

Neighbourhood Renewal Measurement of Outcomes Report

2015

**Enniskillen
Neighbourhood Renewal Area**

Introduction

Regardless of where a deprived area is located it will inherently have similar problems. For example, higher than average rates of unemployment, physical and mental ill health, lower levels of educational attainment, higher rates of crime and problems with quality and maintenance of the environment.

The main aim of the Neighbourhood Renewal Strategy is to close the gap in the quality of life between the most deprived neighbourhoods and the rest of the society.

Production of the Measurement of Outcomes Report is now in its third year.

The report uses a range of statistical indicators to provide evidence on the absolute change that is being recorded across the key Neighbourhood Renewal outcomes, and whether there have been positive or negative movements over time in statistical data in relation to:

- a. Worklessness;
- b. Education;
- c. Health, and
- d. Crime and anti-social behaviour.

Where possible the data presented has been updated to reflect the publication of data for additional years. In some cases however, such as life expectancy, this has not been possible as the latest published data has already been used.

Purpose

The Neighbourhood Renewal Code of Practice and Guiding Principles states that one of the responsibilities of the Neighbourhood Renewal Partnership is to develop and agree an Area Action Plan which seeks to improve the social, economic and environmental conditions by amongst others:

- identifying evidence based needs, and
- prioritising the needs of the area that are to be met.

The purpose of this report is to provide an evidence base for the area to enable staff and members of the partnerships to identify and prioritise need. The report highlights, across a number of key economic and social outcomes, if the gap is closing.

The findings from this Report along with the Area's Annual Report should be reflected upon when taking forward the annual review of the Action Plan as well as considering the effectiveness of the projects/interventions being supported in contributing to closing the gap.

[Regional NRA Annual Reports 2013-14](#)

User Notes

- i. The Report is broadly split into two parts:
 - Gap Analysis Table and
 - Measuring of impact across each Key Outcome Indicator.

The Gap Analysis table provides a summary across the key indicators on whether Enniskillen Neighbourhood Renewal Area (NRA) has experienced a positive or negative outcome or if there has been relatively little change. The table allows the user to compare the NRA and Non NRAs baseline position and the most current year available.

The measuring of the individual key outcome indicators provides data on a year by year basis across a given period. This information allows the user to examine the trend and variances and consider if there has been any outside influences, for example, economic downturn.

- ii. Care should be taken when interpreting a positive or negative outcome as the Area may still be experiencing significant problems – improving but still significantly behind Non NRAs.
- iii. Given the changes in the provision of welfare, some key indicators are reporting a closing of the gap. This may be due to changes in the rules for claiming particular benefits and the migration to new benefits, for example, some claimants might be transferred to Employment and Support Allowance if they have been claiming other benefits like Income Support or Incapacity Benefit.
- iv. Caution is advised when interpreting change over time where numbers are small. This is particularly evident when examining our smaller NRAs. The demography section of this report provides information relating to the population size and breakdown.
- v. Annex 1 at the end of this report provides the data tables for all charts contained within.
- vi. Statistics for Key Stage 1 and Key Stage 2 are provided by school attended rather than by home postcode of pupil. As a result, Key Stage 1 and 2 statistics for NRAs show the results of schools serving the area, whether based within the boundaries of the NRA, or in the case of schools located outside the NRA where more than 51% of pupils come from the NRA. There may be some NRAs with no statistics for Key Stage 1 and 2.

- vii. A change from previous reports has been made due to the commencement of the new councils which came in to power on 1st April 2015. As a result, the available statistics within the report which refer to LGD are referring to the new LGDs and not the old LGDs.
- viii. Key Stage 2 data covering 2012/13 onwards are based on the new Levels of Progression; these results are not directly comparable with Key Stage Assessment outcomes from previous years. The Department recognises that these new arrangements will need time to embed and has recommended caution in analysing data and benchmarking performance from the first years' implementation. Equivalent data for 2013/14 were strongly affected by non-response due to Industrial Action taken by schools.

Summary of Enniskillen NRA

The Enniskillen Neighbourhood Renewal Area (NRA), shown on the map on the next page, comprises of a total population of 3,159, of which approximately 66% are of working age. There were 23% of residents who identified themselves as having a 'Protestant and Other Christian (including Christian related) community background', while approximately 73% identify themselves as having a Catholic community background.

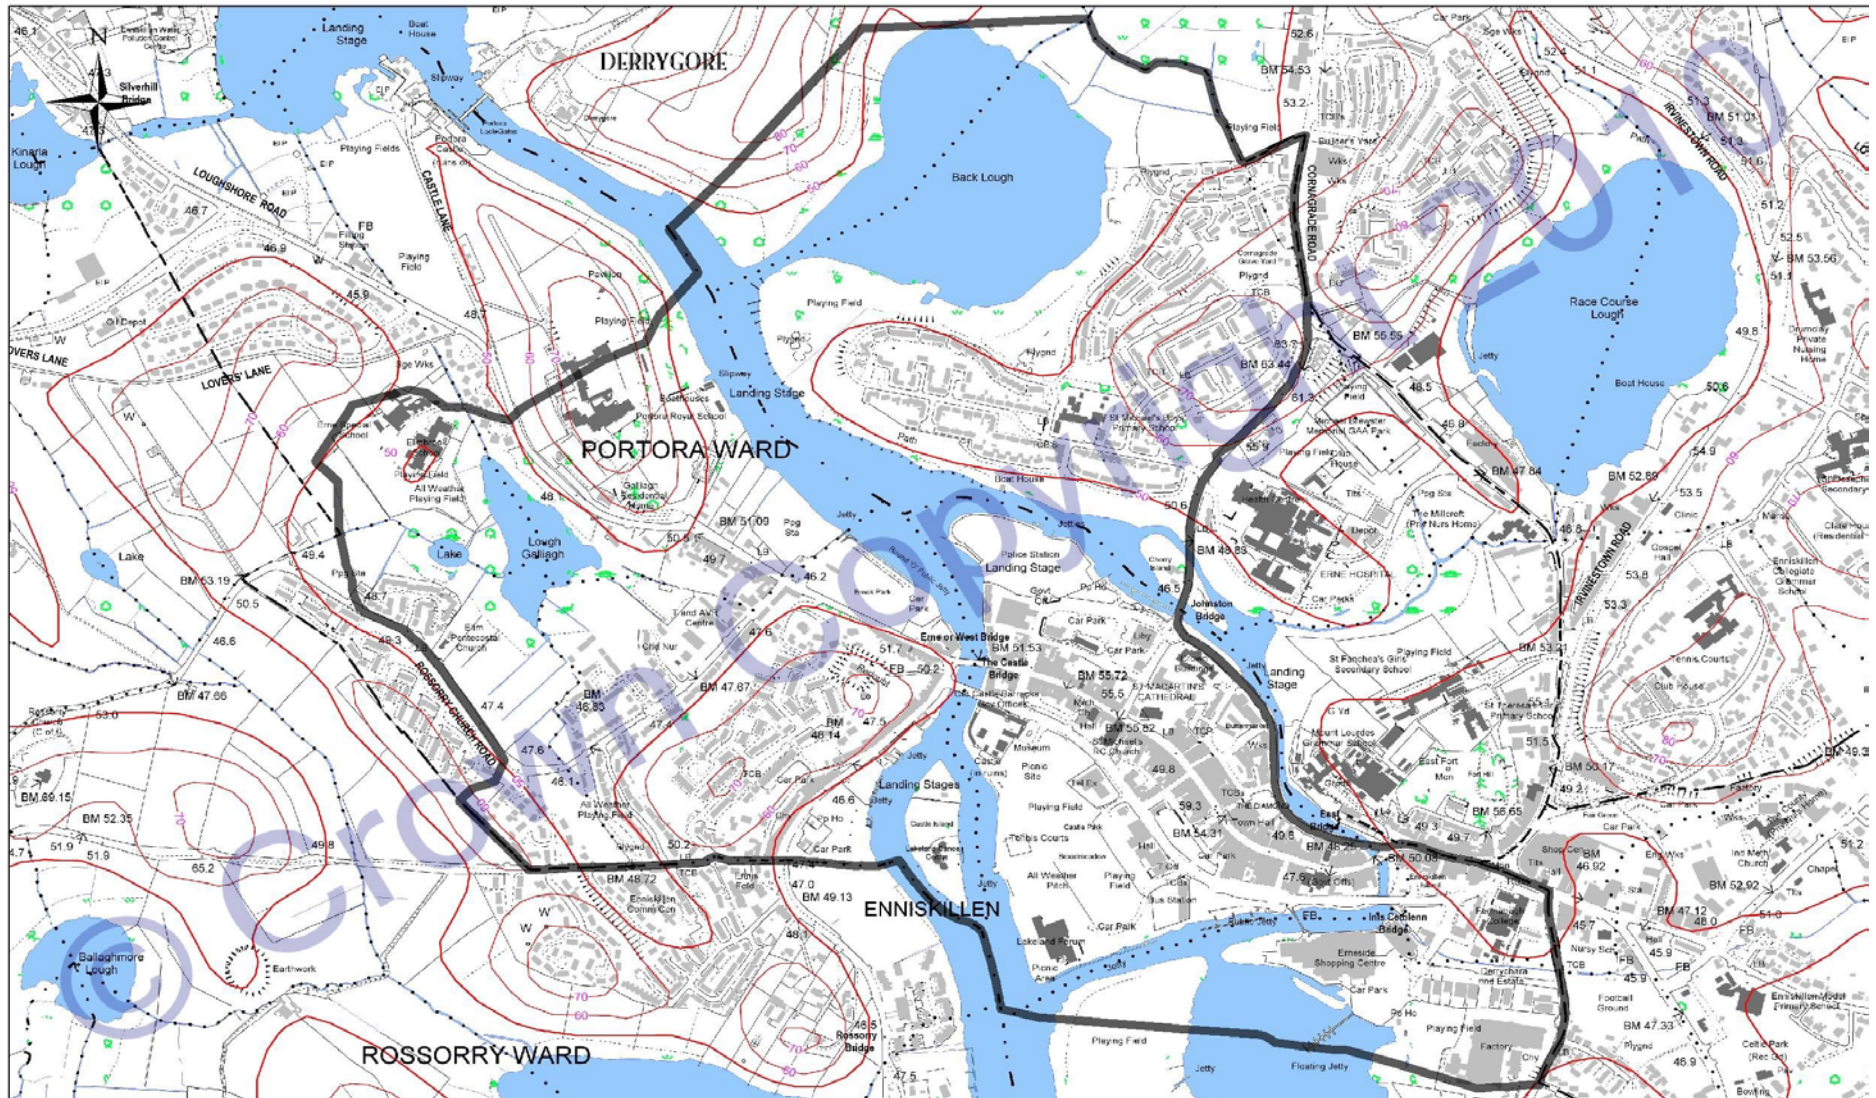

Benefit uptake within Enniskillen NRA continues to be at a higher rate than Non NRAs which has been accompanied by a negative change in the gap to Non NRAs across most of the benefit indicators.

Enniskillen NRA has shown a negative change in the gap to Non NRAs across almost all measurable education indicators compared to all other NRAs.

There have been no births to teenage mothers in Enniskillen in each of the past two years. Deaths from suicide and undetermined intent remain high in Enniskillen NRA although the Gap to Non NRAs is decreasing. The Gap to Non NRAs for deaths to under 75s has widened due to an increase within Enniskillen NRA and a decrease for Non NRAs.

Enniskillen NRA has some of the highest rates of crime and anti social behaviour incidents compared to other NRAs. With the exception of burglary and criminal damage, there has been a negative change in the Gap to Non NRAs across all other crime indicators. One potential reason for this may be due to the NRA encompassing the town centre and so crime figures may be inflated by this.

Criminal damage (per 1,000 population)	2003	62.6	15.5	-47.1	2013	40.8	8.0	-32.8	14.4	✓
Drug offences (per 1,000 population)	2003	5.7	1.3	-4.4	2013	6.6	1.9	-4.7	0.3	✗
Anti-Social Behaviour (per 1,000 population)	2006	156.3	48.9	-107.4	2013	148.5	25.5	-123.0	15.6	✗
Offences Recorded with a Domestic Abuse Motivation (per 1,000 population)	2004	5.4	3.9	-1.5	2013	17.3	5.4	-11.8	10.4	✗

² A positive value for the Gap indicates the NRA is in a more desirable position than the Non-NRA's. Conversely, a negative value for the Gap indicates the NRA is in a less desirable position than the Non-NRA's.

Demography

According to the 2011 Census of Population, Enniskillen NRA comprises a total population of 3,159. The NRA demographic breakdown along with population change since 2001 is shown in Table 1 below. A comparison of population and demography with Non-NRAs and Local Government District (LGD) in 2011 is shown thereafter in Table 2.

Table 1: NRA Population Change 2001 – 2011

Gender Age Band	Male					Female					Total Population
	0-15	16-39	40-64	65+	Total	0-15	16-39	40-64	65+	Total	
Census 2001	373	571	477	208	1,630	294	558	492	342	1,685	3,315
Census 2011	300	531	514	207	1,552	266	525	525	292	1,607	3,159
Population Change (%)	-19.6	-7.0	7.8	-0.5	-4.8	-9.5	-5.9	6.7	-14.6	-4.6	-4.7

- According to the 2011 Census, approximately 23% of residents of Enniskillen NRA identified themselves as having a 'Protestant and Other Christian (including Christian Related)' community background, with 73% identifying themselves as having a Catholic community background.
- The gender breakdown for the area in 2011 was 49% male and 51% female.

Table 2: Population Comparison with Non-NRAs and LGD, 2011

Gender Age Band	Male					Female					Total Population
	0-15	16-39	40-64	65+	Total	0-15	16-39	40-64	65+	Total	
Enniskillen NRA	300	531	514	207	1,552	266	525	525	292	1,607	3,159
Non NRAs	162,698	243,602	243,732	100,188	750,220	154,359	244,514	248,885	128,736	776,493	1,526,714
Fermanagh & Omagh LGD	12,854	18,245	18,437	7,281	56,817	12,043	17,708	15,020	11,913	56,684	113,501

- 66% of Enniskillen NRA is of working age compared to 64% in Non NRAs and 61% in the Fermanagh & Omagh LGD.
- 18% of the population are aged 15 and under compared to 21% in Non NRAs and 22% in the Fermanagh & Omagh LGD.
- 18% of the female population are 65 or over compared to 17% in Non NRAs and 21% in the Fermanagh & Omagh LGD.
- 13% of the male population are 65 or over compared to 13% in Non NRAs and 13% in the Fermanagh & Omagh LGD.

Economic Renewal - To develop economic activity in the most deprived neighbourhoods and connect them to the wider urban economy.

Worklessness

When we talk about worklessness the following benefits are taken into account:

- Jobseekers Allowance
- Income Support
- Incapacity Benefit
- Employment and Support Allowance

Jobseekers Allowance

Why is it important? Work is considered the most important route out of poverty for working-age people. Measuring the percentage rate and the breakdown of the claimant count of JSA can establish whether there is a need for interventions that tackle the barriers to employment. Claimants under age 25 who are not in education, employment or training are of particular interest and are commonly referred to as NEETS.

Jobseekers Allowance Claimants as a % of Eligible Population

Of those claiming JSA in 2014 in Enniskillen NRA:

- 13% of Claimants are under 25 (NEETS), compared to 25% in Non NRA's
- 53% of those claiming JSA are deemed long-term unemployed (12 months +). This compares to 41% in Non NRA's.

Income Support

Why is it important? Work is considered the most important route out of poverty for working-age people. Measuring the percentage rate and the breakdown of the claimant count of IS can establish whether there is a need for interventions that tackle the barriers to employment.

Income Support³ Claimants as a % of Eligible Population

Of those claiming Income support in 2014 in Enniskillen NRA:

- 31% are claiming as Lone Parents.
- 31% are also in receipt of Carer's Allowance.

Comparable figures for Non Neighbourhood Renewal Areas are:

- 34% are claiming as Lone Parents.
- 33% are also in receipt of Carer's Allowance.

³ Income Support is available to those aged 16-59. Due to limited availability of population figures at NRA level, the population used to calculate these figures were for those aged 16-64.

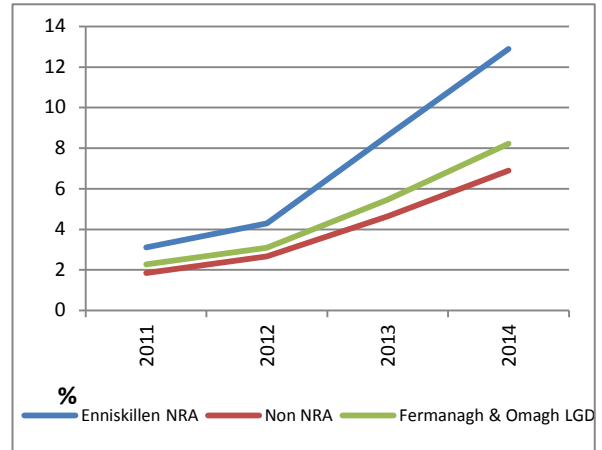

Incapacity Benefit and Employment and Support Allowance

Why is it important? Ill health can affect people’s capacity to do paid work and is a contributing factor to living in poverty. Measuring the numbers claiming ill health benefits and understanding the primary causes of ill health can better inform decisions when considering the need for interventions.

Incapacity Benefit Claimants as a % of Eligible Population

Employment and Support Allowance Claimants as a % of Eligible Population

- Incapacity benefit is being wound down and discontinued. It is being replaced by ESA. There are only a handful of cases remaining at 2014.

The main reasons for claiming Employment and Support Allowance in 2014 for Enniskillen NRA are:

- 57% Psychiatric Disorders
- 13% Musculoskeletal Disease
- 10% Neurological Disease

Disability Living Allowance

Why is it important? Ill health and disability can affect people’s capacity to do paid work and are contributing factors to living in poverty. Measuring the numbers claiming ill health and disability benefits and understanding the primary causes can better inform decisions when considering the need for interventions.

Disability Living Allowance Claimants as a % of the eligible population

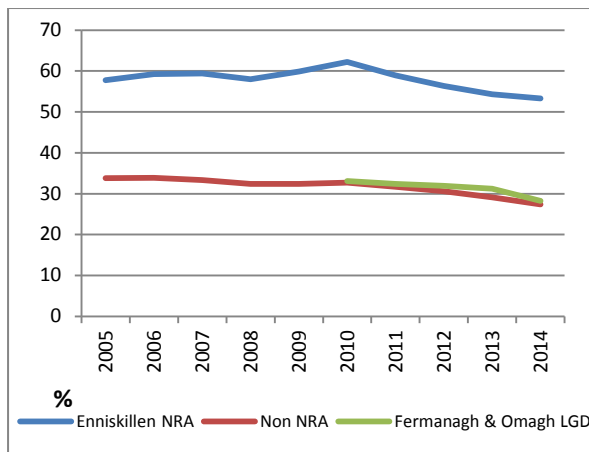

The main reasons for claiming Disability Living Allowance in 2014 for Enniskillen NRA are:

- 34% Other mental health causes
- 13% Arthritis
- 9% Learning difficulties

State Pension Credit

Why is it important? State Pension Credit is a means tested benefit. For most older people the level and source of their income in retirement is determined by their opportunities in working life. State Pension Credit tops up a weekly income to a guaranteed level. Measuring the numbers claiming State Pension Credit can better inform decisions when considering the need for interventions.

State Pension Credit Claimants as a % of Eligible Population

The percentage of eligible population receiving Pension Credit in 2014 in Enniskillen NRA is considerably higher (53.3% in 2014) than the Non NRAs rate for the same period (27.4 %).

Social Renewal – To improve social conditions for the people who live in the most deprived neighbourhoods through better co-ordinated public services and the creation of safer environments.

Education

Qualifications

Key Stage 1 and Key Stage 2

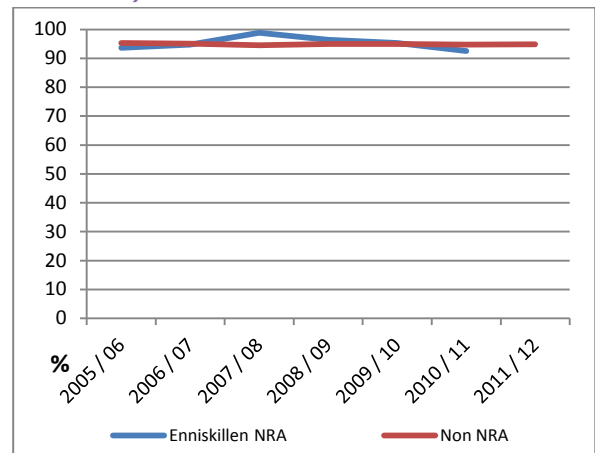

Please refer to User Note viii regarding Key Stage 2 data

Why are they important? Key Stage 1 and 2 at English and Maths allows schools to establish the level at which children are working and build a comprehensive picture of the progress and learning needs of each child. Measuring achievement at these stages can better inform decisions when considering the need for interventions.

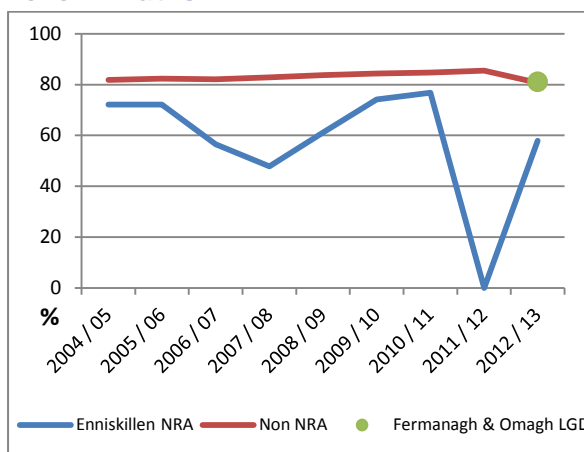

Percentage Achieving Key Stage 1 Level 2 Maths (LGD data not available)

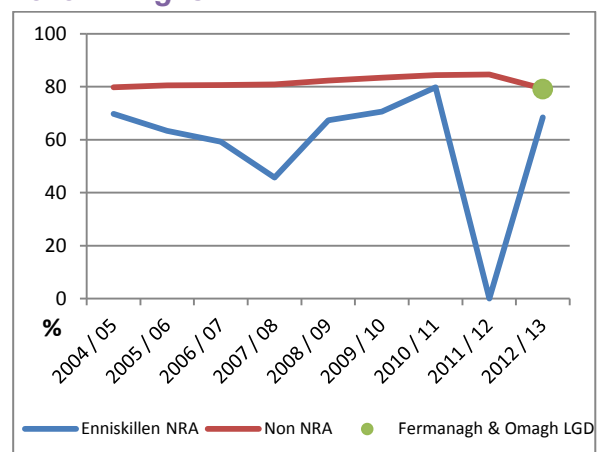

Percentage Achieving Key Stage 1 Level 2 in English (LGD data not available)

Percentage Achieving Key Stage 2 Level 4 Maths

Percentage Achieving Key Stage 2 Level 4 English

The Department of Education’s Key Stage Two Literacy and Numeracy targets by 2014/15 are that 86% of children reach Key Stage Two Level 4 Maths and English before leaving Year 7. Enniskillen NRA is currently underperforming against this target in both Maths and English.

GCSE's

Why are they important? GCSEs are highly valued by schools, colleges and employers. Obtaining GCSEs lead to a number of routes, mainly work, further study or an Apprenticeship. Most Universities will ask for 5 GCSEs grades A*-C, including English and Maths (as well as A Levels or equivalent qualifications)

Percentage achieving at least 5+ GCSE A-C including equivalent*

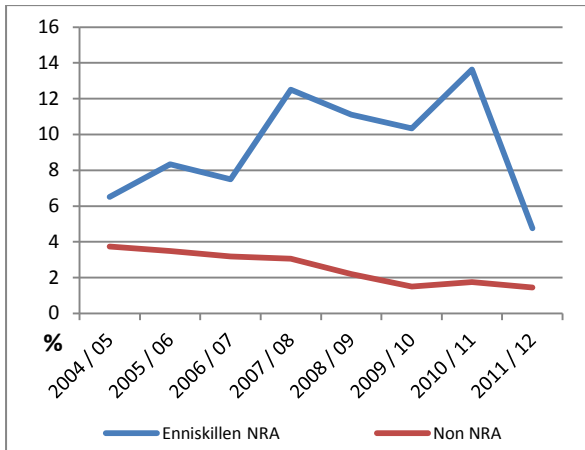

Percentage achieving at least 5+ GCSE A-C including English and Maths (LGD data not available)*

The Department of Education's target by 2014/15 is that 66% of school leavers achieve 5+ GCSEs A* - C. In Enniskillen 51.9% are achieving 5+ GCSEs, with 40.7% achieving 5+ GCSE A*-C including English and Maths.

Percentage of School Leavers with No GCSEs

In 2011/12, 4.8% of pupils left school in Enniskillen NRA with no GCSEs, in comparison to 1.4% of pupils within Non NRAs

Attendance

Why is it important? Regular school attendance and educational attainment are inextricably linked. Measuring the level of absence can assist in considering needs for interventions that encourage school attendance.

Primary

Percentage of total half days not attended

The absence rate of primary pupils residing in Enniskillen NRA has remained consistently higher than those pupils from Non NRAs between 2007 / 08 and 2012 / 13, although the rate has dropped by 1.6 percentage points (pp) over the same period.

Post Primary

Percentage of total half days not attended

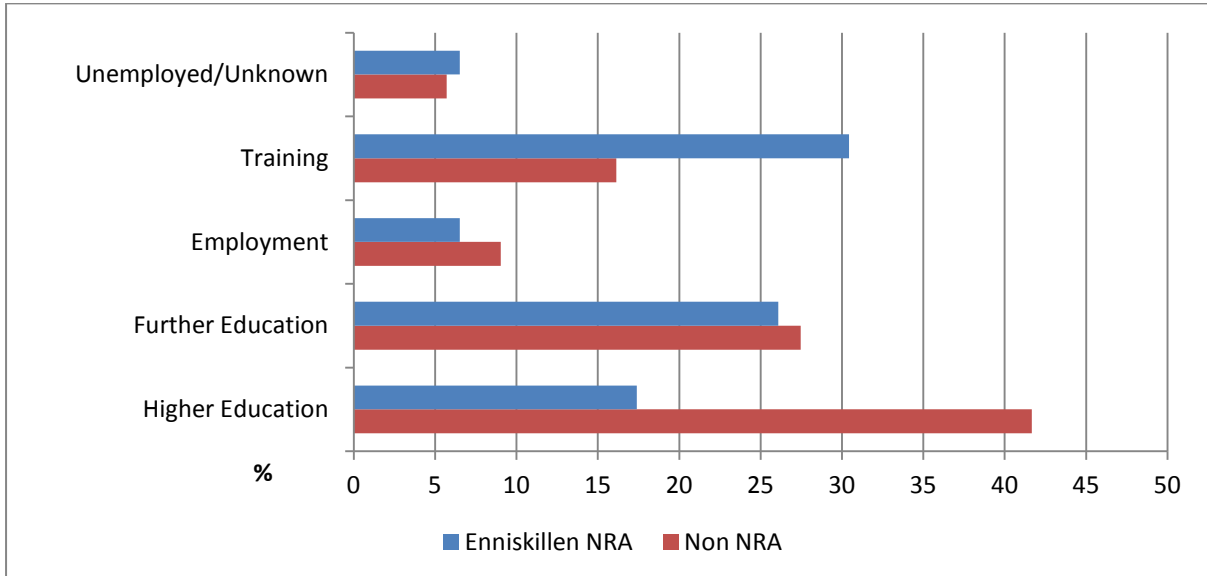

The absence rate of post primary pupils residing in Enniskillen NRA was higher than those pupils from Non NRAs in 2012 / 13 and seems to be on an upward trend after declining between 2008 / 09 and 2010 / 11.

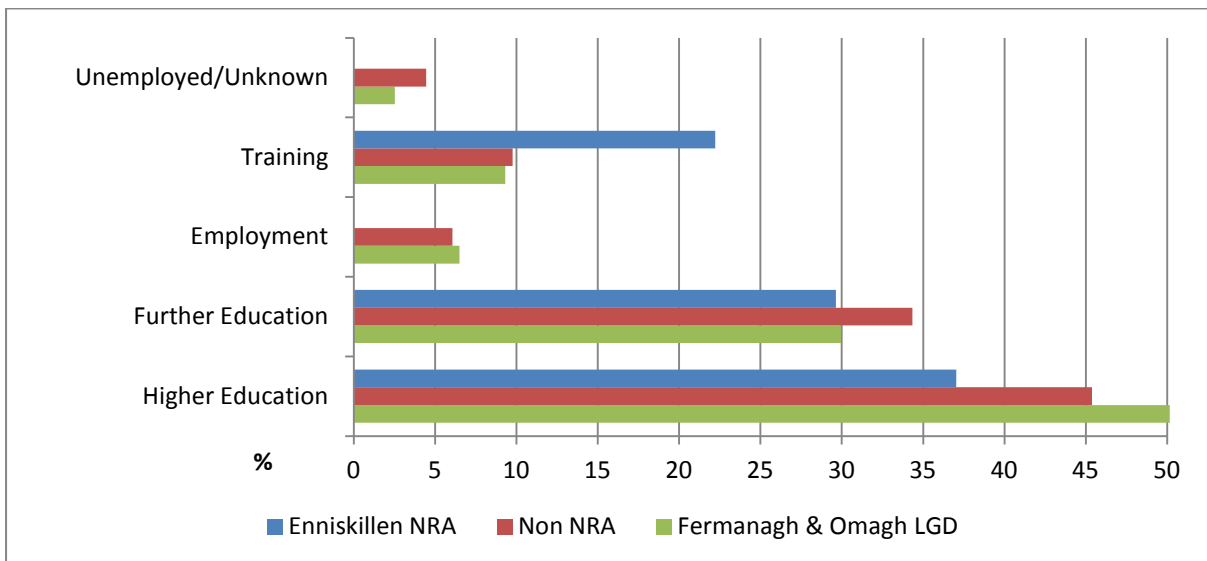

Destination

Why is it important? The Destinations of School Leavers, provides details on the pupils destination on leaving school. This information can assist in considering the need for interventions for young people.

Destination of School Leavers 2004 / 05

Destination of School Leavers 2012 / 13

The percentage of school leavers in Enniskillen NRA entering Further or Higher Education increased by 23pp between 2004 / 05 and 2012 / 13, compared to a 11pp increase within non NRAs.

Health

Why is it important? Information on the Health of those living within NRAs can assist in considering the need for health-related interventions

The life expectancy of those living in aggregated Belfast, North West and Regional NRAs remains lower than that of the population living outside of NRA's. Statistical data on life expectancy is not available for each individual area. In 2008-2010 the life expectancy for those living in the:

- Belfast NRAs was 70.9 for males and for 77.9 females,
- North West NRAs was 73.8 for males and 79.2 for females,
- Regional NRAs was 73.1 for males and 78.2 for females, and
- Non NRA's was 78.0 for males and 82.1 for females.

Deaths Under 75 (as a % of total deaths)

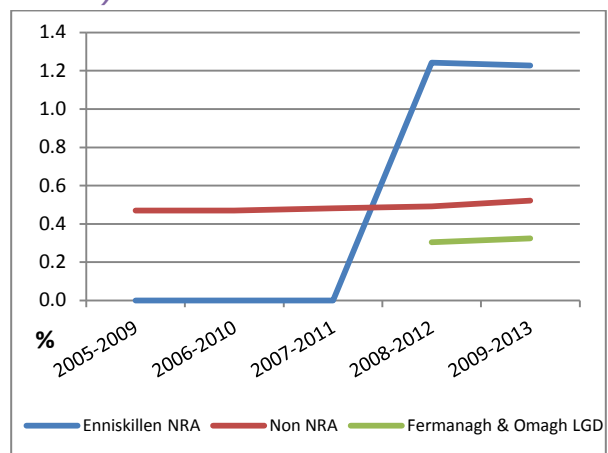

Enniskillen NRA had 51.7% of deaths under the age of 75 compared to 33.4% in Non NRAs and 37.4% in Fermanagh & Omagh LGD in 2013.

Alcohol Related Deaths (as a % of total deaths)

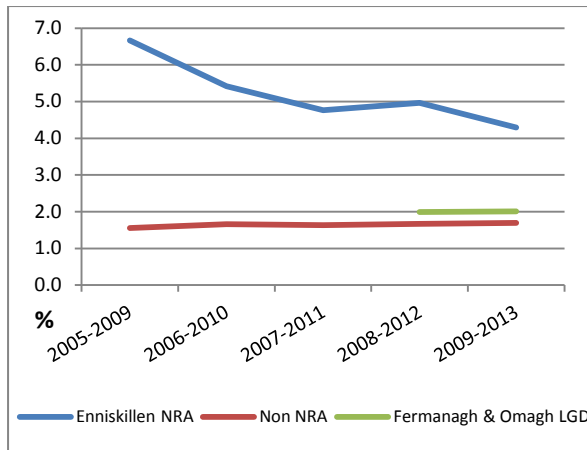

Drug Related Deaths (as a % of total deaths)

Although the figures for alcohol and drug related deaths are small, the percentage of deaths in Enniskillen NRA for drug related deaths is higher than the Non NRAs and LGD rates. The rate for alcohol related deaths has been on a par with Non NRA and LGD rates in the past two years. It also has to be taken into account that these figures are for the primary cause of death only.

Deaths from Suicide and Undetermined Intent as a % of Total Deaths

The percentage of deaths from suicide and undetermined intent in Enniskillen NRA in the period 2005-2013 is much higher than the Non NRA rate although it has decreased by 2.4pp since 2005-09.

Births to teenage Mothers as a percentage of total births

Births to teenage mothers, although subject to a high level of fluctuation, have decreased overall from 19.2% in 2005 to 0.0% in 2013.

Crime

Why is it important? Information on the Crime position within NRAs can assist in considering the need for crime-related interventions

A number of indicators have been used to chart the levels of crime and anti-social behaviour in NRAs.

Total Offences per 1,000 Population (Recorded)

In 2013, there were 221.4 offences recorded per 1,000 population in Enniskillen NRA. This represents a decrease of 21% from a high of 281.7 offences per 1,000 population in 2007. The largest number of offences recorded in 2013 were 'Violence against the person, sexual offences and robbery', representing 41% of all offences committed in Enniskillen NRA.

Offences as % of Total Offences

The chart above shows that 'Violence against the person, sexual offences and robbery', 'Criminal Damage' and 'Theft' are consistently the highest category of offence reported in Enniskillen NRA between 2003 to 2013.

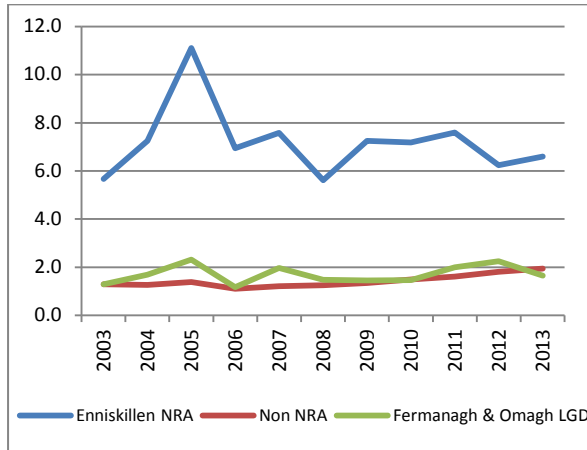

Violence against the person, sexual offences and robbery per 1,000 population

Criminal Damage Offences per 1,000 population

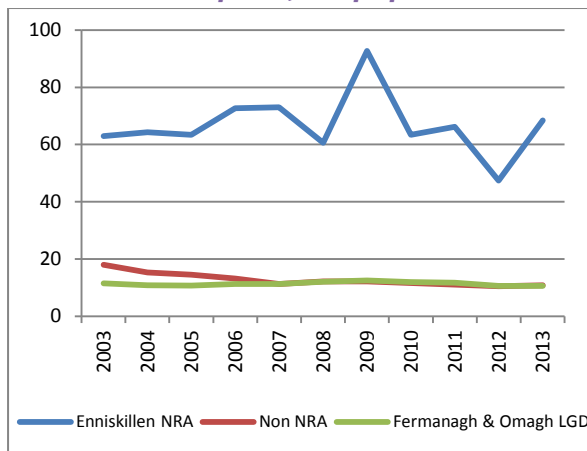

Drug Offences per 1,000 population

The number of offences recorded per 1,000 population has been volatile for most category of offence through the period 2003 – 2013.

The largest notable percentage change since 2003 has occurred in the Violence against the person, sexual offences and robbery category, which has increased from 50.6 per 1,000 population in 2003 to 83.2 in 2014.

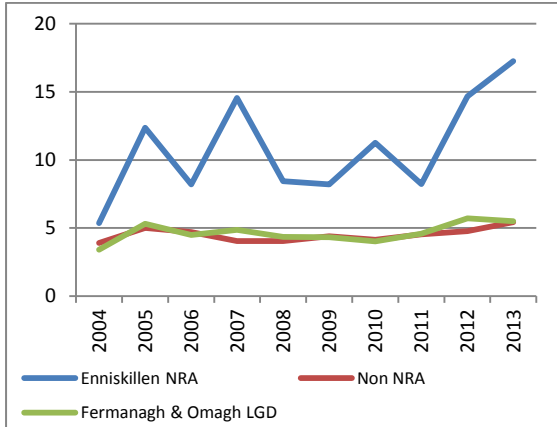

Theft Offences per 1,000 population

Burglary Offences per 1,000 population

Offences Recorded with a Domestic Abuse Motivation per 1,000 population

Compared to Non NRAs there have been a higher number of offences recorded with a Domestic Abuse motivation per 1000 population in recent years. In 2013, Enniskillen NRA recorded 17.3 offences per 1,000 population compared to 5.4 in Non NRAs and 5.5 in the Fermanagh and Omagh LGD.

Anti-Social Behaviour Incidents (recorded by police) per 1,000 population

The number of reported incidents of anti-social behaviour in Enniskillen NRA has reduced by 5% from 156.3 per 1,000 population in 2006 to 148.5 in 2013.

Anti social behaviour is recorded as an incident and not an offence and is therefore not included in the total number of offences.
