Objective	Update	RAG														
Safety & Excellence																
1. 30% of all Quality Improvement programmes should have patient and/or service user involvement.	<p>There are 40 projects being taken forward via the SQB training programme in 2017/18. Participants include two service users and a carer for a patient who uses Trust services. SQB workshop 2 included a presentation from Sandra McCarry, PPI, outlining the benefits of involving patients and service users and useful guidance on the approach to take.</p> <p>All project teams are being encouraged to involve patients and service users in their improvement work and many projects are expected to fulfil this.</p>															
2. Across all programmes of the Quality Improvement Plan, we will aim to improve safety by 10%.	<p>There is a target of reducing harm by 10% for each year of the QI Plan, cumulating in a 30% reduction by 2020. The various workstreams of the 6 objectives of the QI Plan are at different stages of progress and of collecting data to measure. For some areas, a 10% reduction by March 2018 may be difficult but a 30% reduction by 2020 will be more manageable. There has already been 10% or more improvement in a number of areas including:</p> <ul style="list-style-type: none"> • the number of learning events taking place; • reduction of inpatient falls; • independent audit of hand hygiene; • Number of deaths recorded on MMR system; • Recording and monitoring of paediatric fluid balance <p>The Trust is on target to have 1000 staff trained to lead and support improvement work by 2020. The DoH has recently introduced this target to be achieved in 2018, which will be challenging.</p>															
3. Ensure that all specialty patient safety and mortality and morbidity meetings across the Trust are multidisciplinary and cover the full clinical governance agenda.	<div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>% of meetings with Multidisciplinary attendance</p> <table border="1"> <caption>% of meetings with Multidisciplinary attendance</caption> <thead> <tr> <th>Response</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>Yes</td> <td>81%</td> </tr> <tr> <td>No</td> <td>19%</td> </tr> </tbody> </table> </div> <div style="text-align: center;"> <p>% of Teams using full SMRPS meeting agenda</p> <table border="1"> <caption>% of Teams using full SMRPS meeting agenda</caption> <thead> <tr> <th>Response</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>Yes</td> <td>76%</td> </tr> <tr> <td>No</td> <td>19%</td> </tr> <tr> <td>Partial</td> <td>5%</td> </tr> </tbody> </table> </div> </div> <p>Information available on 37/48 teams. Objective	Update	RAG
	<p>An updated job description for Mortality and Morbidity Leads has been issued and recruitment will be required in some specialties. All teams are working towards having multi-disciplinary attendance and covering the full governance and patient safety agenda. This work is on-going and some groups will need developmental support to achieve this.</p> <p>A QI project has been undertaken to share learning from governance to the wider team of nurses, AHPs, etc. who don't attend M&M meetings. This links to the work of the Data Triangulation Group and development of a core data set, detail below.</p>	
4. Develop, standardise and test the data set for improvement in key areas reflecting the diversity of the Trust.	<p>A Data Triangulation Group with representatives from across the Trust has been established to oversee this work.</p> <p>Work is on-going to develop a core governance data set at ward level in acute hospitals. A data set has been developed and tested with ward staff in Vascular, RVH and Gynae, BCH wards. The data encompasses safety information, incidents, complaints and patient feedback. The pilot is being extended to other areas from November 2017 but may not include patient feedback, subject to resource.</p> <p>In the community setting a project has started to quality assure and review processes for referrals to the regional emergency social work service. Further engagement required with older people's services to review the dashboards currently used align that work to the Data Triangulation Group.</p> <p>Discussions are on-going with Information and ICT regarding the Trust requirements for a system to extract and triangulate data. Options are being considered at present.</p>	
5. Develop and implement collective leadership for the delivery of ongoing quality improvement - building a structure of support, continuous learning and innovation.	<ul style="list-style-type: none"> • Nearing completion of appointment of divisional leadership teams across all service directorates. • Work is underway/planned to examine how Corporate Directorates need to enhance ways of working to support the needs of service colleagues. • Drafted engagement and communication approach and plan to support the delivery of safe, high quality and compassionate care (to which collective leadership is one enabler), with some activities underway. 	
6. Ensure improvement in the Delivery of Corporate Parenting and Safeguarding responsibilities.	<p>The Trust has continued to discharge its statutory functions in relation to children, young people and adults in line with the requirements specified in the Regional Scheme for Delegation. In relation to children and young people in particular, the Trust has been engaged in a range of regional and local initiatives to develop an outcomes-based approach to service delivery as part of a focus on innovation, quality and performance improvement across the continuum of Children's Social Care provision.</p>	
Continuous Improvement		

The Corporate Management Plan 2017/18 – 6 Month Review (April – Sept 2017)

Key	
Not yet started	Red
Underway	Yellow
Completed	Green

Objective

1. Deliver Improvement Plans for Community, Elective & Unscheduled Care.

Update

Unscheduled Care and **Community Services** have developed a Winter Resilience Plan which details key improvements underway to improve patient flow across the winter period. For example, the Trust trajectory for improvement in 2017/18 is to achieve a further 10% improvement in winter baseline against the 4 hour unscheduled care standard.

RVH = 72%

MIH = 80%

2. Complete New Directions 2 proposals across Acute & Community/Children's Services.	Proposals on strategic changes across Belfast Trust are at an advanced stage of development. Within the adult acute hospital group, proposals have been developed and discussed widely across clinical teams, tested with the public and key stakeholders and shared with Trust Board. Draft Discussion papers for wider staff review are currently being finalised within Mental Health, Learning Disability, Children's Community and Acute Services and Older People/Physical Disability Services. All proposals will be submitted to ND2 Project Board for consideration by year-end.

Objective	Update	RAG
3. Take forward BHSCT role in supporting Transformation of Health & Social Care Services as per ‘Health & Wellbeing 2026—Delivering Together.’	“Health & Wellbeing 2026 – Delivering Together” is overseen by the Transformation Implementation Group (TIG), chaired by the Permanent Secretary. The Trust’s representative on this group is the Chief Executive. The Trust is participating fully in all aspects of work arising from TIG, including Improvement & Innovation, Pathology Modernisation, Review of Breast Assessment Services, Stroke Modernisation, Development of a Regional Workforce Strategy and Development of a Regional Leadership Strategy.	
4. Review Trust Performance & agree Improvement Plans in key services.	Performance trajectories have been submitted for ED/Elective/Cancer/ Mental Health services for 17/18 in line with the new regional performance management requirements. The Trust will be monitoring performance against the planned trajectories in 17/18.	
5. Implement Appreciative Inquiry in pilot areas to support user/carer input.	Within Learning Disability, we have had further training for carers and staff in the use of the Appreciative Inquiry tool and this has been helpful in rolling out our project. The focus within Learning Disability has been day services and is fully supported by the Day Services Forum. A steering group is fully functional in driving forward our co-produced questionnaire on services and we hope to have the feedback from carers, service users and staff by end of the year. This will then be presented to the Day Services Forum so that we can co-produce our plan for the way forward. A pilot is also being developed within Dementia Services to look at residential care. A Steering Group and Working Group have been developed, with representation from Trust staff, carers and relevant voluntary organisations. The questions for inquiry are currently being developed and a process for engagement is being drawn up.	
Partnerships		
1. Develop a Partnership Plan to guide our activities with all our partners.	In light of the development of ‘The Belfast Agenda’ (led by Belfast City Council & partners, including Belfast Trust) and the review of Trust Assurance arrangements, which proposes a Partnership Group to replace the current ‘3 E’ Group, a Partnership Strategy Group has been established to commence early work on a Partnership Strategy. Progress on this has been slower than planned and it is anticipated that the strategy will be developed by March 2018.	
2. Work with local Councils to support the implementation of Community Plans— ‘The Belfast Agenda’ , ‘Lisburn & Castlereagh Community.’	The Trust has been fully involved in the development of ‘The Belfast Agenda’ (Community Plan) and the Lisburn and Castlereagh Community Planning processes at both a strategic and operational level. Trust staff are currently working with other statutory partners to develop actions plans that will provide an implementation structure on the main Belfast themes of Growing the economy, Living here, City development and Working and learning and the Lisburn and Castlereagh themes of Children and young people, The Economy, Health and well-being, Where we live and Our community. An important element of this work has been the linking of Community Planning with Making Life Better and the draft Programme for Government outcomes.

Objective	Update	RAG
<p>3. Develop Action Plans for Making Life Better & Programme for Government (draft) implementation.</p>	<p>Belfast Trust is fully committed to the implementation of 'Making Life Better' (MLB) and through the Public Health - Health Improvement team, has an action plan that is delivering on the 6 key MLB themes:</p> <ol style="list-style-type: none"> 1. Giving Every Child the Best Start – Roots of Empathy programme in Belfast schools : the Early Intervention Coordinator to support the delivery of parenting programmes : Family Nurse Partnership; 2. Equipped Through Life – work through Healthy Ageing Strategic Partnership -age friendly city : physical activity and nutrition programmes; 3. Empowered Healthy Living – smoke free sites : health information sessions through health facilitators : emotional resilience training – Top Tips, ASIST; 4. Creating the Conditions – joint work through Belfast Healthy Cities reuniting planning and health programme; 5. Empowering Communities - community development/empowerment: workplace Health – B Well website and App; 6. Developing Collaboration – Belfast Strategic Partnership: partnership initiatives - healthy living centres, area partnerships, community planning. <p>In addition, through the Belfast Strategic Partnership, the Trust are working on a wide range of initiatives that address the key themes of the MLB Framework, e.g. Healthy Ageing, Lifelong Learning, Mental Health and Emotional wellbeing, Active Belfast, Alcohol and Drugs etc.</p> <p>While the Programme for Government (PfG) is still in draft, the Trust are working with partner organisations to establish delivery structures for PfG and, in particular, taking a lead role on the 'Healthier Workplaces' programme. In addition, the Trust has already established programmes that will deliver outcomes for the majority of the 14 PfG areas.</p>	<p>RAG</p>
<p>4. Develop Good Relations Strategy & Inequalities and Disability Action Plans.</p>	<p>Belfast Trust consulted formally on its second-generation draft good relations strategy between 9th June and 8th September 2017. Due to extensive pre-consultation and engagement, there was not a significant volume of responses, but those that were received were positive and acknowledged the benefits of the strategy.</p> <p>The Trust's Chief Executive officially launched the strategy on 21st September on 'International Day of Peace' during 'Community Relations and Cultural Awareness Week.' This took place at a joint celebration event along with Belfast City Council, the Northern Ireland Housing Executive and the Community Relations Council. The event underpinned the importance of Belfast's strategic partners working together to promote good relations across the city.</p> <p>The Trust is currently out for formal consultation on two corporate documents and this consultation will close on 7th November:</p> <ul style="list-style-type: none"> • The Inequalities Plan is a draft plan to tackle residual Section 75 inequalities in health and social care; • The Disability Action Plan is a draft plan to promote positive attitudes towards disabled people and to encourage their full participation in public life. <p>Both plans contain regional HSC actions and specific local actions for Belfast Trust. The plans have been co-designed and have been greatly informed by individuals and representative organisations across the disability and equality sector.</p>	<p>RAG</p>

5. Further strengthen our Personal & Public Involvement (PPI) governance and accountability arrangements to ensure strong service user and carer voice.	The Trust continues to develop a range of activity to support PPI. This includes staff training, the promotion of PPI e-learning and support for a range of service user groups. The community development team have given support to staff to develop a number of new PPI initiatives and the Trust PPI standing forum planning group continues to meet on a regular basis. Work is ongoing to map current PPI work across the Trust and identify members for the new forum. The Trust continues to participate in the Regional PPI Forum and is working to address the recommendations made in the recent PHA monitoring report. Recently PPI objectives have been included in the Trust Accountability framework and this will ensure an ongoing strong service and user voice across all directorate and divisional structures.	
Our People		
1. Commence implementation of the Trust's People Strategy, 'caring supporting improving together'.	The Trust's People Strategy is in draft form; early consultation with stakeholders has taken place with positive feedback. A further more extensive consultation exercise will be undertaken in the latter half of 2017/18 with a view to the strategy being launched before the end of the financial year.	
2. Deliver enhanced collective working and decision making within and across teams.	<ul style="list-style-type: none"> Support plan for divisions (e.g. team effectiveness, development process) is in place. Commenced scoping phase of the assessment of existing culture and leadership capability (late Sept) following DoH approval to proceed. Commenced cross-divisional engagement/learning events to support new ways of working. 	
3. As an exemplar employer, improve our ability to attract and retain high calibre staff and fill identified gaps.	<ul style="list-style-type: none"> Currently reviewing how we advertise and promote Belfast Trust vacancies Working in partnership with LinkedIn to improve the Trust's profile as an Employer of Choice Participating in the regional 'Strategic Resourcing Innovation Forum' (SRIF) which is focusing on improving all aspects of the attraction and recruitment of potential candidates to the HSC 'On-boarding' improvement project underway to improve how we engage with newly appointed staff from the point that they have been offered a post in the Trust through to their first couple of months in employment. Continuing to participate in regional International Medical and Nursing recruitment campaigns. 	
4. Improve the health and wellbeing of our staff through implementation of the Health and Wellbeing Strategy.	<ul style="list-style-type: none"> Ongoing implementation of the Health and Wellbeing Strategy through the continued development of 'bwell' initiatives, most notably, the bwell website and app –support available to staff in and beyond the work environment. Continued roll out of programmes aimed at supporting health choices including; <ul style="list-style-type: none"> Couch 2 5K running programme which has completed 3 x 10-week sessions on the Mater, Knockbracken and Belfast City Hospital sites; 'Choose to Lose' weight management programme has been offered on four sites; 7 'bwell' Health Events have been supported since April 2017 engaging with over 500 staff. The Here 4 U Programme has increased the number of free activities available and now includes a 06:30 Spin class on the Mater Hospital site and increased Pilates classes to meet demand.

Objective	Update	RAG
	<ul style="list-style-type: none"> Our new Mind Ur Mind Toolkit was launched on World Mental Health day and is an information resource and reference point designed to support all staff in their personal mental and emotional well-being and to assist managers to more fully support colleagues. <p>Also worth noting that the Smoke Free policy is a continued support to staff health and well-being in terms of protected work environment and staff who smoke can access 12 weeks free Nicotine Replacement Therapy through engagement with the Health Improvement Team's Stop Smoking Service. September 2017 saw Belfast Health and Social Care Trust cited as one of Britain's Healthiest Workplaces.</p>	
5. Increase levels of active staff engagement within Trust.	HR continue to support Employee Engagement initiatives across the Trust. To-date this year the Engaging Manager programme has been delivered to 134 managers across the Trust. The Team have also developed an Engagement toolkit using Page Tiger publishing software. The toolkit will support individual staff members, service teams and Directorates to better understand the factors that contribute to high levels of employee engagement and the actions they can undertake locally to improve the current levels of engagement within their teams. The publication will be shared with the wider Trust in the Autumn.	
Resources		
1. Develop and agree a Financial Strategy with Health & Social Care Board & Department of Health and set and agree divisional budgets.	The Trust continues to work with HSC Board & Department colleagues to agree a financial strategy, in the absence of a finalised HSC budget for 2017/18. Trust Directorates have had budgets established.	
2. Deliver improvements in key waiting times, e.g. Children's Autism Spectrum Disorder services and maintain current service activity levels.	<p>The number of children waiting longer than 13 weeks for autism assessment has decreased by 30% in the last 12 months. The longest waiting patient is now waiting 12 months rather than the 17 months wait of October 2016. Both of these downward trends continue and services are continuing to actively seek out new ways of working within BHSCT and IS providers to reduce this number further.</p>

3. Review and agree new Organisational Performance arrangements.	The Trust has developed a draft revised Performance Management Framework to align with the revised draft Regional Performance Management Framework and the new Divisional structures within the Trust.	
4. Invest in our estate and ICT digital projects to reduce risk and enhance the patient experience.	The Trust has utilised its general capital budget for 2017/18, a significant proportion of which was allocated to the replacement of an MRI machine in Musgrave Park. The Trust continues to make representation to the Department for additional capital money to address pressures associated with the demand for replacement of essential medical equipment.	
5. Deliver agreed capital projects.	The Trust continues to manage the major capital projects with the support of CPD Health Projects, as their professional project manager. The Trust apprise the Department of the impact on cost & programme associated with Business Case approvals, contract award and construction & commissioning as they deliver new builds on complex hospital sites.
