1

4.31 Table 4.18 provides a disaggregation of NI accounting adjustments for the years 2009-10 to 2013-14. In 2013-14, the total public sector accounting adjustment for NI was estimated at £1.1 billion, or 2.5 per cent of the total UK accounting adjustment. UK accounting adjustments have been apportioned to NI using a variety of methods. Further detail on the calculation of the accounting adjustment is provided in Annex C of this report.

Table 4.18: NI Accounting Adjustment, 2009-10 to 2013-14 (£m)

	2009-10	2010-11	2011-12	2012-13	2013-14
Capital consumption

Aggregate Expenditure

4.33 Table 4.19 shows the breakdown of aggregate expenditure in NI. In 2013-14, TME was estimated at £24.1 billion; of this £20.1 billion was identifiable, £2.9 billion was non-identifiable, and £1.1 billion represented accounting adjustments. This equated to aggregate expenditure per head of £13,162.

Table 4.19: NI Expenditure, 2013-14 (£m)

£ million	NI
Identifiable Expenditure	20,055
Non-Identifiable Expenditure	2,938
Total Expenditure on Services	22,993
Accounting Adjustments	1,090
Total Managed Expenditure	24,083
TME per capita (£)	13,162

SECTION 5: CONCLUSION

- 5.1 This report provides an estimate of the net fiscal balance position for NI over the five year period from 2009-10 to 2013-14, with a particular focus on 2012-13 and 2013-14 (the most recent years for which financial outturn data is available).
- 5.2 Table 5.1 summarises the fiscal positions of NI and the UK. In 2013-14, the estimated net fiscal balance for the public sector in NI was a deficit of £9.2 billion (27.9 per cent of GVA).
- 5.3 In 2009-10 the estimated fiscal position for NI excluding North Sea revenue was a deficit of £9.6 billion. The 2013-14 estimation represents a decreased deficit of £0.4 billion over the period 2009-10 to 2013-14.

Table 5.1: Net Fiscal Balance Estimates: NI and the UK, 2013-14 (£m)

£ Million	NI	UK
Aggregate Expenditure	24,083	720,487
Aggregate Revenue	14,923	607,466
Net Fiscal Balance	-9,160	-113,021
Net Fiscal Balance per capita (£)	-5,006	-1,763
Net Fiscal Balance as a % of financial year GVA	-27.9%	-7.5%

- 5.4 As noted previously, HMRC published statistics on regional tax revenue in the UK. Using this data, the fiscal deficit is estimated at £9.7bn for 2013-14. This estimate has been derived simply by replacing our figures with HMRC figures where possible and therefore both the statistics and alternative fiscal deficit estimate should be used with caution.

ANNEX A: FISCAL BACKGROUND

Total Managed Expenditure (TME) in the UK

In the current UK public finance framework Total Managed Expenditure (TME) is the key spending aggregate. This is a measure of public sector expenditure drawn from components in National Accounts produced by the Office for National Statistics (ONS). TME includes the current and capital expenditure of the whole public sector, including local government and public corporations (but excludes financial transactions).

TME comprises two components:

- Departmental Expenditure Limits (DEL) – DEL expenditure is planned on a multi-year basis, normally three years in successive Spending Reviews which apply to the UK as a whole. It is divided into: Capital DEL, which is capital spending that adds to the Government's fixed assets; and Resource DEL, which reflects the ongoing costs of providing services, including pay, the cost of depreciation, grants paid to the private sector and so on.
- Annual Managed Expenditure (AME) – spending that cannot be constrained within firm multi-year limits and is therefore adjusted and allocated annually by the UK Government. For example AME includes social protection. This is spending that is 'demand-led' and cannot be planned far in advance. AME is also disaggregated into capital and resource components.

DEL makes up the majority of TME. The sum of DEL and AME plus an 'accounting adjustment' is equal to TME.

Public Expenditure Data

Information on the allocation of Government expenditure on services between the UK regions is provided annually in the HM Treasury PESA exercise.

Public Expenditure in NI

HM Treasury is responsible for managing and implementing UK fiscal and macroeconomic policy, as well as determining public expenditure allocations across the UK regions. As a result, NI's Budget, along with that for Scotland and Wales, continues to be determined within the framework of public expenditure control in the UK. However, once overall public expenditure budgets for the regions have been determined, the Devolved Administrations have freedom to make their own spending decisions on evolved programmes within that budget.

For programmes within the remit of DEL (for each of the Devolved Administrations) the block grant allocated by the UK Government in Westminster is currently determined by application of the 'Barnett Formula'. Under this formula, budget allocations are determined by a population-based share of funding increases on comparative government spending programmes in Whitehall departments.

UK Public Sector Revenues

The majority of public sector revenue raised in NI is under the control of the UK Government and is collected by HM Revenue and Customs. The largest sources of tax revenue are income tax, value added tax and national insurance contributions.

Local government in NI can raise its own revenue from domestic rates and non-domestic rates (also known as business rates).

Net Fiscal Balance

The 'net fiscal balance' is estimated as the difference between total public sector revenue and total public sector expenditure (including accounting adjustments).

ANNEX B: METHODOLOGY FOR PRODUCING ESTIMATES OF PUBLIC SECTOR REVENUE

This annex details the apportionment methodologies and sources used to estimate public sector revenue in NI.

UK fiscal revenues are taken from the Office for National Statistics (ONS) Public Sector Finance Statistics. Detailed components, revenue by revenue, are taken from an ONS database (PSAT2) which is produced on a quarterly basis. The UK revenue figures presented in this report are consistent with outturns published by ONS in 2015 Quarter 1.

In some cases, revenue figures can be directly attributed to NI and require no further estimation. Examples include inheritance tax revenue and national insurance contributions. However, the majority of public sector revenues are collected centrally and their distribution by region is often unavailable. In these instances, UK figures are apportioned to NI using specific methodologies. It should be noted that in certain cases a variety of alternative methodologies could be applied each leading to variations in estimates. Where possible, the most accurate and up to date apportionment methods have been applied.

In March 2015, the Scottish Government published fiscal deficit estimates covering the period 2009-10 to 2013-14 in '*Government Expenditure & Revenue Scotland 2013-14*'⁷ (GERS). Strictly speaking, NI's fiscal deficit estimate is not directly comparable to Scotland's as a result of differing methodologies for certain revenue streams. Caution should therefore be used in making any such comparisons. However, NI apportionment methods have been updated to reflect revisions in the methodology employed by the Scottish Government, where it was relevant and practical to do so. This has led to an improved NI fiscal deficit estimation.

There are two stages in estimating a revenue stream for NI. In the first stage, the UK outturn figure is obtained from PSAT2. In the second stage, NI's share is estimated according to a specific methodology. Note that generally information comes from survey data for the UK. Examples include the Survey of Personal Incomes and the Family Spending Survey.

Table B.1 summarises the various apportionment methodologies and sources used to estimate public sector revenues in NI.

⁷ GERS Report, 2013-14: <http://www.gov.scot/Resource/0047/00472877.pdf>

Table B.1: Apportionment methodologies and sources used to estimate Public Sector Revenues in NI

Revenue	Methodology	Source	Revised
Income tax (net of tax credits)	NI's share of UK income tax liabilities	Survey of Personal Incomes (SPI): HMRC	No
Corporation tax (exc. North Sea Oil)	NI's share of profits (less holding gains) of UK corporations	Supplied directly by ONS	No
Capital gains tax	NI's share of UK GVA (less extra regio)	Regional Accounts: ONS	No
Inheritance tax	Actual Outturns for NI	Supplied directly by HMRC	No
Stamp duties	Land and property stamp duty: actual outturns Stocks and shares: NI/UK ratio of adults owning stocks, shares, unit trusts, PEPs and ISAs	Land and property stamp duty: HMRC Stocks and shares: DWP Family Resources Survey	No
National Insurance Contributions (NICs)	Employee and Employer estimates in NI and UK	Supplied directly by HMRC	No
VAT	Household VAT: NI's share of UK household VAT expenditure Business & Housing sector VAT: NI share of UK GVA Government VAT: NI share of UK government expenditure LG VAT Refunds: NI share of UK local government expenditure CG VAT refunds: Various	Family Spending Survey: ONS	Yes
Fuel duties	Petrol: NI's share of UK road traffic petrol consumption Diesel: NI's share of UK road traffic diesel consumption	Road Transport Energy Consumption at Regional and Local Authority Level: BERR	Yes
Tobacco duties	NI's share of UK expenditure on tobacco	Family Spending Survey: ONS	No
Alcohol duties	NI's share of UK consumption of alcohol	Family Spending Survey: ONS	Yes
Betting & Gaming duties	NI's share of UK expenditure on betting and gaming	Family Spending Survey: ONS	No
Air Passenger duty	NI's share of UK population	PESA 2014: HMT	No
Insurance Premium tax	NI's share of UK expenditure on insurance	Family Spending Survey: ONS	Yes
Land fill tax	NI's share of UK landfill tax supplied by HMRC	HMRC Disaggregated Tax Receipts	Yes
Climate Change Levy	Electricity: NI's share of UK electricity consumption Solids & other fuels: NI's share of UK GVA (less extra regio)	Electricity: BERR Solids & other fuels: HMRC	No
Aggregates Levy	NI share of UK GVA	Regional Accounts: ONS	No
Vehicle Excise Duty	As reported by DVLNI (less refunds)	DVLNI Annual Reports & Accounts	No
Business rates (non-domestic)	Actual data	Supplied by DFP Officials in Rating Policy Division	No

Council Tax (domestic)	Actual data	Supplied by DFP Officials in Rating Policy Division	No
Other Taxes & Royalties	Various	ONS UK Blue Book (2008): ONS	Yes
Interest & dividends	NI's share of UK public sector GVA	Regional Accounts: ONS	No
Gross Operating Surplus & Rent and other current transfers	CG: NI's share of UK CG NMCC LG: NI's share of UK LG NMCC PC: NI's share of UK public sector GVA	NMCC data: supplied directly by ONS GVA data: Regional Accounts ONS	Yes
Other taxes on income and wealth	Various	Various	No

The following describes the methodology employed in estimating each source of NI receipts.

Income tax

The UK figure for income tax is taken from the PSAT2 database published by ONS, and is presented net of tax credits.

NI's share of UK income tax is derived from the Survey of Personal Incomes (SPI) produced by HM Revenue and Customs (HMRC)⁸. This share is then applied to the UK figure for income tax published by HM Treasury.

The latest SPI survey was published by HMRC in January 2015 and provided data for 2012-13. Further note that the SPI data includes some records which cannot be allocated to a particular region - these have been excluded from the total used to estimate the NI share.

Corporation tax

The UK figure for total corporation tax is taken from the PSAT2 databank published by ONS. The estimate of NI corporation tax excludes North Sea corporation tax.

NI's share of UK corporation tax (excluding North Sea revenues) is taken to be its share of profits (less holding gains) of all public and private corporations in the UK. Information on profits (less holding gains) is directly supplied by ONS.

Capital gains tax (CGT)

The UK capital gains tax figure, taken from the PSAT2 databank published by ONS, is apportioned to NI according to its share of UK GVA (less extra-regio).

Inheritance tax (IHT)

The UK figure for IHT is taken from the PSAT2 databank published by ONS. HMRC directly provides actual outturn revenue figures raised from inheritance tax in NI.

Stamp duties

The UK figure for stamp duty is taken from the PSAT2 databank published by ONS.

NI stamp duty is estimated based on NI's share of UK revenue raised from (1) land and property stamp duties and (2) stocks and shares stamp duties.

⁸ The latest SPI data is available from:
<https://www.gov.uk/government/collections/personal-incomes-statistics>

Stamp duty land tax (SDLT) is published by HMRC⁹ and is disaggregated by government office region (GOR). NI's share of UK households who own stocks, shares, unit trusts, PEPs and ISAs as recorded in the Family Resources Survey¹⁰, produced by the Department for Work and Pensions (DWP), is used to estimate stamp duty from stocks and shares in NI.

National insurance contributions (NICs)

NI national insurance contributions (NICs) are based on an analysis of a 1 per cent sample of National Insurance Recording System (NIRS) data, supplied by HMRC, which is aggregated to represent the population using Government Actuary's Department (GAD) estimates of total NIC (employee and employer) accruals for each year. NI's share of employer and employee contributions in this sample is applied to the UK NICs figure to estimate NICs in NI. NI's apportionment ratio for 2011-12 was also used for 2012-13 and 2013-14. This figure will be revised in future editions as up-to-date data becomes available.

Value added tax (VAT)

The UK figure for VAT is taken from the PSAT2 database. The total figure is comprised of: net VAT, local government VAT refunds and central government VAT refunds. Net VAT is then split into VAT paid by households, businesses, government and the housing sector.

NI's share of UK household VAT revenues is estimated based on average weekly household expenditure data in the ONS Family Spending Report publications.¹¹ The 2014 edition of the Family Spending Report is used for 2012-13 and 2013-14. The 2013 edition is used for 2010-11 and 2011-12 and for 2009-10 the 2012 edition is used. The appropriate VAT rating (standard rate, reduced rate, zero-rate or exempt) is applied to each expenditure item to estimate average household VAT revenues in NI and the UK. These average VAT revenues per household are then scaled up by the number of households to estimate total VAT revenues in NI and the UK. The NI/UK ratio of total VAT revenues is then applied to apportion UK VAT receipts (as given in the PSAT2 databank) to NI. The methodology has been amended since the previous report and VAT refunds are now included in this figure as opposed to 'other taxes and royalties.' This is to maintain consistency with the GERS methodology.

NI share of business and housing sector VAT is apportioned by NI share of UK GVA. VAT paid by Government is apportioned by NI share of UK government expenditure.

⁹ Latest SDLT figures available from: <https://www.gov.uk/government/collections/stamp-duties-statistics>

¹⁰ Family Resources Survey available from: <https://www.gov.uk/government/statistics/family-resources-survey-2012-to-2013>

¹¹ Family Spending Reports available from: <http://www.ons.gov.uk/ons/rel/family-spending/family-spending/index.html>

Local government VAT refunds are apportioned through NI share of UK local government final consumption expenditure. Central government VAT refunds are apportioned as such:

- Ministry of Defence – NI share of UK population
- NHS – NI share of UK TES health
- Other government departments – NI share of UK TES (less defence and health)

Fuel duties

UK fuel duty revenue is apportioned to NI according to its share of UK fuel consumption. This is split into duty paid on petrol and diesel using data from HMRC's Hydrocarbon Oils Duties Bulletin¹². NI's share of petrol and diesel consumption is estimated using regional road traffic fuel consumption data published by the Department of Energy and Climate Change (DECC)¹³. The estimated NI/UK ratio of petrol and diesel consumption is then applied to apportion UK fuel duty to NI.

Tobacco duty

UK tobacco duty revenue is apportioned to NI based on regional household expenditure data in the ONS 'Family Spending Survey' publications. Average weekly household expenditure is scaled up by the number of households to estimate total weekly expenditure on tobacco in NI and the UK. The NI/UK ratio of total weekly expenditure on tobacco is used to apportion UK tobacco duty revenue (as published by in PSAT2 by ONS) to NI. Note that the Family Spending Survey editions used are the same as in VAT above.

Alcohol duty

UK figures are sourced from the PSAT2 database for spirits; cider and perry; wine; and beer. NI's share of total UK private household consumption of these products is then used to derive the proportion of duty attributable to NI.

Expenditure on alcoholic products is estimated using data from the DEFRA Family Food Survey.¹⁴ Total weekly consumption for NI and UK is then calculated by multiplying average consumption in NI and UK with their respective population estimates. The ratios of NI to UK consumption are then used to apportion UK alcohol duty revenues to NI.

¹² Source: HMRC Hydrocarbon Oils Duties Bulletin, available from:
<https://www.uktradeinfo.com/Statistics/Pages/TaxAndDutyBulletins.aspx>

¹³ Source: DECC - Regional and local use of road transport fuels, available from:
https://www.gov.uk/government/publications?departments%5B%5D=department-of-energy-climate-change&publication_filter_option=statistics

¹⁴ <https://www.gov.uk/government/collections/family-food-statistics>

Betting and gaming duty

UK betting and gaming duty revenue is apportioned to NI based on regional household expenditure data in the ONS Family Spending Reports. Average weekly household expenditure is scaled up by the number of households to estimate total weekly expenditure in NI and the UK. The NI/UK ratio of total weekly expenditure on gambling is used to apportion UK betting and gaming duty revenue (as published by ONS) to NI. Note that the Family Spending Reports used are the same as in VAT above.

Air passenger duty (APD)

UK air passenger duty revenue (APD), as published by ONS, is apportioned to NI according to its share of the UK population. Population figures are sourced from ONS.¹⁵

Insurance premium tax (IPT)

UK insurance premium tax (IPT), as published by ONS, is apportioned to NI according to its share of the UK weekly expenditure on insurance. Expenditure on insurance is estimated using the Living Costs and Food Survey, presented in the Family Spending Report. Weekly spend is then estimated by multiplying average household spend by the number of households in Northern Ireland and the UK. The ratio of weekly spending on insurance is then used to apportion NI share of UK insurance premium tax revenues. Note that the Family Spending Reports used are the same as in VAT above.

Landfill tax

The UK landfill tax figure is taken from PSAT2. This is then apportioned to NI based on the ratio of NI to UK landfill tax calculated from landfill tax data in the HMRC Disaggregated Tax Receipts publication.

Climate change levy

In apportioning the UK total for climate change levy (CCL), NI's consumption of electricity, gas and solids & other fuels are considered. The UK Climate Change Levy is taken from the PSAT2 database. Climate change levy receipts from electricity consumption are apportioned to NI according to its share of UK electricity consumption, which is derived from the 'Digest of UK energy statistics' (DUKES)¹⁶ published by the DECC. UK revenues from the consumption of gas and solids & other fuels¹⁷ are apportioned on the basis of NI's share of UK GVA (less extra regio). Note that up until 31 March 2011 supplies of gas in Northern Ireland have been exempt from CCL.

¹⁵ Population figures taken from: <http://www.ons.gov.uk/ons/rel/pop-estimate/population-estimates-for-uk--england-and-wales--scotland-and-northern-ireland/2013/index.html>

¹⁶ Electricity consumption data is available from: <https://www.gov.uk/government/statistics/electricity-section-5-energy-trends>

¹⁷ Available from: <https://www.uktradeinfo.com/Statistics/Pages/TaxAndDutyBulletins.aspx>

Aggregates levy

The UK figure for the Aggregates Levy is taken from the ONS PSAT2 Database and apportioned to NI according to its share of GVA (less extra regio). The NI figure does not reflect the impact of the suspension of the Aggregates Levy Credit Scheme on 1st December 2010.

Vehicle excise duty

NI vehicle excise duty (VED) is recorded net of refunds in annual reports published by the Driver and Vehicle Licensing NI (DVLNI).

Domestic and Non-Domestic rates

NI domestic and non-domestic rates revenues for 2009-10 to 2013-14 were provided by the Department of Finance and Personnel (DFP) officials in Rating Policy Division (RPD) and require no further estimation.

For the financial years 2008-09 onwards the split between domestic and non-domestic rates has not been available for regional rates. Therefore, the respective shares of total rates in 2007-08 have been applied to the 2009-10 to 2013-14 total regional rates data. A breakdown of the district regional rate has also not been available for 2009-10 to 2010-11 and 2012-13 to 2013-14. Therefore the respective shares of total rates in 2007-08 have been applied to 2009-10 and 200-11 total district rates data and the respective shares of total rates in 2011-12 have been applied to 2012-13 and 2013-14. However it is important to note that the total domestic and non-domestic rates figure is an actual figure provided by RPD.

Other taxes and royalties

The UK figure for other taxes and royalties is comprised of a number of small revenues. UK figures for the sub categories of revenue listed below are taken from the PSAT2 database. Separate apportionment methods are used to allocate these revenues to NI.

1. Consumer Credit Act fees are apportioned to NI on a population share basis.
2. UK revenues paid to levy funded bodies are apportioned to NI according to its share of UK agricultural GVA. This is taken from ONS 'Regional Accounts'¹⁸ – GVA industry group 'Agriculture, forestry & fishing'.
3. Regulatory fees are apportioned to NI on a population share basis.

¹⁸ Available from: <http://www.ons.gov.uk/ons/rel/regional-accounts/regional-gross-value-added--income-approach-/december-2014/index.html>

4. UK TV licence revenue is apportioned based on NI's share of UK private households. This has been estimated using the ONS 'Family Spending Survey' publications (NI number of weighted households/UK number of weighted households). This share is then applied to the UK TV licence revenue as reported in the PSAT2 database by ONS.
5. National lottery revenues are apportioned according to NI's share of UK expenditure on gambling from the ONS 'Family Spending Survey' publications.
6. Renewable energy obligations are apportioned using the NI share of UK electricity consumption. This is taken from DECC as referenced above in the climate change levy methodology.
7. Fishing licence fees are apportioned to NI on a population share basis.
8. Passport Fees are apportioned to NI on a population share basis.
9. Fossil Fuel Levy is apportioned to NI on GVA share basis

Other Taxes on Income and Wealth

The UK figure for other taxes on income and wealth is comprised of a number of small revenues. UK figures for the sub categories of revenue listed below are taken from the PSAT2 database. Separate apportionment methods are used to allocate these revenues to NI, shown in table B2 below

Table B2: Apportionment methodologies for Other Taxes on Income and Wealth

Other Taxes on Income & Wealth	Apportionment Methodology
Company income tax receipts, net of repayments	GVA
Household charitable donations via gift aid and covenant tax reliefs	As for income tax
Betting and gaming duty (those elements that are classified as tax on income)	As for betting and gaming duty
OFGEM tax on Non-Fossil Purchasing Agency renewable energy income	As for other renewable energy obligations
Inland Revenue: Company IT withheld	As for corporation tax
Horserace betting levy board	As for betting and gaming duty
Central government contributions to payroll giving to charities	GVA
Tax credits - insurance and pension funds	As for income tax
Corporation tax credit expenditure	As for corporation tax
Company tax credits	As for corporation tax
Non-Profit Institutions Serving Households tax credits	As for income tax

Interest and dividends

UK figures for interest and dividend revenue received by Public Corporations, Local Government and Central Government, are obtained from the ONS PSAT2 database. The UK Public Corporation figure is apportioned to NI by share of UK public sector GVA. Public sector GVA is derived from the ONS 'Regional Accounts' – GVA industry groups 'Public administration and defence', 'Education', and 'Health and social work'. UK Local government and central government figures are apportioned using NI's share of UK population.

Gross operating surplus & Rent and other current transfers

In calculating gross operating surplus (GOS) for NI, separate UK figures for central government, local government and public corporations are taken from the ONS PSAT2 database. Central Government figures are apportioned to NI based on NI's share of UK Central Government Non-Market Capital Consumption (NMCC). Local Government figures are apportioned based on NI's share of UK Local Government NMCC. Public Corporation figures are apportioned to NI according to its share of public sector GVA.

The UK figure for rent and other current transfers is taken directly from GERS and is apportioned to NI according to its share of UK public sector GVA.

Current receipts (excluding North Sea revenues)

This is the total value of public sector revenues (excluding North Sea revenues) estimated for NI.

North Sea revenues

The UK Continental Shelf is included as a separate region of the UK (the extra regio territory) and is not allocated to specific regions.

Current receipts (including North Sea revenues)

This is the total value of public sector revenues (including North Sea revenues on a per capita basis) estimated for NI. Population figures are sourced from ONS, as previous. This apportionment method views North Sea revenues as non-identifiable UK revenue.

ANNEX C: METHODOLOGY FOR PRODUCING ESTIMATES OF PUBLIC SECTOR EXPENDITURE

This annex discusses the methodologies applied to allocate public sector expenditure to NI using data from official UK Government sources.

Estimates of public sector expenditure presented in this report are based on outturn data recorded in PESA November 2014

Total Expenditure on Services (TES) may be disaggregated into two components:

- Identifiable expenditure: expenditure that can be recognised as benefiting individuals, enterprises or communities within particular regions; and
- Non-identifiable expenditure: expenditure considered to occur on behalf of the UK as a whole and cannot be apportioned on an individual country or regional basis.

Note that both of these components can be separated further into current and capital expenditure.

TES accounted for approximately 83.3% of Total Managed Expenditure (TME) in 2013-14. TME is the total current and capital expenditure of the public sector on a national accounts basis. The other component of TME is referred to as the accounting adjustment.

Identifiable Expenditure

Identifiable expenditure is allocated on a 'who benefits' basis to the UK region where the expenditure is attributable. PESA November 2014 provides identifiable expenditure data by country and region of the UK. In this exercise the NI identifiable expenditure data is taken directly from Chapter A of PESA November 2014, 'Analyses of public expenditure by country, region and function'. Tables A1 to A14 provide the expenditure figures required for NI.

Non-Identifiable Expenditure

Non-identifiable expenditure cannot be identified as benefiting a particular UK region. It is incurred on behalf of the UK as a whole, where the entire UK population benefits, regardless of where the funds are spent. It mainly comprises expenditure on defence, debt interest and international services.

In addition, it should be noted that PESA includes data on expenditure outside the UK. For the purposes of this exercise, this category is included in non-identifiable expenditure for both the UK and NI data. The inclusion of this data in non-identifiable expenditure is consistent with the view that expenditure outside the UK should be categorised as non-identifiable, given that the benefits are shared amongst the UK constituent countries.

Similarly, as for identifiable expenditure, the data required is provided in chapter A of PESA November 2014. However, to estimate non-identifiable expenditure, which as noted above includes figures from outside the UK, the PESA data needs to be apportioned as it is not disaggregated into regions.

EU Transactions

EU transactions consist of two components: (1) receipts from; and (2) payments to the EU. The EU Division within the Department of Finance and Personnel (DFP) provides the figures for actual receipts from the EU to NI. UK payments to the EU are apportioned to NI according to its share of UK GVA (less extra regio).

Table C1 summarises the apportionment methodologies used to estimate NI non-identifiable expenditure from UK data published in PESA November 2014.

Table C1: Apportionment Methodologies for Non-identifiable Expenditure in NI 2009-10 to 2013-14

Element of Non-ID Expenditure	Methodology	
	Non-identifiable	Outside the UK
Public and common services	Population	Population
EU transactions	Actual	GVA
International services	Population	Population
Debt interest	Population	N/A
Defence	Population	N/A
Public order and safety	Population	N/A
Enterprise and economic development ¹	Population	Population
Science and technology	GVA	Population
Employment policies	N/A	Population
Agriculture, fisheries and forestry	Population	Population
Transport	GVA	Population
Environment protection	GVA	Population
Housing and community amenities	Population	N/A
Health	Population	Population
Recreation culture, and religion	Population	Population
Education	N/A	Population
Social protection	Population	Population

1. Under the CRA (Country and Regional Analysis) section of PESA November 2014, UK Government financial sector interventions are categorised under 'enterprise and economic development' as non-identifiable expenditure and are apportioned by NI population share of the UK.

Population figures and GVA (less extra regio) figures are sourced from the ONS^{19,20}. Note that GVA 'less extra regio' excludes income that cannot be satisfactorily assigned to any physical region.

¹⁹ Population figures taken from: <http://www.ons.gov.uk/ons/rel/pop-estimate/population-estimates-for-uk--england-and-wales--scotland-and-northern-ireland/2013/index.html>

Accounting Adjustment

As mentioned previously, aggregate expenditure is termed Total Managed Expenditure (TME). This is calculated as TES summed with an accounting adjustment. To reiterate, TES for NI is the sum of NI identifiable expenditure taken directly from PESA November 2014 and the apportioned share of 'non-identifiable' and 'outside the UK' figures given in PESA November 2014, according to the methodologies presented in table C1. TES is produced on a different basis to TME, which is the primary measure of total public spending reported in the ONS National Accounts. TME includes general government capital consumption and reverses the deduction of certain VAT refunds. It also excludes a number of items in budgets which are captured by the TES, such as the grant equivalent element of student loans. The accounting adjustment is therefore used to ensure that estimates of total public spending for both Northern Ireland and the UK are reported on the basis of TME.

The accounting adjustment for the UK as a whole is given in PESA November 2014 Chapter A, Table A.1. To estimate the accounting adjustment for NI, the UK figure is apportioned using the methodologies set out in table C2. Note that the breakdown of the UK accounting adjustment figure into the elements below was provided by HM Treasury, courtesy of Scottish Government statisticians.

Table C2: Apportionment Methodologies for estimating the Accounting Adjustment in NI

Element of Accounting adjustment	Methodology
Central Government Capital Consumption	NI Share of UK TES
Local Government Capital Consumption	NI Share of UK TES
Current VAT refunds	NI Share of UK VAT
Capital VAT refunds	NI Share of UK VAT
VAT receipts paid to EU	NI Share of UK VAT
Student loans subsidt	Population
Imputed subsidy from Local Authorities to the Housing Revenue Account	NI Share of UK TES
Imputed flows for renewable obligation certificates	Population
Bank of England Asset Purchase Facility Flows	NI Share of UK TES
Royal Mail Pension Plan	NI Share of UK TES
Local Authority Pensions	NI Share of UK TES
Network Rail	N/A
Tax Credits	Population
Residual	NI Share of UK TES

ANNEX D: NI'S PUBLIC SECTOR ACCOUNTS – EXCLUDING NON-IDENTIFIABLE EXPENDITURE & ACC. ADJUSTMENT

Non-identifiable expenditure is considered to occur on behalf of the UK as a whole and thus cannot be apportioned on an individual or regional basis. It is mainly comprised of defence expenditure and debt interest payments. For example, approximately 71.4 per cent of total NI non-identifiable expenditure was either attributed to defence or debt repayment expenditure in 2013-14. This exercise will examine the effect of removing this type of expenditure and in addition to this it will also exclude an accounting adjustment for depreciation and VAT refunds (i.e. not cash expenditure). The impact of such exclusion is demonstrated in the table and figure provided below, where in 2013-14 the impact was a considerable revision downwards in the NI fiscal deficit from 27.9 per cent to 15.6 per cent of GVA (12.3 percentage points).

Table D1: NI Net Fiscal Balance Estimates (Exc. Non-Identifiable Expenditure and Accounting Adjustment), 2009-10 to 2013-14 (£m)

£ Million	NI				
	2009-10	2010-11	2011-12	2012-13	2013-14
Aggregate Expenditure (Agg. Exp.)	22,774	23,357	23,703	24,292	24,083
Identifiable Expenditure (Id. Exp.)	18,889	19,133	19,364	19,801	20,055
Aggregate Revenue (Exc. NS)	13,191	14,247	14,848	14,833	14,923
Net Fiscal Balance (Agg. Exp.)	-9,583	-9,110	-8,855	-9,459	-9,160
Net Fiscal Balance (Id. Exp.)	-5,698	-4,886	-4,516	-4,968	-5,132
<i>Difference</i>	-3,885	-4,224	-4,339	-4,491	-4,028
Net Fiscal Balance per capita (£) (Agg. Exp.)	-5,344	-5,048	-4,881	-5,187	-5,006
Net Fiscal Balance per capita (£) (Id. Exp.)	-3,177	-2,707	-2,489	-2,724	-2,805
Net Fiscal Balance as a % of financial year GVA (Agg. Exp.)	-30.9%	-28.9%	-27.6%	-29.1%	-27.9%
Net Fiscal Balance as a % of financial year GVA (Id. Exp.)	-18.4%	-15.5%	-14.1%	-15.3%	-15.6%

Figure D2 shows that both fiscal deficit methodologies of expenditure inclusion cause the overall position to follow the same approximate trend over the five year period.

Figure D2: NI Fiscal Deficit Position shown by Aggregate Expenditure and Identifiable Expenditure Estimates, 2009-10 to 2013-14 (£m)

ANNEX E: NI'S PUBLIC SECTOR ACCOUNTS - INCLUDING A HYPOTHETICAL PER CAPITA SHARE OF NORTH SEA (NS) OIL REVENUES

The inclusion of a per capita share of North Sea oil revenue revises downwards the overall NI negative net fiscal balance; from £9.2 billion excluding North Sea oil revenues to £9.0 billion in 2013-14, as presented in table E1. This decline represents a reduction of £0.2 billion or 1.5 per cent.

However, applying the assumption of a zero share of North Sea oil revenue to NI follows the most logical approach as NI's activity in North Sea oil fields is unclear. To include this revenue within the main analysis would not be a true representation of NI's public sector revenue as evidence suggests that NI is not listed as servicing any of the strictly NS oil fields.

Table E1: Net Fiscal Balance Estimates (Inc. North Sea oil): NI and the UK, 2013-14 (£m)

£ Million	NI	UK
Aggregate Expenditure	24,083	720,488
Aggregate Revenue	15,059	612,232
Net Fiscal Balance	-9,024	-108,256
Net Fiscal Balance per capita (£)	-4,932	-1,689
Net Fiscal Balance as a % of financial year GVA	-27.5%	-7.2%

Table E2 shows the impact of the inclusion of North Sea oil revenues on the NI fiscal position over the period 2009-10 to 2013-14.

Table E2: NI Fiscal Position (Inc. North Sea oil), 2009-10 to 2013-14 (£m) ¹

£ Million	NI				
	2009-10	2010-11	2011-12	2012-13	2013-14
Aggregate Expenditure	22,774	23,357	23,703	24,292	24,083
Aggregate Revenue	13,363	14,489	15,162	15,011	15,059
Net Fiscal Balance	-9,411	-8,868	-8,541	-9,281	-9,024
Net Fiscal Balance per capita (£)	-5,248	-4,914	-4,708	-5,090	-4,932
Net Fiscal Balance as a % of financial year GVA	-30.4%	-28.1%	-26.6%	-28.5%	-27.5%
Reduction in Fiscal Deficit when NS Oil Inc.	173	243	314	178	136
% Reduction in Fiscal Deficit (Exc. NS Oil vs. Inc NS Oil)	-1.8%	-2.7%	-3.5%	-1.9%	-1.5%

1. Note that the sum of the constituent items may not always agree exactly with the total shown due to rounding.
